## Section C - Descriptions and Specifications

### SOW

#### “Support to the Chief Scientist” Statement of Work

1.0 The Office of the Chief Scientist serves under the general direction and policy guidance of the Commander, U.S. Army Space and Missile Defense Command (SMDC). Program and supervisory controls are defined in terms of the Army’s space and missile defense program objectives, policy discussions with the Commander, and policy guidance from higher echelons. The purpose of this contract is to provide support to the office of the Chief Scientist on matters requiring scientific advice, consultation, and expertise with respect to the total research, development, test and evaluation effort of the Army’s space and missile defense programs.

#### 2.0 Contractor Requirements

2.1 The contractor shall provide fundamental scientific analysis of the challenges encountered to ensure systems are operational, effective, and suitable. Additionally, the contractor shall provide the essential link between advanced scientific research in space and missile defense programs and the application of research in SMDC developmental and operational programs. The contractor shall establish access and channels of communication with other scientific programs to appraise the value and potential of advances in these fields as criteria and techniques for the solution of missile defense and space exploitation problems.

2.2 The contractor shall assist in planning and coordinating a broad effort of (1) phenomena analysis to develop and define the categories and magnitudes of the factors, forces, and effects operation on space and missile defense systems and their environments; (2) scientific inference based on application of the physical laws, principles, and theories that pertain to the problem under study; (3) development of hypotheses which describe how these laws, principles, and concepts apply to situations; and (4) test of these hypotheses and theory formulation to provide a scientific framework for further developmental activities.

2.3 This effort requires personnel who are familiar with SMDC programs. These personnel must be capable of quick turnaround and dealing with senior Pentagon personnel such as Joint Chiefs of Staff and other high-level personnel. Being able to gain access to the Pentagon is essential during the performance of this effort.

#### 3.0 Contractor Planning & Execution

3.1 The contractor shall develop and implement plans to support the activities defined within this SOW and to coordinate the effort of the requirements.

3.2 The contractor shall participate in Technical Interchange Meetings (TIM) to be scheduled upon request of the Task Order Monitor (T/OM) to discuss and informally evaluate contractor efforts and accomplishments in direct relation to the T/O. During these meetings, the contractor shall present necessary data to enable a joint review of its various assigned requirements, along with attendant schedules, and resource expenditures. The contractor shall present and participate in technical discussions and shall inform, in a timely fashion, the T/OM of any problems with contract execution and any proposed solutions.

3.3 Specifically required of the contractor are the following:

3.3.1 Participate in activities planning and management planning.

3.3.2 Establish milestone timeline depicting requirements completion projections.

3.3.3 Attend meetings, provide meeting agendas, and prepare minutes from meetings as required in support of the above requirements.

3.3.4 Provide read-aheads and other documentation to various panel members, as directed by the T/OM.

4.0 Security Clearance: All contractor personnel shall possess, at a minimum, SECRET clearances and, additionally, selected contractor personnel will possess Top Secret clearances necessary for the conduct of specific requirements. The Task Order Monitor(s) will apprise the contractor of any increased security requirements. The contractor shall submit adequate clearance packages within ten (10) calendar days of identification of any increased security requirements.

PERIOD OF PERFORMANCE

3 Sept 04 - 31 Oct 05
