## MESSAGE FROM THE COMMAND

As most residents know, we have just completed a series of budget sessions to address a reduction of available funding for the fiscal year 2011 (FY11). I want everyone to know first and foremost that USAKA/RTS remains an important Department of Defense asset and our mission is enduring for many years to come.

With that said, our installation like many others worldwide, is facing some very hard choices regarding resourcing. Because personnel expenditures make up a large percentage of our overall budget, personnel layoffs were unavoidable. Because we are a small close knit community of friends and co-workers, these layoffs are especially painful to everyone.

I want everyone to know that we take every decision related to the budget very seriously, knowing that our mission and those who support it will be affected. I am confident that the final results of our decisions for FY 11 were absolutely the best case we could make with respect to maintaining our mission while still meeting the funding levels imposed. Decisions were made with constant dialogue between government and contractor staff. In order to mitigate further personnel reductions and to avoid higher mission risk, I have also approved several cost cutting measures in certain community services, in addition to modifying a range of increased fees for remaining services to include recreational activities. Again, hard but necessary choices had to be made.

I am proud of the work our team has done to mitigate the personnel cuts. Although the cuts are significant, they are much lower than originally proposed. I salute our contractors and the government team for the difficult task they accomplished and the professionalism they demonstrated through this process. I'm aware that my appreciation for the results is no solace to those who are impacted by these reductions. Be assured that USAKA/RTS will do everything we can to ensure those employees impacted by the cuts will be treated with dignity and

respect. Every day I notice the good work done by all and wish to express my personal thanks to all of you for what you have done for this installation and what you will do for USAKA/RTS in the future. As we begin planning a new fiscal year we will certainly be faced with budget pressures for Fiscal Year 12. Please be assured that every decision made will take into account the people impacted as well as the mission that we must perform. Separate from the challenges at hand, our future for USAKA/RTS is bright. Based on current studies conducted at senior Army levels regarding sustainment of USAKA operations and recent comments from the STRATCOM Commander who just visited this installation, USAKA will continue to serve as a key asset for our nation's defense and opportunities here remain great. Every week, we are informed of a new mission, or new customer planning on capitalizing on our remarkable RTS capabilities. There is clearly no doubt that this installation is enduring in the eyes of DoD. In the meantime, we will continue to be resilient in meeting every budgetary challenge placed upon us. Through all of this, we will need team work, perseverance, and patience as we all take on the challenge of completing our mission given the current fiscal environment and plan for the future. Again, I thank all of you for performing and supporting our Nation's vital mission, and for making Kwajalein such a great place to live and serve. Bottom line, USAKA is here to stay!

## THE KWAJALEIN HOURGLASS

The Kwajalein Hourglass is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Kwajalein Atoll. Contents of *The Hourglass* are not necessarily

official views of, or endorsed by, the U.S. Government, Department of Defense, Department of the Army or USAKA. It is published Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

# Kwajalein, Roi, RTS important assets to our senior DoD leaders

By Sheila Bigelow  
Managing Editor

While Kwajalein is used to sometimes hosting high level senior DoD leaders, it's not every day that the four-star general in charge of Strategic Command visits. GEN Kevin Chilton recently visited Kwajalein and Roi-Namur, taking time to examine Reagan Test Site, community facilities, radars and receive some technical and operational briefings. Chilton's visit was important; he is one of the combatant commanders in the U.S. military. Chilton works closely with LTG Kevin Campbell in his role as Joint Forces Component Commander for Integrated Missile Defense, and whom some on Kwajalein might know as he has visited several times.

While he was only here for two days, Chilton made it known how he feels about Kwajalein and RTS. In his briefing to USAKA government and military personnel on Kwajalein, he talked about how important Kwajalein and RTS are to STRATCOM. Specifically, he talked about how Kwajalein and RTS support STRATCOM's 'Lines of Effort.' Those LOE include cyber space, space operations, missile warning and ballistic missile defense. In different ways, Kwajalein supports all of those missions. As part of SMDC/ARSTRAT, Kwajalein and RTS are very important to STRATCOM's overall mission. He even went so far as to call Kwajalein a "national treasure."

