

Delivering

Nearly 200 volunteers bring gifts to Ebeye kids

smiles

By KW Hillis
Feature Writer

The saying that Christmas only comes once a year is not always true. For almost 4,000 children on Ebeye Monday, Christmas came again in the shape of 176 volunteers in Christmas-red shirts, shoeboxes stuffed full of gifts and colorful gospel brochures containing stories from the Bible in Marshallese.

Around 2 p.m. in the container yard near Ebeye's dock, young and old, American and Marshallese volunteers manned six huge red and white tents piled high with

large cardboard boxes stamped with the words, "Samaritan's Purse." They awaited the onslaught of children following a formal Operation Christmas Child program in the open area by the dock an hour earlier.

It took a lot of work to get to this point.

Divided into crews including setup, tent or distribution, exit, entrance and even help with small children, groups arrived on island as early as 7:30 a.m. and started preparing for the afternoon event. The setup crew arrived first to pitch the tents donated by Community Activities, sort the large cardboard

boxes by age groups, deliver them to the proper tent and set up orange plastic barrier fences.

Although the work was hot and dirty, setup crewmember Doug Hepler said he would do it again in a minute.

"The look on the little kids faces was payment enough for all the work," Hepler said.

Throughout the morning, event co-chairman Kathy Dorr, jokingly called "General Kathy" by USAKA commander Col. Curtis L. Wrenn Jr., directed the volunteers as more groups,

including the Protestant Children's Choir and the Protestant and Catholic

youth, arrived to help set up drinking water.

"We could not have done it without those teenagers from Calvary High School, Seventh Day Adventist School and Ebeye's drug awareness Youth-to-Youth program," said Dorr, explaining that the bilingual students helped the children get the proper ticket for their age as they came

Corpsman Matt Hanks sifts through dirt Wednesday afternoon looking for the remains of U.S. service members believed to have been beheaded by the Japanese during World War II.

CILHI excavation gains momentum, recruits volunteers to help dig

By Peter Rejcek
Associate Editor

Dust and dirt are flying. Electric jackhammers pierce the early morning quiet. The equatorial sun, not long past the eastern horizon, is already hot.

On this scene the search intensifies for the nine Makin Marines and other service members believed executed on Kwajalein some 60 years ago. With the real work of sifting through the 1944 layer of dirt only a few days old, the recovery team from the U.S. Army Central Identification Laboratory in Hawaii still has a long road ahead.

"It's going real well. It's always slow at the beginning," said Greg Fox, CILHI archaeologist and team recovery leader.

"It's a little harder than we thought," he added, of the layer that team members are extracting in 16-square-

A selfless American: SEEOP event to honor King

By Sgt. 1st Class Donell Jones

Looking back in American history, we will uncover many "great Americans." There have been those credited with significant medical, revolutionary economic and far-reaching political contributions. Only a very few are credited with monumental contributions of character in the face of overwhelming opposition.

Most of our heroes, American or otherwise, were directly faced with a horrifying situation and rose to the occasion, almost in a self-defense-like manner. Immediately, George Washington comes to mind. The British were coming so he mustered an army and conquered. President John F. Kennedy comes to mind. When you have missiles aimed at you, you must respond. The list of American heroes is long and distinguished but suffice it to say that Dr. Martin Luther King Jr. stands out — not because of his color... because of his heart.

King was an educated and talented man who probably could have lived a long, productive life preaching and teaching. But instead of shielding himself within the comforts of his affluence, he consciously sought out injustice wherever it manifested itself. He did not seek injustices that affected him personally. He did not seek injustices that affected black Americans. He fought and died for equal rights

for all Americans. King stood on a principle that "injustice anywhere is a threat to justice everywhere."

Why did King fight for the rights of all Americans? I won't profess to be the expert but allow me to speculate. Perhaps he realized sooner than anyone else in America that "a house divided cannot stand." Perhaps he realized sooner than anyone else that there is strength in unifying our differences so as to cover any obstacle. Or

perhaps, he just had a generous, understanding and loving heart. Whatever the reason, he gave his all to all America. He truly was a selfless American.

