Range Operation Scheduled

A range operation is scheduled for Feb. 20. The west and south (shaded areas, top diagram) ends of the island are restricted. The lagoon and ocean shaded areas (bottom diagram) are also closed. All boats are to stay 1/2 mile away from the barge while it is in transit after leaving the barge slip ramp. Restrictions start at 4:30 a.m., Feb. 20, until the operation is complete and barricades are removed. Questions should be directed to RTS Command Safety Directorate, at 54841.

THE KWAJALEIN HOURGLASS

The Kwajalein Hourglass is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Kwajalein Atoll. Contents of *The Hourglass* are not necessarily official views of,

or endorsed by, the U.S. Government, Department of Defense, Department of the Army or USAKA. It is published Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

Two weeks ago, my husband's daily bike ride around the airfield was cut short when he and a pedestrian collided on the road around the airfield, near the weather station. The pedestrian and Mike were both taken to the hospital and treated for their injuries.

You never think it could happen to you, or to your loved one. As I sat down to write this, that phrase kept popping into my head and I hate clichés, but it's true. I never thought I would get a phone call telling me that my husband was in the hospital because he fell off his bike – and least of all, here on Kwajalein, where no one is allowed a personal vehicle. As my ever-wise mother said when I called, "You never think it will happen but how often does the probability of something equal zero, Ruthie?" Only my mother, the math whiz, could bring a life lesson back around to statistics.

Of course she's right; we can reduce the chances, but it's hard to get to zero without calculus. Well, I'm generally someone who ignores math, says "no chance" and goes about her optimistic life. Usually, this is a good thing. If I fretted over every possibility, I'd never have moved out here. However, sometimes those low probability events are preventable. When I ride in a car, I use a seat belt because of that small chance, but I will admit that I am guilty of other habits that ignore these low but still possible odds.

Immediately after this bike accident, the island was abuzz with talk about bike safety and possible reactions to this event. Without going through a laundry list, I can say I heard everything from one end to the other.

Recently, USAKA hosted a small group discussion about possible changes to the "rules of the road." In the end, the

group's consensus was that in effect, the current set of guidelines and regulations works. The problem boils down to complacency. It's easy to think that something will never happen because the odds are against it, but there are simple actions that can be taken by individuals which will reduce those odds even further.

- Cyclists should always stay to the right side of the road and use appropriate hand signals.
- Cyclists are strongly encouraged to use the airfield loop for training in a clockwise direction.
- Pedestrians, walk on the left side of the road, facing traffic.
- Both cyclists and pedestrians should make themselves visible at night or early morning by wearing reflective clothing and/or using a light.
- Wear a helmet when cycling at great speed and consider requiring your younger children to wear bike helmets. My husband's helmet was cracked through the foam in seven places, but his skull is still intact.
- For anyone on the road, be aware of your surroundings. A situation can change in a matter of one or two seconds.

Lastly, I would be remiss if I didn't give a thumbs up to the community for the outpouring of support for Crystal and Mike in recent weeks. After 10 months, I still find myself in awe of how Kwaj and Roi residents will come together in support of one of their own, and I was raised in a small town.

Ruth Miskovsky may be reached at 54932 or ruth.miskovsky@smdck.smdc.army.mil.

Col. Joseph Gaines addresses circulating rumors head-on.

Rumors can earn from one to five ears. One ear is an unfounded rumor, while a rumor earning five ears is the truth.

Rumor: KPD will be issuing citations to bicyclists for not using hand signals.

Bicyclists are always encouraged to follow the traffic regulations by using hand signals. If an unsafe act resulting from a rider not using hand signals is observed, the officer may stop and warn the individual. If an accident is reported or witnessed by an officer and the bicyclist was at fault due to not using hand signals, the bicyclists may receive a citation. The situation observed by the officer must warrant a citation; however some situations may only require a warning. The Provost Office will continue educating the community on the importance of bicycle safety through information placed on the AFN Roller.

THUMBS UP

To the Roi community services, food services, Danielle DeKiserre, Kathryn Jones, Tony Stephens, Liji Lanej, Tedrick Taidrick, Antonio Rubon, Jack Jones, Larry Lanki, Thomas Henry, Ronita Erakdrik and Carol Kobeney for providing an exceptional and amazing Valentine's Day dinner. The dinner was decadent and delicious. It was cooked wonderfully and the presentation was excellent. The decorations were romantic and well thought out. It made Valentine's Day very special.