Chilton was not only proud of Kwajalein and the work done at the Range, he was also proud for one of his own who received exciting news on the flight to Kwajalein. MAJ David Ashley, Chilton's Aid to Camp, was notified that he was going to be promoted to the rank of lieutenant colonel.

Chilton is no stranger to Kwajalein and not only because he first visited here in the spring of 2009. An interesting fact from Chilton's past was that his father worked out here on Kwajalein on the Sprint Missile Program. On his return visit, Chilton was accompanied by his wife, BG Catherine Chilton. Catherine is the Assistant to the

*Photos courtesy of COL Joseph Gaines*

**BG Catherine Chilton is welcomed to Roi with a traditional Marshallese wut. GEN Kevin Chilton was greeted with the same courtesy.**

Commander of Electronic Warfare at Hanscom Air Force Base, Mass.

In the short time he was here, Chilton was able to tour and investigate much of Kwajalein and Roi. He also had time to experience some of the native customs, courtesy as always, from Floyd Corder. He was treated to some chilled coconut milk and even got to see a coconut crab. Chilton was also greeted at Roi by the Enniburr women's club. They sang and offered Chilton a special lei that they reserve for traditional chiefs and those in leadership positions. He ate lunch at Café Roi and enjoyed some of their island-famous soft ice cream. There was a lot of interest between Chilton and his staff in the World War II historical sites on Roi. He was especially interested in the Japanese ammunition storage facility, and was amazed that the steel doors to the facility were still functioning after all this time.

Chilton and his staff performed a reef sweep aboard the new LUH helicopters on their way to Roi. They were piloted by Michael Chickilly, Don Serra and Jeff Wase. They had a special pilot that day, CW5 Charlie Dodd, USAKA Government Flight Representative.

Chilton stirred up interest and photo opportunities wherever he went on Kwajalein or Roi because some knew he was formerly an astronaut with the National Aeronautics and Space Administration. Chilton began his career at NASA as a lieutenant colonel and finished as a colonel. He is now the only four-star general in the U.S. military

# Jobwa Stick Dance brings RMI/US neighbors together

Article and photos by Sheila Bigelow  
Managing Editor

After a long summer of vacations and travelling, the Kwajalein community joined together Aug. 29 at the Welcome Back Bounce and BBQ at the Richardson Theater. The bounce castle and obstacle course kept the little ones busy; they bounced, laughed and squealed with excitement, enjoying the hot, sunny afternoon. They took a rest from the sun and bouncing to play some Bingo or black light bowling, courtesy of Community Activities. Just when you thought the day was done, a special performance was getting ready to begin.

Harden Lelet welcomed the Kwajalein community to the pre-

sentation. He expressed that the evening was a time for both communities to come together to interact, mingle and socialize. Three groups came from Ebeye to perform that evening. All the groups were there under the guidance and permission of Senator/Iroj Mike Kabua. Also attending were Irojlaplap Imata Kabua, Senator Tony deBrum, Senator Jeban Riklon and Senator Frederick Muller and his wife.

The first group that performed was the Kabinmeto Ladies or 'Ladies From the Bottom of the Ocean.' They were from the western atoll. The 10 ladies, dressed in bright orange with red flowers and beautiful wuts, got the crowd moving with their dancing. They clapped coconuts together to the

beat of the music, played by Eddie Enos. As they entered the stage, they formed a line across the front and moved in harmony together with the music.

The second group was a singing and dancing group from an Ebeye church. The women were dressed in beautiful green palm leaf print dresses and the men wore matching shirts. About 40 men and women made their way to the stage, dancing in unison. After they danced, they treated the crowd to a few lovely songs.

The last performance of the evening was the Jobwa Stick Dance group. Lelet introduced Senator deBrum, who explained the history of the dance to the Kwajalein community (*see story on page 5*).