I hope you can join our American and Marshallese community when we celebrate the 73rd anniversary of King's birth. Monday afternoon, the USAKA Special Emphasis Equal Opportunity, or SEEOP, committee will sponsor a Dr. King Unity March (walk/run/skate) starting at 5 p.m. at the high school athletic field, and finishing at the Island Chapel. At 5:45 p.m., Johnny Gardner, a Kwajalein resident, will speak at the chapel. Refreshments will be provided afterwards.

In closing, King said, "Darkness cannot drive out darkness — only light can do that. Hate cannot drive out hate — only love can do that."

Letters to the Editor

Keep letters to less than 300 words, and keep your comments to the issues. This would be a no-libel zone. Letters must be signed. We will edit for AP style and, if you exceed the word limit, space. Please limit yourself to one letter every 30 days to give other readers a chance to write.

Send your letter to:

Buckminster and Friends — By Sabrina Mumma

Town hall comments reflect 'nothing ever changes' attitude is going away

Hello, all. It is with such excitement that I put this article together. Look at the name of this column: "Nothing ever changes? Not!" Boy, as a community, you have proven that statement correct. Did you attend the Kwajalein town hall meeting last week? I have attended every one since we arrived here more than two years ago, and talk about things changing.

Did you notice that not one of the perennial comments or complaints was submitted? Not one person mentioned needing underwear in Macy's and no one complained about the Yuk Club Fine Dining. People at the meeting actually said, "I noticed a difference," "Thank you for the efforts," and "I'm concerned about this..." instead of demanding information and slinging insults. The items discussed at the meeting revolved around issues that affect everyone on island, instead of single individuals.

And now, we have the process owners coming to you and explaining how and why things are happening, preventing the rumor mill from distributing the information. For example, 1st Sgt. Paul Balag didn't have to get up and explain post office operations. Though technologically challenged with that remote control, he made the point that we can't control everything and his department is as frustrated as you are with some of the mail issues. (He's going to make me do 100 pushups for that comment, you know.)

Paul Divinski, RSE Provisioning and Retail manager, tried to impart his attempts to fill your shelves, while acknowledging frustrations of his own. I remember when these kinds of things were addressed by the commander, "Uhh ... Mr. So-and-so, please look into that and get back to me." Then we waited three months for the next meeting to get an answer (hopefully). Things are changing. No, things

have changed.

Also, the services of the orthodontist were addressed. Col. Curtis L. Wrenn Jr., USAKA commander, asked for community input and for all to call his Hotline to provide feedback. How satisfied you are with the present service provider? Do we need to explore this? Current patients and former patients, please call 51098 and give your opinion. Plans are underway to include this in the e-mail surveys in the future, but we need information now. Your silence implies satisfaction with our provider.

The APIC Workforce Satisfaction Surveys have been compiled and tabulated. Again, survey returns were more than satisfactory. Both USAKA and Raytheon achieved higher than the 95 percent confidence level desired, and KPD came close with 90 percent. Those kinds of returns show that you still care and that you still want to make a difference within your organization. USAKA and Raytheon already have plans or initiatives in mind to address the issues they observed, and KPD is working through their results right now.

The next batch of Query-Me-Quick will be distributed soon. On the menu are service orders, self-help, individual media operations, food stores and transportation. Look for the survey in an e-mail inbox near you.

KRC event combines biking, running

By Bob Sholar
Kwajalein Running Club

Some KRC events are novelties. Some are grueling. Kwajalein Running Club's Ride-and-Park is both.