– Karen Willman, Brianne McDonald, Misty Fischer, Will Smith, Tim Walker and Jenny Schwartz

To Richard Gaius, an AAFES employee, for notifying his management about the presence of a suspicious package outside the Shoppette. Vigilance, awareness and initiative like his will keep this community safe. Also to AAFES manager, Alex Mamaril, for notifying KFD of the suspicious item. The residents and employees that make up the Kwajalein community are the first line of defense in force protection and anti-terrorism, and Mr. Gaius is a shining example of this.

– USAKA Operations

NHS annual coffee shop grinds out a fabulous evening

Article and photos by Catherine Layton
Associate Editor

Coffee Shop, the top fundraiser for the Kwajalein Junior/Senior High School's National Honor Society, once again was an event that brought island residents a little occasion that is considered commonplace in the states, but unique and welcome here on Kwajalein.

The effort put in by AnnElise Peterson, NHS and National Junior Honor Society advisor, her students and volunteers could be seen in every detail of the multi-purpose room. A hodge-podge of seating areas, mostly borrowed from homes around Kwajalein, provided an eclectic and comfortable setting for the event. Smells of fresh-brewed coffees and scrumptious desserts wafted through the air, along with music that ranged from soothing to alternative. The atmosphere provided for both large areas for many and intimate settings for a few to socialize and indulge in gourmet coffees, sodas and decadent desserts.

There are 17 students currently in the NHS/NJHS, and all participate in Coffee Shop. To be a member of the NHS (10th to 12th grade) and NJHS (8th and 9th grade), students are selected based on their scholarship, leadership, service and character. Peterson described the process to be inducted to the elite society, saying, "Each student who has maintained a 3.0 grade point average has the opportunity to fill out an application form documenting leadership and service hours, community involvement, work history and awards received. A five-member faculty council reviews each application and selects those students they believe uphold

the standards of NHS or NJHS."

Inductions are held every fall. Each year the group must complete a group project which was how Coffee Shop was formed 14 years ago.

For the event, duties assigned varied from furniture pickup, cashiers, cleanup, child care, and of course, drink makers. Furniture was picked up, brought to and delivered back with the help of Scott Phillips, who drove the kids around. Drinks included sodas, hot and cold flavored lattes, tea, frappuccinos and even non-alcoholic strawberry daiquiris. Desserts, all made by NHS families, included cakes, pies, brownies, cookies, and various breads and muffins. The annual coffee shop event is the largest fundraiser for the NHS, and this year made approximately \$1,200. The funds raised go to Ebeye primarily, and to other outer islands, for school supplies.

Justin Ferguson, front, and Dan Valles act as barristas, brewing fresh ground coffee for delectable frappuccino.

Jennifer Cossey, Jane and David Seelye share a loveseat and a laugh during the evening.

Sabrina Mumma, left, and Jane Woundy enjoy the drinks and comfortable atmosphere provided at the NHS coffee shop.

Sweethearts run annual holiday relay

By Bob Sholar

Kwajalein Running Club President

The team of Ben Bartyzel, Kevin “Doc” Skinner, Linn Ezell and Jack Carey were comfortably the net winners on Feb. 14 at Kwajalein Running Club’s 34th annual Sweetheart 4x1-mile relay foot race. This race uses an age and gender-based handicapping system, along with an appropriately staggered start to add excitement; it turns into a big chase! With an average age of over 60 years and appropriate handicaps, the aptly named “Silver Bullets” team chased down the lead-off elementary school-aged teams, but were too fast for the high school and 20s-ish adult teams to catch.

Silver Bullet member “Doc” Skinner helped his team by achieving the low handicap net mile for the day at 4 minutes, 13 seconds. The Silver Bullet senior and anchor, Jack Carey, was not far behind at 4:30. For the ladies, Song Banducci had the net low mile at 4:31.

Twenty-one teams participated with all sorts of age and gender mixes. For the gross mile, the lows were Dane Bishop in 5:33 and Krystal Peterson in 6:16. With participant ages ranging from 4 years old to 69, it is lengthy to recognize all age group achievements. The youngest miler this year was Ava Moore, who is only 4 years old. Everyone is a winner in this exercise. The all high school boys team of Austin Skinner, Jake Jahnke, Shawn Brady and Dane Bishop, aptly named

Photo courtesy of Alex McGlenn

Race competitors line up for the staggered start to the relay. The start not only made for a more exciting race, but evened teams’ abilities based on variables ranging from age to gender.