"Many people in the Marshalls

The Kabinmeto Ladies, or 'Ladies From the Bottom of the Ocean,' are accompanied by the Jobwa Stick Dancers at their performance for the Kwajalein community at the Richardson Theater Aug. 29.

live and die without seeing what you are about to see," deBrum said. "A dance that is spiritual, that is from the Netherworld. It is secret. It is performed only with the permission of Senator/Iroij Mike Kabua. He has given permission for the dance to be performed tonight in honor of this relationship, in honor of the 'getting to know you' spirit that this evening presents for us. It is also performed to welcome our new Colonel."

deBrum further explained that the Jobwa dance has been performed in the outside world. They have travelled as far as Japan, Australia, Los Angeles and most

recently to Shanghai, China. The drums that are used during the dance were traditionally made from shark skin and only used in preparation for war. The dancers were clothed in the traditional dress; the women are covered from neck to toe by the strands of the hibiscus bark and pandanus weaving. The sticks were made out of iron wood, a hard wood of the Marshalls. deBrum said sometimes a dancer has been known to break a bone when the stick does not land in the position called for by the chant. The dance was approximately 30 minutes in length and it consisted of several complicated movements, each de-

picting different events in the life of the outer island villages of the Marshall Islands; that included the launching of a canoe, fishing, the completion of a house and the ceremonies before and after war.

"Enjoy this gift of the Jobwa as a token of our leader's respect for you and as a way of promoting close and friendly relations between the community of Kwajalein and the people of the Marshalls living in the atoll. Kommol tata," deBrum said.

Before the dance began, COL Jo-

See JOBWA, Page 11

## JOBWA STICK DANCE

It is said that it got its beginnings in Ujae Atoll when a man went on a fast, sleeping for months with no food and no water. While he was asleep he dreamt of the Underworld people that the Marshallese believe exist called 'nonieap.' He dreamt that they were dancing with sticks or spears. In his dream, he saw a man from the Underworld called Dri ikjiet. He was different from the other nonieap in the dream. He happened to be very handsome and well-built and attracted the gazes, attention and longing of the lady folks present at the dance. They were so intrigued by this stranger that they paid no attention to the others in the dance causing severe jealousy and Dri ikjiet ended up getting killed by the end of the evening. All of this was in his dream. The story is that when he woke up, he remembered every move of the dance and every single line and every single word of the chant that to this day, not very many of us understand.

# Access control personnel learn to detect fraudulent travel documents

By Sheila Bigelow  
Managing Editor

Security is always an important element on Kwajalein and all parties do their part to make sure we stay as safe as possible while living here. This week, another step was taken to ensure that this installation remains as secure as possible.

Edward Bayron is the U.S. Customs and Border Protection Assistant Attaché at the U.S. Embassy, Tokyo, Japan. He travelled to Kwajalein on Aug. 28 to conduct training classes that taught our access control personnel how to detect fraudulent travel documents. Bayron coordinated with Continental airlines, MAJ Wesley Huff and the U.S. Embassy in Majuro. He provided three training sessions. Those that participated were Continental personnel, Republic of the Marshall Islands customs, RMI police and Kwajalein Police Department, specifically those that work at Entry and Exit and the Dock Security Checkpoint.

The main audience for this type of training is airline personnel; however, while CBP liaisons are in a country training the airlines, they will also assist any allied embassies that request training, including host countries and military police. "Anybody that has a nexus to the border, we are willing to train," Bayron explained. They then adjust the training according to their audience.

**Kwajalein Police Department Lt. Chris Ramsey carefully inspects a passport with a magnifying loop during the Carrier Liaison Program training held Monday.**

*Photos courtesy of MAJ Wesley Huff*

**Kwajalein airport personnel practice examining passports at the Carrier Liaison Program training on Tuesday morning.**

The training itself is not required but it is highly recommended, especially to airlines. If an airline boards a passenger with inappropriate travel documents, they can be heavily fined. It is in their best interest to have their employees go through the program and learn to tell the difference between legitimate or altered travel documents and imposters to genuine documents.