Two-person teams alternate running and biking simultaneously around the airfield loop three times, sharing a single bike. How is this done? There are bike handoff zones at either end of the runway, each zone being approximately 300 yards long. All participants start at same place and time. All proceed on a clockwise path, half on foot, teammates on bikes. Bikers travel roughly half a loop, leave bikes in

handoff zones and start running. Runners find bikes and bike to the next handoff zone, and on and on for three laps. The final finisher of each team determines team time.

Ride-and-Park is Monday, Jan. 28, at 5 p.m. at the Atoll Air Terminal on 9th Street. No pre-registration, no charge, no awards, just show up by 4:45 p.m. to sign in. Bike helmets are mandatory. Participants must recruit a teammate on their own before signing in. Each participant should be prepared to run six miles and bike six miles and sign a waiver indicating fitness to do so.

Call Bob at 51815 with questions.

Pulling the plug

Kwajalein plans first power outage in four years

By Barbara Johnson
Feature Writer

For the first time in more than four years, the power plant has scheduled an islandwide six-hour power outage. Power will be off from midnight until 6 a.m. Sunday to repair a cracked and leaking cooling water discharge valve at the power plant, said Sam Dunahoe, superintendent of power generation.

"The reason we have to shut down the plant is that the leaking saltwater discharge valve ties in to a common discharge header," Dunahoe said. "The flange is leaking and could blow out.... We've got to correct it."

The shut down is mandatory to facilitate the repair, said Kevin Ehart, RSE Utilities manager. "Because it's on the main engine cooling header, all generating units are affected."

The power plant uses the saltwater from the lagoon to cool the engine generators in the same way an automobile uses a radiator, Ehart said, noting, "The radiator for the power plant is the ocean."

The valve started seeping about two weeks ago but hasn't gotten worse since then, he said.

Although no power surge is anticipated, residents should turn off all electronically sensitive equipment, such as computers, printers, stereo systems, TVs and VCRs, before the outage and not turn them back on until after power has been restored, according to both Ehart and Dunahoe.

Also, during the outage people should avoid opening refrigerators or freezers and allow the cold air to escape. FOM will have workers out to make sure the air conditioners come back on when power is restored, Ehart said.

Emergency and portable generators will be used at critical locations. Areas such as the range command center, hospital, police station, radio station, fire department, airport runway and satellite communications have standby generators that will be used, said Dan Eggers, generator shop superintendent.

Other critical systems will be covered by

portable generators where and when they are needed, Eggers said.

While it is shut down, the power plant will also undergo preventive maintenance and detailed cleaning on electrical systems that are normally energized.

About 30 Utilities employees will be working on electrical equipment around the island during the outage, with 17 of those at the plant, Ehart said.

"Restarting the power plant is fairly complex," he said. "A sequence of critically timed events must take place before power can be restored to the island."

"The shutdown has been coordinated with a lot of customers," he added. "Everybody has to be prepared so that they are not surprised by the outage."

"There's no time that it doesn't impact the island," Dunahoe said, "but we tried to schedule it when it would have the least impact."

Said Ehart, "It's better to have a planned than an unplanned outage."

Declining school enrollments force consolidation of classes

By Barbara Johnson
Feature Writer

The Kwajalein student population is getting smaller, and adjusting for declining enrollment this year and in the years to come was a major topic of discussion at Wednesday's School Advisory Council meeting.

One measure is being taken this year. Beginning with the new semester, Jan. 23, the 32 students in sixth grade will be split into two sections instead of three, said Karen Ammann, superintendent of schools.

Enrollment was below expectations at the beginning of the year for the whole elementary school, Ammann said, but since then the sixth grade lost more students, particularly in one section.

"I think it will be a wonderful thing for the kids," Ammann said. "There are a lot of benefits to it. Classroom discussions benefit from the combined classes."

The three sixth-grade teachers will still teach the same courses, Ammann explained, but all but math are taught in two sections of

16 instead of three. If a teacher doesn't have a class during a given period, then they will team teach in another class, providing instruction to groups or individuals.

"There will be more one-on-one teaching for extra help or enrichment," Ammann said.

