

TSM-GMD

TRADOC System Manager Ground-Based Midcourse Defense

Summary

- Joint user community's centralized manager and integrator of DOTMLPF products
- Single user representative to the GMD materiel developer (GMD Joint Program Office)
- Provides a framework for Joint integration and problem resolution as DoD's lead service for GMD
- Leverages the Army's processes and capabilities to operate within the Joint Capabilities Integration and Development System (JCIDS).

TSM-GMD is the centralized manager and integrator of joint DOTMLPF (Doctrine, Organizations, Training, Materiel, Leader development, Personnel, and Facilities) products, and the single user representative to the GMD materiel developer.

TSM-GMD is assigned to the U.S. Army Space and Missile Defense Command (SMDC), the Army proponent for GMD, and resourced by SMDC and the GMD Joint Program Office (JPO). The TSM-GMD reports to the commanding general, U.S. Army Training and Doctrine Command (TRADOC), through the commanding general, SMDC. The role of the TSM is to serve as the sole contact between the warfighter community, including Army, Air Force, and joint commands, and the materiel developer or acquisition community, primarily the GMD JPO and the Missile Defense Agency. The TSM goal is to develop consensus and promote teamwork while leveraging TRADOC and SMDC force development resources for the fielding of GMD and integration with the Ballistic Missile Defense System (BMDS).

The Training and Doctrine Command (TRADOC) System Manager (TSM) Ground-based Midcourse Defense (GMD) is the Army's user representative and centralized manager and integrator for all Doctrine, Organizations, Training, Materiel, Leader development, Personnel, and Facilities (DOTMLPF) products associated with the land-based GMD system.

TSM-GMD, assigned to the U.S. Army Space and Missile Defense Command (SMDC), reports to the commanding general, TRADOC, through the commanding general, SMDC. The goal is to leverage TRADOC and SMDC force development resources and operate within the established Joint Capabilities Integration and Development System (JCIDS) to effectively and efficiently represent joint user interests in the development of the GMD system.

The TSM acts on behalf of the Army and joint warfighter community, including the Army National Guard, U.S. Strategic Command (STRATCOM), U.S. Northern Command (NORTHCOM), Air Force Space Command, and all subordinate user organizations in the GMD program.

To execute this mission, the TSM-GMD has its main office in Arlington, Va., and offices in Colorado Springs, Colo., and Huntsville, Ala., organized as follows.

Current Operations – This division conducts daily TSM-GMD baseline support and coordination. Functions include:

- Coordinating this complex program by providing assistance with program integration
- Representing the GMD user community to the Missile Defense Agency (MDA), GMD JPO, and the Joint Theater Air and Missile Defense Organization (JTAMDO), and coordinating GMD issues with Army Staff agencies
- Responsible for the development, implementation, and maintenance of the GMD user community DOTMLPF roadmap
- Developing and implementing specific decision support tools required for test bed support and to enable Limited Defensive Operations (LDO), as required
- Responsible for the development, implementation, and maintenance of the GMD user community Web site
- Serves as the TSM-GMD's lead for the scheduling, preparation, and execution of all GMD Joint Councils of Colonels and Captains, and Flag Officer/General Officer In-Progress Reviews

Future Operations – This division is responsible for ensuring that all matters, products, and positions pertaining to strategic operations, exercises, and training provided from the warfighter and user community to the materiel developer are integrated and coordinated.

- The Strategic Operations Branch focuses on GMD program strategy, Missile Defense Support Group, panel presentations, defense planning guidance studies, combatant commander missile defense roles and missions, and strategic communications. The branch coordinates its efforts through the GMD JPO, MDA, Army Staff, and Joint Staff.
- The Exercise Branch focuses on GMD simulations, battle planning exercises, combatant command exercises, JTAMDO workshops, table tops and joint wargames, senior leader seminars, and assessments. The branch coordinates its efforts through the combatant commands and various working groups, MDA, and the SMDC Force Development and Integration Center (FDIC).
- The Training Branch focuses on GMD Training and the GMD Fire Control/Communications (GFC/C) system. The branch coordinates its efforts through NORTHCOM, STRATCOM, North American Aerospace Defense Command (NORAD), SMDC G-3, FDIC, and the JPO.

Support and Sustainment – This division is responsible for force structure and ensuring manning and equipping of the GMD Objective Force Structure. It also provides the TSM coordination point for Organization and Personnel, and Force Protection developments with the GMD JPO, FDIC, and the National Guard Bureau.

Materiel, Testing, and Facilities – This division serves as a conduit between the warfighter/user community and develops materiel, testing, and facilities. As the sole contact in these areas, particular emphasis is placed on liaison activities with the GMD JPO Site Activation Command at Fort Greely, Alaska, and other SMDC offices.