Airlines pay a user fee per person to be processed at the border; five percent of that must go to training and liaison to the airlines. So CBP prints out a Carrier Information Guide and Syllabus, travels around the world and provides the training at no cost. The CBP Carrier Information Guide is designed to serve as a reference aid for travel industry personnel. It outlines the various documentary requirements that apply to persons entering or departing the U.S. Regional Carrier Liaison Groups have been created by CBP to assist carriers with questions regarding U.S., entry related matters, with a primary focus on assisting overseas carriers to determine the authenticity of travel documents. The Carrier Liaison Program

# Eric Watnik of U.S. Embassy in Majuro visits Kwajalein, Ebeye

By Sheila Bigelow  
Managing Editor

**E**ric Watnik is the Deputy Chief of Mission for the U.S. Embassy in Majuro. He has visited Kwajalein numerous times before, most recently on Tuesday. Watnik's most recent trip was to accomplish three separate assignments.

Watnik travelled to Ebeye on Tuesday along with Edward Bayron, U.S. Customs and Border Protection, Mike Sakaio, acting Public Affairs Officer and Jelton Anjain, RMI Liaison to USAKA. The U.S. Embassy in Majuro is offering a \$3,000 grant to the Marshall Islands Council of Non-Government Organizations. They will in turn contract with Mela Langibelang, a deaf student attending Galludet University in Washington, D.C., to give American Sign Language classes on Ebeye. Langibelang was born on Ebeye. As a young child she developed hearing loss due to a high fever. She left Ebeye to attend school in the states and there learned English and ASL. She finished her education in the states and then attended Galludet University. She is getting her bachelor's degree in Elementary Education. Langibelang has already finished a 10-week long internship in Majuro this year, teaching ASL to Marshallese students. The grant Watnik presented will allow her to live and work on Ebeye and offer a four-month long class on ASL. Ebeye has 14 deaf students enrolled and currently there is no ASL training for these students, parents or teachers. The training Langibelang will offer is designed to build on the introduction to ASL that the children and their parents received over

**Deputy Chief of Mission for the U.S. Embassy in Majuro, Eric Watnik, center, visited Ebeye Tuesday to present a grant to Mela Langibelang, right. Langibelang will be offering a four-month long American Sign Language class to deaf students on Ebeye.**

the summer. Her classes will be held for two hours, three days per week. She is expecting 20-25 participants, a mix of deaf students, their parents and teachers. Langibelang is planning on teaching in both English and Marshallese, and will use flash cards to help the students understand the concepts and ideas that are being communicated using ASL. There is a hope that after Langibelang graduates from Galludet University, she might return to Ebeye and extend the program.

Watnik also came to Kwajalein to present the 'Democracy in the Marshall Islands' historical display to Chaplain Rick Funk, President of the Marshallese Cultural Society. The U.S. Embassy in Majuro paid to produce this display through a group called Mission Pacific. It will be uti-

lized for educational purposes here on Kwajalein. The intent is to teach the Kwajalein school children more history about their host country. There will be an official opening of the display in the near future.

Watnik also came to Kwajalein to show embassy support to Edward Bayron while he was here on Kwajalein conducting classes on detecting fraudulent travel documents (*see article on page 6*). Watnik wanted to assure those taking the classes that the material is a priority to the Embassy and if they were ever unable to contact Bayron with questions about passport fraud, they could certainly contact him at the U.S. Embassy in Majuro. Watnik departed on Wednesday, flying back to Majuro with Bayron to assist him with the continued training that will be offered there.

