Section C - Descriptions and Specifications

PERIOD OF PERFORMANCE

PERIOD OF PERFORMANCE: 24 APR 02 – 23 APR 05

STATEMENT OF WORK

THAAD LOGISTICS SUPPORT Statement of Work

1.0 The Contractor shall provide logistics and technical support to the THAAD Project Office (TPO) Logistics Directorate by performing detailed logistics and programmatic analyses to support program planning,

controlling and managing of the THAAD Integrated Logistics Support (ILS) and Manpower and Personnel Integration (MANPRINT) programs. These efforts shall include all ILS elements, logistics planning, scheduling and preparation of documentation resulting from analyses, modeling and requirements determination. The Contractor shall provide maintenance engineering support to include the review and evaluation of the System Specification and each Segment's specifications. The Contractor shall provide technical analysis, systems re-design engineering, human factors engineering analysis with an emphasis placed on design configuration of the THAAD components: Radar, BM/C3I, Launcher, Canister and Peculiar Support Equipment (PSE). The Contractor shall also examine tooling, equipment and other THAAD system components. ILS program activities and schedules shall be developed to include program design reviews, milestone decision reviews, supportability test and evaluation analyses, materiel fielding, training and training devices and facilities. The Contractor's effort shall include Sustainment of THAAD or THAAD-related equipment, Peculiar Support Equipment (PSE) requirements determination and design influence, technical publications development and review, provisioning planning and execution, supply support, transportation and transportability requirements, modification planning and execution, human factors engineering and the development of missile re-certification, maintenance and storage requirements. The Contractor shall participate in Integrated Product Teams (IPT) as required by TPO counterparts. Trade studies, to include sensitivity analyses, shall be performed to compare support concept requirements with their alternatives and to identify the optimum support concept. The Contractor shall utilize as required, a number of different logistics models, i.e., Computerized Optimization Model for Predicting and Analyzing Support Structures (COMPASS), Computer-Aided Load Manifesting (CALM), Logistics Analysis Model II (LOGAMII), Power Log, Cost Analysis Strategy Assessment (CASA), in performing the required logistics analyses. The support shall incorporate the development and analysis of operation and support (O&S) and total ownership cost reduction alternatives. Supportability criteria shall be considered during the analyses of design alternatives in order to assure that the full impact of logistical concerns will influence hardware and software design. The Contractor shall provide technical assistance for both hardware and software. The test program and operational facilities shall be identified, facility requirements documentation developed, facility-costing documents prepared and project facility completion monitored by the Contractor. The THAAD program shall be analyzed as part of strategic and operational task force organizations to ensure interoperability/commonality and the reduction of total task force logistical/support requirements.

2.0 The contractor shall interface, as required, with the THAAD prime contractor, [REDACTED], the Simulation/Independent Verification and Validation contractor, [REDACTED], the Hardware-in-the-Loop contractor, [REDACTED] and other SETA contractors, in performance of this task order.