Another change for sixth-graders in the new semester is the consolidation of the band classes into two sections. One section will be clarinets and flutes, and the other instruments will combine in the second section.

Students had to leave core classes or make a choice between band and a class, Ammann said, and now the schedule can be planned so this won't happen.

Asked about the consolidated sixth-grade band classes, instructor Dick Shields said, "We don't know what the impact will be. One group may encourage the others to rise. We're trying to get the very best balance."

Anyone who wishes to discuss these changes is encouraged to call or drop by the school, or attend a meeting tonight at 6:30 p.m. at Ivy

School.

In response to a question, Ammann said that enrollment will probably go down as much as 50 students by next year, and there will probably be two sections of each grade at the elementary level, with the possible exception of next year's first grade, which could have three. She added that they have no specific numbers for staff for next year yet.

Also at Wednesday's meeting, Ammann announced that a final decision was made to keep achievement testing yearly, instead of changing it to every other year.

Parent and staff surveys were looked at, as well as costs, Ammann said. However, President George W. Bush just signed an education bill mandating annual testing in grades three through eight, so yearly testing for all elementary grades was retained. "That closes the book," she said.

Next year's proposed calendar, drafted by a calendar committee, was distributed and is available at the school office for parents to look at and provide input,

Ammann said.

One of the biggest changes is that spring and Christmas breaks are longer and this makes the end of the year a little later, as well, moving it to June 11 in 2003.

This was driven by the desire to minimize what the district believes was a record number of students missing school this year around scheduled vacation breaks. An estimated 11 to 15 percent of students were missing right before Christmas, Ammann said.

Also, school is out the Friday before each vacation to maximize flight times, she explained.

Parent Dottie Miller said she would like to see the shorter breaks kept because many students have a harder time adjusting after a longer break. She pointed out that fewer students leave at Christmas than stay on island.

SAC chairman, Maj. Matt Reed, summed it up by saying, "Provide feedback so you can have a voice."

"Feel free to let us know what you think this month," Ammann said to the community.

Documentary team filming show for National Geographic television ...

(From page 1)

meter sections. They traded pickaxes for electric jackhammers Tuesday to move the work along.

Fox said a few small artifacts have been recovered so far — a Japanese bayonet and American pocketknife are among the more interesting finds. The team has also uncovered a scorched patch of earth that Fox believes could be anything from a bomb crater to a fighting position. That will require the team to dig through the dirt with trowels and some shovels.

"We'll excavate that by hand," he said, confident that the long-lost Marines, and possibly several air crews, are buried just below the surface. "The features show up real well. If they're there, we'll find them."

One thing the team hasn't found a lot of is unexploded ordnance. The area under excavation, across from the Japanese Cemetery, was the scene of heavy bombardment by U.S. forces during the Marshalls invasion in 1944. "There's been a lot of expended ordnance, but not much live," Fox said.

Volunteers needed

The 10-member CILHI team is also looking for something else — volunteers. A few residents pitched in over the weekend, Fox said, and more are welcome. He said those willing to volunteer should call the USAKA Public Affairs Office, 51098, and sign up for a day. The team can only accommodate up to four volunteers at a time.

Resident Ron Clark helped wield a pickaxe one day. "I'm fascinated by archaeology and World War II history," he said. "More importantly, I saw it as a way to honor the sacrifices of our World War II veterans."

Fox said the team has been overwhelmed by the support. "It's been better than any other place we've been."

National Geographic on the scene

Media attention on the dig is growing. A free-lance documentary team producing a series for National Geographic TV arrived Monday. The proposed episode, with the working title, "Execution Island," is one of an eight-part series entitled, "Riddles of the Dead," explained James Felter, producer of the episode focusing on CILHI.

Felter said he and the other two members of the National Geographic crew will be

here nearly three weeks taping the excavation and interviewing the team members, getting to know the personalities and reasons behind why they do what they do. The piece will wrap up back at the CILHI laboratory to examine the forensic science behind the recovery missions.