# NEW TEACHERS

Where are you from? *Lawrence, Kansas*

What college/university did you attend? *I attended the University of Kansas for my undergrad and Emporia State University for my grad degree.*

What degree(s) do you hold? *B.A. Sociology, M.L.S.*

How long have you been teaching? *This is my second year teaching/being a librarian.*

What will you be teaching at Kwajalein High School? *K-12 library, high school yearbook.*

How did you hear about Kwajalein and why did you decide to come here? *I heard about Kwaj through the University of Northern Iowa's overseas teacher recruitment fair. This is as close to the equator as I could get!*

How do you like Kwajalein so far? *I'm loving it here, besides the rain.*

**Laura Callaway**

What are some of your hobbies? *I like to read (obviously), play volleyball, SCUBA dive and fry random food.*

Where are you from? *Nisswa, Minnesota*

What college/university did you attend? *St. Olaf College*

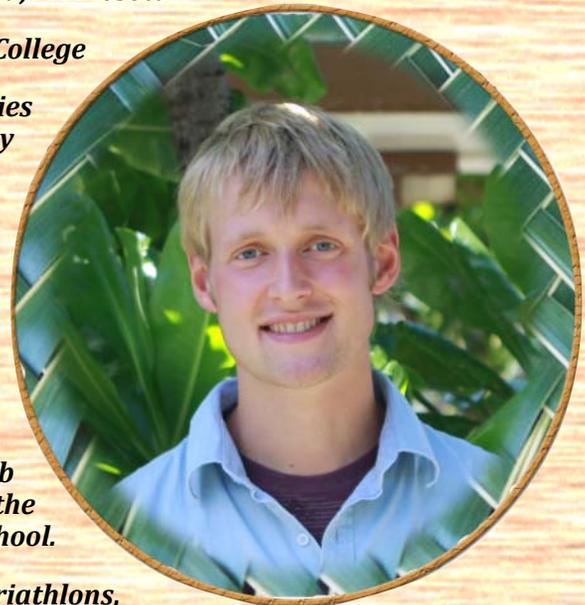

What degree(s) do you hold? *Dual major in Social Studies Education and History*

How long have you been teaching? *I have been teaching in a formal setting for about one year, as well as numerous summer education programs for the past couple years.*

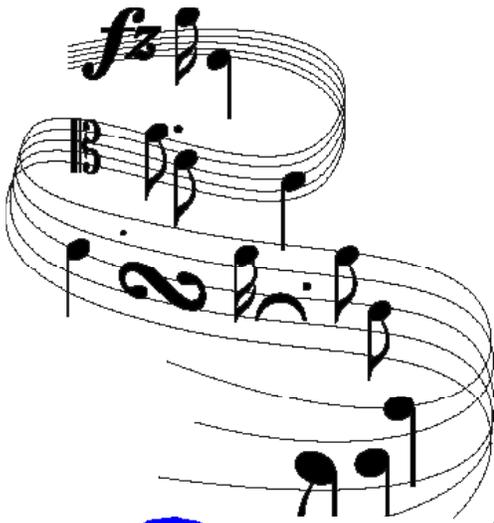

What will you be teaching at Kwajalein High School? *I will be teaching 10th grade U.S. history, 9th grade world history, and 7th grade geography.*

How did you hear about Kwajalein and why did you decide to come here? *I learned about Kwaj studying for the Iowa Job Fair. What drew me to it was the community life, the ocean, the weather and the strong emphasis on academics at the school.*

What are some of your hobbies? *My hobbies include triathlons, fishing, bass guitar(ing), water sports and teaching.*

**Matt Groen**

# *Kwajalein Community Band begins rehearsals*

*Adult musical group enters twenty-fourth concert season*

## **Hourglass Reports**

The Kwajalein Community Band will begin rehearsals for the 2010-2011 concert season from 7:30-8:45 p.m., Sept. 14, in the high school music room. They will rehearse weekly, on Tuesdays, September through May. The ensemble is primarily an adult organization, supplemented by select members of the high school band program as necessary to balance the instrumentation. Adult band members are welcome and needed in all sections, especially flute, clarinet and horn. The band, now

in its twenty-fourth season, will perform a program of Christmas carols in December and concerts in February and May. A limited number of school-owned instruments are available for loan to the band members. Band members may also obtain instruments from a representative of Best Musical Instrument Company, who will be meeting student musicians at 7 p.m., Sept. 8-9, in the elementary music room. For more information, contact the director, Dick Shields, home phone 51684, or at the high school 52011, or [rshields@kwajalein-school.com](mailto:rshields@kwajalein-school.com).