‘No Handicap,’ started last, having to wait 12 minutes and 51 seconds from the time the highest handicap team started. The chase was on and the boys averaged less than 6 minutes per mile while moving all the way up to third place. Jahnke’s gross mile was 5:36, not far off from Bishop’s.

KRC thanks Kaya Landers and Peterson for encouraging members of their physical fitness classes to participate in this event. Humorous team names are traditional and this year, one was named “Kaya’s Konscripts.”

Thanks to AnnElise Peterson, Henry McElreath and Jayne Cavender for smoothly running the start and finish line operations.

Japanese visit Kwaj to honor fallen family from WWII

Article and photos by Sheila Bigelow
Managing Editor

As a way to honor and remember their family members who perished at Kwajalein and Roi-Namur during World War II, a group of 17 Japanese family members visited the islands this week to pay respects to their loved ones.

The group travelled to Roi on Tuesday and held a ceremony at the Japanese cemetery on-island. On Wednesday, they visited the cemetery on Kwajalein. Each family member had the opportunity to place gifts of food, beverages, photos, letters and incense upon the stone that honors those Japanese soldiers who fell during the battle for the Marshall Islands. Most were

members of the Japanese Navy.

After reading aloud their letters, each family member presented a flower and incense at the stone. The ceremony ended with a song.

The group departed Wednesday evening.

A man bows and prays after placing a flower upon the stone in remembrance of loved ones.

A woman adds the letter she read to her father to the other offerings.

Proudly Serving

Former Kwajalein resident Ross Butz is serving in the U.S. Army with the 1st ID, 3rd Brigade Light Infantry, 1st Battalion 26th Infantry Regiment, stationed out of Fort Knox, Ky. He is currently serving in Afghanistan. Butz graduated from Kwajalein Jr/Sr High School in 2009. His father, Bob, still resides on Kwajalein.

Do you have a family member who is proudly serving? Send in a photo and their information to be featured in the Hourglass.

February is Children's Dental Health Month

What can parents do to help children have healthy teeth?

By Judy Shimamoto
Dental Hygienist

The First Years

Wipe your infant's gums with a damp washcloth or gauze pad after feeding to remove plaque and food residue. Parents should clean their infant's teeth as soon as they come in with a soft cloth or baby toothbrush.

Baby bottle tooth decay occurs when a child falls asleep with a bottle of milk, formula, juice or other sweet liquid in their mouth. The sugars are left on the teeth and the bacteria in the mouth use them to produce acids which cause decay.

Toddler Teeth

Brush – At age two or three you can begin to teach your child proper brushing techniques, but monitor this until age seven or eight when the child has the dexterity to do it alone.

Floss – Often there are natural spaces between the primary teeth. You need to floss if the teeth touch; this may occur in molar areas. You should floss your child's teeth until they can tie their shoelaces. Continue to monitor their technique and consistency.

Older Children and Oral Health

Sealants – When a child's permanent molars come in (usually around age six and age 12), parents should consider having sealants applied. Sealants are thin protective plastic coatings placed on the chewing surfaces of

back teeth to reduce decay on that surface.

Braces – If a child has braces, their oral hygiene is especially important to maintain the health of both teeth and gums. Your child may need to see the dental hygienist more often in order to monitor the health of the child's gums and teeth.

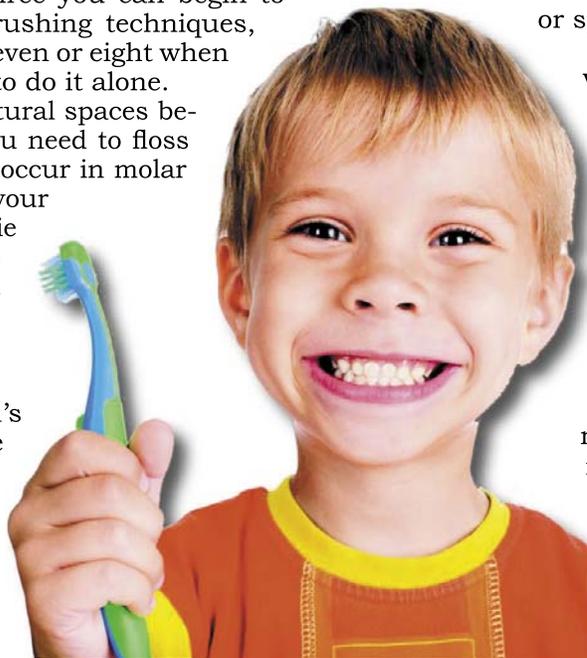

Mouth guards should be worn for all contact sports, especially sports that involve a ball or any extreme sports like skateboarding or rollerblading.