"We try to inspire the next generation of anthropologists and archaeologists," Felter explained.

The documentary crew also plans to shoot additional footage of the atoll while it's here, with scheduled interviews of two prominent World War II veterans who arrive Saturday in conjunction with the CILHI excavation — Makin Raider Ben Carson and World War II POW Louis Zamperini, who was incarcerated on Kwajalein for 42 days.

"They're really the co-stars [of the documentary]," said Simon Epstein, co-producer of the "Execution Island" episode. "These guys," he said, pointing to the CILHI team, taking a break in the shade of a step van, "are the stars."

The producers said the series should appear before the end of the year on National Geographic's international channel, and then should make it to its American counterpart.

The media spotlight is not unusual for CILHI, according to Ginger Couden, CILHI spokesperson, who arrived with the National Geographic TV crew. CILHI has appeared on numerous television shows and documentaries, including "USA Today," she said.

The interest generally boils down to the question of "Why?" Why do you do what you do? she explained.

"We're able to bring home service members to their families," Couden said. "That's why we're out here."

The mission is a far-reaching one, with some 78,000 American service members missing from World War II alone. In its nearly 30-year history, CILHI has recovered 1,030 service members from around the globe, from Southeast Asia to Russia to the coral-encrusted and forgotten battlefields of the Pacific.

"The number changes every day," Couden said.

In the next few weeks, the CILHI team certainly hopes to add to the tally.

Dumpster graffiti under investigation

By KW Hillis
Feature Writer

A dumpster on Redstone Avenue was the most recent target of a graffiti artist last week. A swastika and a local juvenile's name were painted on the dumpster near trailer 845 at the north end of the island, said Kevin Dykema, Kwajalein Police Department chief of police.

"It was observed on Jan. 12 by one of my patrol officers while on patrol," Dykema said.

Facilities Operations and Maintenance has since painted over the graffiti, but the incident is still under investigation, he said.

"Each incidence is investigated to the fullest extent," Dykema said. "We identified some juveniles that we think are involved and we will be interviewing them."

The case involving graffiti painted at the CRC gym and surrounding buildings is closed pending further leads, Dykema said, explaining that he doesn't think the incidents are connected.

"The only graffiti that we allow on the installation is that one section by the high school where [high school seniors] put their name on the street," Dykema said. "And that is not really graffiti."

If a culprit is found, the case is sent to USAKA Legal.

"The commander has two options, he can handle it as an administrative matter or it can go to the Juvenile Review Board," said Kent Duncan, USAKA Judge Advocate Office Legal officer.

Sanctions range from community service to an administrative bar from the island, Duncan said.

Kom ruwainene

"Kom ruwainene" is the Marshallese way to say, "Welcome."

GRACEMARIE and FRANK LABARGE arrived recently from Syracuse, N.Y.

Gracemarie is a USAKA office automation assistant, and Frank is the director of pharmacy for Raytheon.

This is the LaBarge's first tour, although they were here for a TDY for Frank in May and June 2001.

They say they are "Grateful to be able to live on this serene, tropical island."

Program more than a year in the making ...

(From page 1)

through the entrance and translated letters in the boxes for the children.

School children, wearing bright colors, obediently started to line up with their classmates and teachers in the container yard before the program. Tiny children in Head Start-program blue-and-white uniforms sat in the shade close to the Fish

Market building.

The hour-long program for the children, parents, teachers and volunteers interspersed Ebeye and Kwajalein choirs singing Christmas and religious songs with short speeches by RMI and Ebeye government officials and prayers by Ebeye and Kwajalein church leaders.

"Read the book in the shoebox," said Col. Curtis L. Wrenn Jr., USAKA commander, in a brief statement to the assembled children under the relentless sun.

Although a box full of toys and games awaited each child, Dorr reminded them that there were more gifts in the box than they realized.