Glenn Hibberts, left, is the winner of Burger King's 'Go Large' contest. John Hutchins, Burger King Manager, COL Joseph Gaines, USAKA Commander and Joe Moscone, Deputy Mission Commander, presented Hibberts with his \$500 AAFES gift card prize. The contest ran from July 22 until Aug. 31. Participants simply had to 'Go Large' on their value meals, then place their receipt, name and number in a bin. Burger King will be running another contest next month and the prize will be a Sun bicycle.

## TRAINING from Page 6

enhances security by increasing carrier effectiveness in identifying improperly documented passengers destined to the U.S. This is a government-funded training for carriers. Any carrier that brings passengers into the U.S. can request training. Training can be requested at any time, simply by sending an E-mail to the Carrier Liaison Program address or calling their number in Washington, D.C. Carriers are not limited to airlines; cruise ships and passenger ferries qualify as well.

Training is broken down into separate segments. The first segment concentrates on overall passenger assessment. This includes looking at the passenger, their story and the document. Carriers use all three to determine if they should board someone into the U.S.

The second segment takes a look at imposters with valid travel documents. This has become a trend lately because travel documents have become increasingly more difficult to recreate, which means they are more expensive. It is now preferred to steal or purchase a legitimate passport and try to find someone who looks like the photo. Carriers concentrate on detecting imposters with valid documents. They are taught to first compare the photograph to the subject's face, identify principle facial features, divide the face into six segments (eyes, nose, mouth and lips, ears, chin or mouth area and facial

*Photos courtesy of MAJ Wesley Huff*

**Access Control personnel from Kwajalein Police Department and Ebeye Police Department train to recognize fraudulent travel documents in Eric Bayron's class Monday morning.**

marks) and view each segment as an individual piece.

The third segment is hands-on. Everyone in training gets an example passport, a ten times magnifying loop and a blue light. By utilizing the loop, you can see micro line printing in the passport. Bayron taught the class how to detect altered or amended passports. There are only a handful of companies in the world that produce passports and they have high standards they

must meet for international travel documents.

The essence of Bayron's class was not how to tell what a fake Japanese passport looks like, or what a fake German passport looks like; he teaches carriers to examine any passport in the same manner, every time, regardless of country. He teaches general security features rather than specific ones for each country's passport.

"Part of my responsibility is to assess and make recommendations," Bayron said. When dealing with an airline, Bayron will make recommendations directly; however, when training with host governments, recommendations are coordinated through the embassy.

Bayron has been involved with this program since 1998. He has been stationed in Guam and currently in Tokyo, Japan. He has visited and conducted training in countries such as Australia, Thailand and South Africa, isolated locations such as Albania, and countries closer to our neck of the woods such as Palau and the Federated States of Micronesia. Bayron departed Kwajalein on Wednesday and headed to Majuro to commence training there.

**Edward Bayron gives training to Kwajalein airport personnel.**

seph Gaines joined Kabua in front of the stage and together they gave permission for the performance to begin. The dance was as exhilarating as it was promised to be. The men performed the complicated routine in precise unison. They not only danced together, but chanted together as well. They twirled the sticks and also whacked them against one another's, sometimes while ducking under fellow dancers' sticks. The dance was fast-paced and wild. Members of Community Activities helped to add an interesting element to the dance; when it started to get a little dark, they turned on the lights on the floor of the stage. The dancers cast shadows onto the movie screen, adding mystique to the dance.

When the dance ended, Gaines took the opportunity to thank all the dancers. "Thank you, Mike Kabua especially, for bringing these great dancers and this unique cultural opportunity to Kwajalein. It's something I know many of us will never forget. It's a gift we will keep in our minds for many, many years to come. To the dancers, thank you for your physical prowess, your talent and your hard work. I can tell you that I will never forget this. To the ladies and the musicians, it's hypnotic, it's very special and I thank you for performing for our community."

The Kabinmeto Ladies display their beautiful dancing talents Sunday.