Smile Savers

- Change your child's toothbrush three to four times a year and after every illness.
- Always encourage good eating habits.
- Limit the amount of sugar your child eats.
- Avoid or limit sugary drinks like soda pop or sports drinks.
- Make sure children drink plenty of water.
- Children should have regular dental checkups to maintain their oral health.
- If they chew gum, make sure it's sugarless or contains Xylitol or Recaldent.

Kwajalein's dentist recommends that a child's first visit be a "happy visit" at about 18 months. At this visit, the child becomes familiar with the dental clinic environment and may sit on mom or dad's lap for a ride in the chair.

Of course, if a parent notices something wrong or has any questions about their child's teeth, they should call the Kwajalein dental clinic for an appointment at 52165.

Lighting up the skies

Recent thunderstorm rattles island residents

By Nick Zachar

Meteorologist, RTS Weather Station

An intense thunderstorm on Jan. 30 produced a noteworthy display of lightning bolts and audible thunder during the afternoon hours. The sheer number of close lightning strikes caused schools to delay release times, postponed outdoor activities and made quite a few residents nervous. In total, well over 100 strikes within 20 nautical miles of Kwajalein Island were recorded during a 2-hour time frame.

While thunderstorms across Kwajalein Atoll seem to be rare phenomena, climatological averages suggest otherwise. In an average year, Kwajalein sees around ten thunderstorm days, meaning thunder has been heard at the weather station in addition to lightning observed. Kwajalein experienced an above-average year for thunderstorms in 2010, with a total of 14 thunderstorm days.

Lightning strikes are most prevalent in the month of October, when an average of 1,300 are recorded on the weather station's lightning detection sensors, which can detect strikes over 100 miles away. The month of February sees the lowest amount of lightning. January is a close second with 135 strikes each year, averaged over the last decade. The last time a thunderstorm was observed in January at Kwajalein was 11 years ago.

Normal dry season conditions inhibit the formation of deep convection and thunderstorms. But this has not been typical dry season weather. Strong surface wind convergence can generate shower activity any time of the year; when shower activity is combined with strong winds, the potential for long-lived thunderstorms increases.

What made this lightning event unusual was the high number and close proximity of cloud-to-ground strikes. On average, only 25 percent of lightning is cloud-to-ground, with much of the remaining lightning being in-cloud. However, lightning will strike the earth any time there is sufficient charge differential between the cloud and terrain.

In addition to the large number of lightning strikes, thunder was also frequently heard by island residents. In the case of this thunderstorm, it was common for two or even three cloud-to-ground strikes to occur in short succession, sometimes thousands of yards apart. The sharp initial crack of thunder is caused by close strikes, while the rolling rumble of thunder is caused by the time delay of sound coming from different parts of a long strike. The longer the lightning channels, the longer the rumble of thunder.

In normal atmospheric conditions, thunder is seldom heard further than 10 miles from an observer. Due to the flat terrain of the Marshall Islands, a person can often see lightning flashes along the horizon but remain far beyond the 10 mile limit for hearing thunder. Another reason thunderstorms may not appear to have thunder is most lightning strikes remain within the thundercloud. Thunder from in-cloud lightning

tends to get diffused within the storm cloud, making it difficult to hear.

An observer can approximate the distance to a lightning strike by timing the interval between the visible lightning and the audible thunder. In general, every second which passes between flash and sound equals about 1,000 feet. For example, a lag time of five seconds indicates the lightning strike was about 1 mile away.

While a few lightning strikes on land were verified, a good portion did strike adjacent waters. This does not diminish a potential threat for boaters and beachgoers, as electricity from lightning has been known to kill people on and within surrounding water over thirty yards away from the initial strike. This occurs because salt water is a good conductor; so, when lightning hits the water, it spreads along the surface of the ocean. In addition, an electrical charge can reach 10-20 feet in depth from the impact site, and can certainly kill or injure any living creature unlucky enough to be within that zone. This includes scuba divers.