"Today you will get a present that won't break or go away — Jesus is the greatest gift of all," Dorr said.

Although the large audience of children was noisy during most of the presentations, they quieted and gathered around for some portions of the program.

"They were quiet when we were singing," said 12-year-old Alyssa Reynolds, Protestant Children's Choir member and volunteer.

As soon as the official program was over, Dorr, with the help of Ebeye and Kwajalein volunteers, quickly got the huge mass of children in lines and started them through the cordoned-off area containing the tents and shoeboxes.

Sectioned off by gender, the children, each clasping a brightly colored ticket, ran around the large shipping containers to the tents. Volunteers helped each child, whether smiling and eager or shy and crying, to the proper tent with a banner matching the ticket color. They handed each child a brightly wrapped box, along with the colorful brochure full of Bible stories.

"I gave out shoeboxes. It was really good," Reynolds said.

Emerging from the tents, some children stopped and looked at the Bible stories, while others let

volunteers open the boxes for them. Most children proudly carried the box without opening it out the exit gate.

"It went well," said Clarence Johnson, exit team member. "It was well organized and the kids were happy."

Within an hour, most of the children had received their presents, Dorr said. Small groups of children kept arriving until the gates were closed at 5 p.m. The volunteers really enjoyed it, even the ones that had never been there before, she added.

"They were surprised that it was a very friendly place," Dorr said. "Volunteers were pleasantly surprised at the calmness of the kids. They were excited, but subdued."

Some of the kids weren't as subdued, said Ian West, distribution chief for 2- to 4-year-old girls.

"It was great to see them excited," West said. "They were running as fast as they could to get to the tent. They are all tough little kids out there; it was really warm."

The huge undertaking of spreading the gospel and presents to Ebeye children between ages two and 14 was at least a year in the making and required the help of people and organizations on- and off-island,

said Protestant chaplain John Dorr. Operation Christmas Child is a project of Samaritan's Purse, a nondenominational evangelical Christian organization that provides both spiritual and physical aid around the world. Along with gospel stories translated into each country's language, shoeboxes are filled by families around the world, he said.

Each shoebox is different because different people fill each one, he said, showing the contents of one shoebox for a boy, five to nine years old. Along with the gospel brochure and a letter from the Long Beach, Calif., couple who filled the box, there were crayons, soap and a washcloth, toy cars, toothpaste and toothbrush, more toys and pen and paper.

Ebeye residents were amazed at the generosity, John Dorr said. "That was the reaction when I showed this around on Ebeye. They asked me, 'How many children share a shoebox?'"

The Protestant chapel was part of the Samaritan's Purse project in years past, said volunteer Michelle Cheatham, on her way over to Ebeye on the 10:40 a.m. ferry,

packed with volunteers singing Christmas carols. The Protestant mission board wanted to distribute to Ebeye before but there were too many children, she said.

After being turned down in 2000 because the organization already had the countries selected for delivery, John Dorr applied again in early 2001.

"You have to go through an application process to demonstrate the need, arrange shipping, guarantee the security and make sure it is distributed the way they want it," he said. "This year the boxes went to 92 countries.

"[It's] predominately a Protestant chapel program, but we opened it up to anyone that wanted to participate," Dorr said. "We have folks that don't attend any congregation ... but wanted to help out — we welcomed their help"

Even the translation of the gospel stories required help from people around the world.

Romeo Alfred did the translation here, John Dorr said. Then the text went to Switzerland. They compiled it and sent it to Indonesia for printing, and then to Alberta, Canada, and then to the states for shipping.

The event went well, even in the eyes of someone who is involved in Community Activities event planning.

"I think it was great — it was fantastic," West said. "The chapel did an excellent job of putting it on. It went better than I thought it would."

Next year the chapel plans to reapply to Samaritan's Purse to distribute the gifts and gospel to another island and plans on returning volunteers to help.

"I would do it again in a minute," Hepler said.