*Photo by James Corder*

The Jobwa Stick Dance group share their sacred dance with the Kwajalein community.

*Photo by James Corder*

Women from the Ebeye church group can't help but smile as they dance together at the Richardson Theater Sunday.

The Jobwa Stick Dance has complicated, fast-paced moves, but the dancers kept up with no problem, even chanting along.

# KRS Ri'katak lunch program needs your continuing support

## Hourglass Reports

KRS provides lunch meals for 51 guest students from Ebeye (*Ri'katak Lunch Program*) since they do not have the opportunity to return home as the island resident students do. These meals are not provided as part of the contract, but rather they are supported by voluntary donations.

Individuals, companies, and different organizations may voluntarily contribute to the program to ensure that Ri'katak students have a nutritious meal for lunch. The box lunches include deli sandwiches, baked chicken and rice, fruit, vegetables, water and cookies. All of the lunches are prepared by Café Pa-

cific and are delivered to the schools.

The cost of each lunch for School Year 2010-2011 is \$3.25 daily per student and based on a 180-day school year; the total cost per student for the entire academic year is \$586.

Voluntary donations can be made in any amount up to and includ-

ing a full year's worth of lunches. Anyone wishing to support this worthwhile cause may send a donation to Janette Bishop in Building 702 (KRS Corporate Office/Finance/Travel). Checks should be made out to "KRS" and annotated in the remarks section to indicate "Ri'katak Lunch Program."

# Baby turtles lose their way, Kwajalein community assists them to the ocean

## Hourglass Reports

Monday night some sea turtles hatched and, unfortunately, they went in the wrong direction.

Members of the Kwajalein community, including Environmental, Safety and Health went out in search of the lost baby sea turtles. In some cases, the turtles found them first. Residents were asked to release the turtles on the oceanside beach if found.

It is believed that hatching sea turtles follow the light on ocean water. Lowering your patio lighting at night could reduce the chance that they get distracted and misdirected.

The beach there has other nesting sites that have yet to hatch so residents are asked to please reduce traffic in this area as much as possible. Please contact ES&H at 51134 with any questions and they thank you for your help!

A rescued baby sea turtle makes its way quickly to the water.

## CHILTON from Page 3

that used to be an astronaut. He did three space shuttle flights as a pilot. When he spoke to the USAKA workforce, he told them about his adventurous career with NASA.

Chilton's first mission was in 1992 on the Endeavor, named after the original explorer ship. In his first shuttle mission they rescued a satellite that did not achieve its proper orbit. They attached a booster rocket to the satellite and released it so that it became placed in its proper orbit. They did stumble upon some challenges during this mission; they thought they were only going to have to make one space walk, but as it turns out, they had to make three. During his second mission, they did an experiment with a synthetic aperture radar. They evaluated images that a synthetic aperture radar takes of the Earth as compared to basic photographic images. This was what Chilton called an "Earth Science mission." Interestingly enough, they ran out of film on that mission; they took over 1,400 photographs, and this was back when you used actual film in your cameras. In his third mission,

he travelled to the Mir Space Station. In preparation for this mission, he was one of the few astronauts that went to Star City in Moscow to train. Chilton called himself a "Cold War Warrior," so it was very interesting to him to work with Russian cosmonauts.

In a twist of fate on his visit on Roi, Chilton was introduced to Steve Golly, Altair Transmitter Manager, who coincidentally enough, has had his own work experience with NASA. Golly told Chilton that he used to be a Navy diver and on one of his missions, recovered the Apollo 10 capsule when it splashed down into the water off the coast of Hawaii. It turns out that Chilton knows those astronauts that were in that capsule. What a small world we live in.

Chilton had a great visit and enjoyed his time here on Kwajalein. At the same time, Kwajalein and Roi residents enjoyed Chilton's visit and I'm sure his kind words about our essential and vital role to STRATCOM and SMDC/ARSTRAT have helped to boost our ego a bit.