Lightning is a very real danger for residents of Kwajalein Atoll. Individual bolts can travel ten miles through the air, so if a resident is close enough to hear thunder, they are close enough to be struck. Studies indicate the most dangerous place to be during a thunderstorm is an open field, followed closely by the open ocean. Kwajalein Atoll consists primarily of these two locales, so every lightning warning should be taken seriously. During a thunderstorm, stay indoors and off the open ocean until the warning has been lifted. After all, when living on such a flat island, a person may often be the tallest object around.

Hepler, Harris participate in world swimming championships in Dubai

Article and photo by Amy LaCost
MISF Assistant Swim Coach

Ann-Marie Hepler and Giordan Harris, along with coach Amy LaCost traveled from Kwajalein to Dubai, United Arab Emirates, Dec. 10, 2010, to participate in the 10th Fédération Internationale de Natation (FINA) World Swimming Championships (25M) short-course competition. Harris, 17, an Ebeye resident and Hepler, 14, a Kwajalein resident, represented the Marshall Islands Swim Federation at this prestigious event. There were a total of 141 countries that sent approximately 800 swimmers to this competition. Both Harris and Hepler competed in seven events each; 50-meter freestyle, 50-meter butterfly, 50-meter breaststroke, 50-meter backstroke, 100-meter freestyle, 100-meter butterfly and 100-meter individual medley.

The competition was tough but the swimmers performed well for their ages. The best of the best of global swimming talent was represented at the five-day swimming event, including world record holders Ryan Lochte and Scott Clary from the U.S. and Felicity Galvez from Australia.

Both Harris and Hepler have swam competitively their whole lives and are members of the Kwajalein Swim Team. They dedicate a fair amount of their time to training for and participating in both local and international swimming competitions. They are also both Marshallese, which makes them eligible

to represent the Marshall Islands in international swimming competition events like the World Championships, the Oceania Championships, the South Pacific Games and the Olympics.

Just getting to Dubai from the Marshall Islands was a challenge and took over three days traveling through four different airports. Once in Dubai, the FINA organization, along with the host country, held the swim meet at the new, climate-controlled Hamdan bin Mohammed bin Rashid Sports Complex, a 10-lane competition pool world-class swimming venue. Everything was brand new. The Complex was created to hold this competition and had just been completed. There was the competition pool, but also a separate warm-up pool and diving well, as well as two separate practice pools. These pools could have their bottoms changed for different depths and could be lengthened to long-course lengths with the touch of a button. In addition, when the swimming meet was over, a gym floor could be laid out over the pool and sports such as basketball and volleyball could be played in the complex.

The competition took place over a five-day period. The preliminary events were held each morning. Somewhere between 60 and 130 swimmers swam in their chosen events. The top 16 qualifying swimmers came back to the pool in the evenings to swim the semi-finals. Of those swimmers, the fastest eight times then swam again to try to win a gold, silver or bronze medal in that event. There were a total of

24 individual events swimmers could participate in with various strokes and distances. For those countries that brought at least four women or four men, five different relay events were available.

This is the first world championship Hepler has attended, and the second for Harris. It was a great learning experience for the swimmers as well as the MISF to show how the FINA world swimming organization works. The team now has the experience needed for the RMI to be well-represented at future championship meets, including the next world swimming championships in Shanghai, China, during summer 2011, as well as the 2012 Olympics in London.

Giordan Harris, left, and Ann-Marie Hepler represent the Marshall Islands Swim Federation in the FINA world swimming championships short-course competition in Dubai, December 2010. Harris and Hepler were the only representatives from the Marshall Islands to compete.

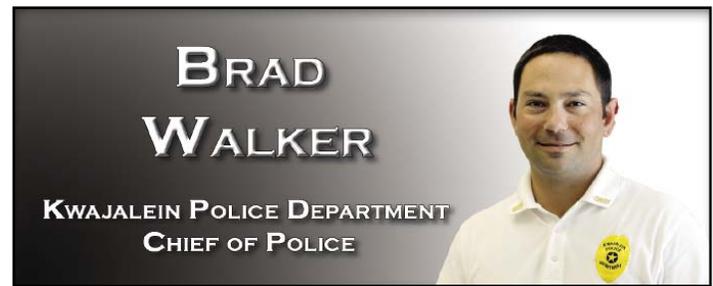

Anti-terrorism, force protection, crime prevention important on Kwajalein, Roi

Army Regulation 525-13 specifies measures to combat terrorism and advance force protection. Among these measures are conditions in which abandoned or unattended items pose a security risk to the force. Abandoned items left in areas where people gather, mission essential vulnerable areas, high-risk targets or other areas where a heightened sense of security is required, poses an increased risk.