Reynolds said she would help, too.

Operation Christmas Child is not done for this year yet, Kathy Dorr said, sitting in her living room the next day sorting a box full of handmade gifts that the Ebeye children gave as thanks, some of which will be sent back to Samaritan's Purse. "We have about 3,600 shoeboxes left. We have to come up with a plan to distribute them to another island or islands.

"Give me a day to rest and we'll start over again," she said.

Roi-Namur retains Atoll Cup, goes up 4-3 in series

By **Barbara Johnson**
Feature Writer

Roi held on to the Atoll Cup in Sunday's tournament, played this year at Kwaj, by tying the Kwajalein team 9-9.

According to tournament rules, whoever has the cup gets to keep the cup if it's a tie, said Thaddeus Cassidy, Kwajalein team captain.

The Atoll Cup is a match play tournament with three formats, Alternate Shot, Best Ball and Singles Matches, for a total of eighteen matches. For each match-up, one point is given to the winning team, or player in individual matches, and in the case of a tie, each team or player gets a half point.

Kwaj and Roi players tied all three formats. Both Alternate Shot and Best Ball results were tied 2-2, and Singles Matches had a tie at 5-5, for the total 9-9 final score.

This was the seventh annual Atoll Cup, and it alternates location between Kwaj and Roi each year. Because Roi gets credit for a win this year, the seven-year total is Roi 4 wins to Kwaj's 3.

Larry Roberts was the team captain for Roi. Fifty-two golfers competed in this year's tournament.

Atoll Cup results

Kwaj Players (pts) Roi Players (pts) Score

Alternate Shot

Hampson/Jones, J (.5)	J.R./Ng (.5)	Tie
Serra/Sablas (0)	Badayos/Orillo (1)	6-4

GMD: IFT-8 to to be more complex

(Defense Daily, Jan. 14) The next flight test in the Ground-based Midcourse Defense program will involve more sophisticated target decoys.

The plan has been to increase the complexity of the decoys throughout the course of the flight test program, one industry official said. Because the December flight test was a successful intercept, it makes sense to add more decoy complexity at this time, the official added.

However, officials declined to provide specifics on what type of decoy would be used. Air Force Lt. Gen. Ronald Kadish, director of the MDA, indicated last month that use of decoys in the test likely would be bolstered in the upcoming tests beyond the single balloon decoy that has been used to date.

However, the single balloon decoy used in tests to date is used to simulate a wide class of threats — not just a single warhead, Kadish said.

The balloon, he said, "represents classes of threat that give us enough test information for us to proceed with the development program."

Lockheed, Boeing set to lead missile defense

(Los Angeles Times, Jan. 12) Lockheed Martin Corp. and Boeing Co. are set to co-lead a new industry-wide team in the multibillion-dollar U.S. drive to build missile shields.

Asco-heads of the national team being shaped by the Pentagon, the two biggest military contractors would have key roles in meshing the dozen or so existing missile defense programs. Chicago-based Boeing would take the lead in defining the architecture of a planned multi-layered system.

Lockheed, of Bethesda, Md., would put the overlapping systems to work through integrated

battle-management and command-and-control software.

Air Force Lt. Col. Rick Lehmer, spokesman for the newly-named Missile Defense Agency in Washington, said the national team's goal was to build a command-and-control network for the different systems under development as part of Bush's layered approach to missile defense, which outlines a broad research and testing effort, with flexibility to use whichever anti-missile weapons prove most effective.

Nuclear plan revisited

(Defense Week, Jan. 14) The congressionally mandated Nuclear Posture Review — the first since 1994 — reduces the number of operational nuclear weapons.

The plan retains the Cold War triad of nuclear-equipped ICBMs, strategic bombers and submarines while adding other elements: conventional strike weapons, information operations, ballistic missile defense, and enhanced command, control, intelligence and planning, said Assistant Secretary of Defense for International Security Policy J.D. Crouch.