# Seventeen servicemembers die in Afghanistan

**Spc. Justin B. Shoecraft**, 28, of Elkhart, Ind., died Aug. 24 at Tarin Kowt, Afghanistan, of wounds sustained when insurgents attacked his unit using an improvised explosive device at Kakarak, Afghanistan. He was assigned to the 1st Squadron, 2nd Stryker Cavalry Regiment, Vilseck, Germany.

**Petty Officer 3rd Class James M. Swink**, 20, of Yucca Valley, Calif., died Aug. 27 while supporting combat operations in Helmand province, Afghanistan. Swink was a hospital corpsman assigned to 2nd Marine Division, II Marine Expeditionary Forces.

**Master Sgt. Daniel L. Fedder**, 34, of Pine City, Minn., died Aug. 27 while supporting combat operations in Helmand province, Afghanistan. He was assigned to the 7th Engineer Support Battalion, 1st Marine Logistics Group, I Marine Expeditionary Force, Camp Pendleton, Calif.

**Staff Sgt. James R. Ide**, 32, of Festus, Mo., died Aug. 29 at Hyderabad, Afghanistan, of wounds sustained when insurgents attacked his unit with small arms fire. He was assigned to the 230th Military Police Company, 95th Military Police Battalion, 18th Military Police Brigade, 21st Theater Sustainment Command, Sembach, Germany.

**Spc. James C. Robinson**, 27, of Lebanon, Ohio, died Aug. 28 at Paktika, Afghanistan, when insurgents attacked his unit with indirect fire. He was assigned to the 1st Battalion, 187th Infantry Regiment, 3rd Brigade Combat Team, 101st Airborne Division (Air Assault), Fort Campbell, Ky.

Two soldiers died while supporting Operation Enduring Freedom. They died of wounds suffered when insurgents attacked their vehicle with an improvised explosive device Aug. 27 in Paktiya, Afghanistan. Killed were **Pfc. Chad D. Coleman**, 20, of Moreland, Ga. and **Pvt. Adam J. Novak**, 20, of Prairie du Sac, Wis. They were assigned to the 1st Squadron, 33rd Cavalry Regiment, 3rd Brigade Combat Team, 101st Airborne Division (Air Assault), Fort Campbell, Ky.

Two soldiers died while supporting Operation Enduring Freedom. They died Aug. 29 at Nangahar, Afghanistan, of wound sustained when their military vehicle was struck by rocket propelled grenade on Aug. 28 at Nangahar, Afghanistan. Killed were **Capt. Ellery R. Wal-**

**lace**, 33, of Utah and **Pfc. Bryn T. Raver**, 20, of Harrison, Ark. Wallace was assigned to the 1st Squadron, 61st Cavalry Regiment, 4th Brigade Combat Team, 101st Airborne Division (Air Assault), Fort Campbell, Ky. Raver was assigned to 1st Brigade Special Troop Battalion, 1st Brigade Combat Team, 101st Airborne Division (Air Assault), Fort Campbell, Ky.

**Gunnery Sgt. Floyd E. C. Holley**, 36, of Casseberry, Fla., died Aug. 29 while supporting combat operations in Helmand province, Afghanistan. He was assigned to the 7th Engineer Support Battalion, 1st Marine Logistics Group, I Marine Expeditionary Force, Camp Pendleton, Calif.

# Did You Know?

- That people have been living in the Marshall Islands for over 2,000 years?
- That removing artifacts can destroy an archaeological site's integrity and result in loss of information about the past?
- That archaeological sites are found by ordinary people, not archaeologists?
- That you can help find, document, and recover information about the past on Kwajalein Atoll?

SAVE THE PAST  
FOR THE FUTURE

## Vehicle Safety Checklist for Electric Carts

*These checks are to be made with the parking brake applied:*

- Check brakes, parking brake, and brake lights.
- Check tires for damage, excessive wear, and proper inflation.
- Check headlights, turn signals, and horn.
- Check the forward and reverse switch. The reverse buzzer must sound. Return switch to neutral until ready to move.
- Check accelerator pedal to ensure that it does not stick.

## Weather courtesy of RTS Weather