In an effort to inform and dispel rumors regarding abandoned or suspicious items as it applies to this notice, Kwajalein Police Department would like to describe the efforts taken to secure the USAKA/RTS force.

If an officer observes, or is informed of, an abandoned item, he or she will make a reasonable attempt to locate the owner. If the owner is identified, he or she will be cited or warned accordingly. However, if the owner is not located or the officer cannot reasonably determine the item does not pose a security risk, the classification of the item changes from abandoned to suspicious.

Upon classification of a suspicious item, emergency responders take the necessary precautions to protect the force. Some may view these measures as not ap-

plicable to our location, but the alternative has the potential for grave consequences.

Rumor control: Although abandoned items have been confiscated in the past, it is not KPD policy to do so. Items left in bicycles will be treated like items secured in a personally-owned vehicle, unless the situation warrants further investigation.

KPD would like to remind the community that force protection is everyone's responsibility. Please do not leave your items unattended. This also promotes crime prevention. If you have any questions, please contact KPD Lt. Joe Lagman, at 59046, officer in charge of the central police station.

Six servicemembers die in Afghanistan

Spc. Ryan A. Gartner, 23, of Dumont, N.J., died Feb. 1 in Bagram, Afghanistan, of wounds sustained in a non-combat incident. He was assigned to the 201st Military Intelligence Battalion, Ft. Sam Houston, Joint Base San Antonio, Texas.

Cpl. Lucas T. Pyeatt, 24, of West Chester, Ohio, died Feb. 5 while conducting combat operations in Helmand province, Afghanistan. He was assigned to the 2nd Radio Battalion, II Marine Expeditionary Force Headquarters Group, II Marine Expeditionary Force, Camp Lejeune, N.C.

Lance Cpl. Aaron M. Swanson,

21, of Jamestown, N.Y., died Feb. 7 while conducting combat operations in Helmand province, Afghanistan. He was assigned to the 3rd Battalion, 25th Marine Regiment, 4th Marine Division, Marine Forces Reserve, Buffalo, N.Y.

Sgt. Patrick R. Carroll, 25, of Norwalk, Ohio, died Feb. 7 in Kandahar province, Afghanistan, of wounds sustained when insurgents attacked his unit with an improvised explosive device. He was assigned to the 319th Military Intelligence Battalion, 525th Battlefield Surveillance Brigade, XVIII Airborne Corps, Fort Bragg, N.C.

Spc. Nathan B. Carse, 32,

of Harrod, Ohio, died Feb. 8 in Kandahar province, Afghanistan, of wounds suffered when insurgents attacked his unit using an improvised explosive device. He was assigned to the 2nd Engineer Battalion, 176th Engineer Brigade, White Sands Missile Range, N.M.

Spc. Lashawn D. Evans, 24, of Columbia, S.C., died Feb. 15 in Baghdad province, Iraq, in a non-combat related incident. He was assigned to the 1st Attack Reconnaissance Battalion, 1st Aviation Regiment, Combat Aviation Brigade, 1st Infantry Division, Fort Riley, Kan.

We want photos of YOU! Submit your best photos for the community photo page. Send us photos of your day at the beach, BBQ, water sports, birthday parties, hobbies, arts and crafts, holidays, and just every day fun. E-mail all submissions to hourglass@smdck.smdc.army.mil. Candid photos (not posed) are preferred. Photos must be recent and of residents that still live on-island. Publication of photos is editor's discretion. Questions, call 52114.

KRS and CMSI Job Listings for On-Island Positions will be available at the Kwajalein, Roi-Namur and Ebeye Dock Security Check Point bulletin boards, the bulletin board by the Continental Travel Office, the Roi-Namur Terminal/Post Office bulletin board and at Human Resources in Building 700. Job Listings for Contract Positions will be available at www.krsjv.com, on the bulletin board by the Continental Travel Office and on the Roi-Namur Terminal/Post Office bulletin board. Full job descriptions and requirements for Contract openings are located online at www.krsjv.com.

KRS employment applications are continually accepted for Casual Positions in the Community Services Departments, Medical Department and the HR Temp Pool. Some of the Casual positions are: Recreation Aides, Medical Office, Media Services Specialist, Substitute Teacher, and HR Temp Pool Office Support. Questions? Call 54916.
