Raymond Komanta, Solid Waste Management supervisor, pulls bags of glass and aluminum recyclables out of the recycling bin. Before the items can be recycled properly, food, plastic bottles and other debris needs to be removed by hand.

Trash holds hidden dangers

By KW Hillis
Associate Editor

Two bullets, an M-16 and a .270 Winchester, sat gleaming on the concrete ramp at the Solid Waste Management plant. As the fly-ridden bags of bottles, food and other residential weekend flotsam and jetsam were scooped up by a knuckle crane and deposited in the grinder on the way to the incinerator, the bullets shifted down to the pavement.

"We find one or two every so often," said Phil Malloy, Solid Waste Management manager. It could have been dangerous if they had gotten into the incinerator, but those bullets are just the tip of what is in each trash pile.

"I can show you a 40mm shell, probably left over from World War II that was found in the trash," he said. Although the shell had already been detonated, that didn't mean it was safe; so one of the workers pulled it out of the festering rubbish.

"We don't know if there still is a charge in it," he said. "A unexploded 40mm round in one of these incinera-

tors would blow. Somebody could get killed."

Although the danger from the ordinance and bullets thrown in a trash bag is obvious, there are many dangers to the Waste Management equipment and workers from common household items not disposed of the right way, Malloy said while walking past stacks of cardboard boxes and palm fronds in the recycling area the Waste Management yard on Tuesday morning.

"The cardboard is processed into compost, as long as I don't have too much contamination with the cardboard," he said.

The contamination is not just food thrown in with the cardboard.

"Last year we had the head of sledge hammer hidden in a cardboard box go through a grinding machine and cause almost \$20,000 in damage," he said. "We were out of operation for several months."

Recycling on this small island is necessary, he said. Lack of landfill space for non-combustibles and the

USAKA reg requires fee for home business

By Jim Bennett
Editor

Home businesses will face new fees on Kwajalein after new contract requirements take effect sometime before June 1.

Under the new contract awarded to Kwajalein Range Services, USAKA has transferred responsibility for administering commercial activities on-island to the contractor, and KRS assigned that function to Community Activities. But the new contract also includes requirements that approved commercial activities will be charged an operating or licensing fee. The money will be deposited to the Recreation Fund.

"We know people will have reservations about being charged an operating

Marshallese join in Operation Iraqi Freedom

By Jim Bennett
Editor

Herna Jibbwa got a welcome call Tuesday morning. Her friend, John Santos, who lives in Hungary, received an e-mail from her son, Lenson Samson, asking Santos to let his mother know he was all right.

"I worry about him and pray for him every night," Jibbwa said.

Jibbwa worries because Samson serves in the Navy aboard an aircraft carrier in the Persian Gulf, supporting Operation Iraqi Freedom.

Lenson Samson

Staffer goes up and down the extra mile for a story

Editor's Note: We sent Jim Bennett to the traditional races at Ailinglaplap Atoll last month. The following are excerpts from his diary detailing the story behind the two-part series.

Day 1

8 a.m. — I have joined the crew of the *Felix*, a 40-foot ketch bound for Ailinglaplap Atoll, in an effort to cover traditional canoe races happening there in two days. It's 115 miles away, two days of sailing, with seven or eight hours each day on the open ocean. Crew consists of Skipper Mike Herrington and Dave Baer with passengers Jina Bolean and her grandmother.

We're sailing alongside *Moonshine* and *Mate 'oa*. It's kind of like the *Nina*, *Pinta* and *Santa Maria*, but more like Mo, Larry and Curly.

We've just motored through SAR Pass and we're setting sail on a 153-degree course for Namu Atoll, our destination for the night before we head on tomorrow for Ailinglaplap.

8:05 a.m. — So that's what I had for breakfast.

8:10 a.m. — OK, I can make it back to the cockpit. Uhh, nope.

8:15 a.m. — If I just lay here on the stern for the next four days, will anyone care?

8:20 a.m. — I'm dying, but I hear David Frizzel and Shelly West singing, "You're

the Reason God Made Oklahoma." Surely, I wasn't that bad in life. Must crawl back to the cockpit.

8:45 a.m. — Made it. Whew. Herrington gave me a purple bucket — my new best friend. We're climbing 15-foot rollers, pitching left and right like a Tilt-a-Whirl and listening to country-western music. How cool is this?

10:45 a.m. — Woke up, sunburned, crawling into cabin. Just heard Gene Autrey, "Back in the Saddle Again."

Noon — I think I saw some crew go by. Oh, hi Kirsten Dunst. What are you doing out here at sea?

2 p.m. — Borrowed a sip of water. Heard someone say they saw land.

2:30 p.m. — Peeked out, saw Namu. Water's calming down. Borrowed sandwich and sip of water. Might live.

4:30 p.m. — Anchored at Namu. Saw dolphin from a distance. Got seasick medicine. Herrington is grilling burgers. Life ain't so bad.

Day 2

7:30 a.m. — Sunrise beautiful. Raised anchor. Headed southerly to Ailinglaplap.

9:30 a.m. — Losing sight of land. Big rollers. Worse than yesterday, but not seasick. Took double dose of meds. Just really sleepeeeee.....

12:30 p.m. — Dave is on the helm. Thank God. Can't keep my eyes open, hardly. Herrington is trying to make lunch in the cabin. Sitting up here in the cockpit, I've seen him fly by the cabin doorway several times. Funny stuff. Night, night...

4:30 p.m. — Land Ho. Took helm for first time on the trip since Kwaj Lagoon. Feels good.

6 p.m. — Dropping anchor in Buoj Island channel. Beautiful spot, very calm water. Off-loading Baer and our passengers.

Day 3

7:30 a.m. — Big pod of dolphins just went by in the channel. Very cool.

5:30 p.m. — Tracked down the race course and talked to a fella about *riwuit*, the model racers.

10:30 p.m. — Had dinner with International contingent of yachties — An Aussie, a Canadian, a Frenchman and his Texas

wife and a couple of folks from Alaska. Ate an incredible mahi mahi stew using Clamato juice as a base. Very spicy.

Got to talking about politics and the war sure to start in the next 24-48 hours. Met with some interesting perspectives. The Aussie and Canadian were not unsupportive of the U.S. efforts, just concerned about international opinion and the effectiveness of the U.N. The Frenchman compared the imminent bombing of Baghdad to the World War II bombing of Dresden. Oh brother.

Day 4

1:30 p.m. — Sailed out into the wind to meet approaching canoes. Finally spotted three approaching us. Herrington worked helm and sheets, circling each as I shot.

2 p.m. — How did these guys go to sea in these things? Where do they pass out when they get seasick?

Day 5

3:30 p.m. — *Riwuit* races would rock in Oklahoma, if only we had windswept lagoons. There's always Lake Tenkiller.

Day 6

7:30 a.m. — Armed with a single anti-seasick patch, I'm ready to conquer the seas.

I've been reading this week about Capt. James Cook, who explored the Pacific, and I don't feel so bad for my apparent lack of sea legs. Sailors back then spent years functionally drunk and took opium for pain. What's a little TransDerm?

10 a.m. — Headed out of Ailinglaplap Atoll. Dolphins actually jumped out of the water in our wake and near us. What's with this atoll and dolphins? I haven't seen this many dolphins since my trip to Sea World in 1982.

3 p.m. — We've bounced some big waves this afternoon, but found Namu Atoll right where it was supposed to be.

8 p.m. — Talked later with Herrington about how some guys spend their whole tours never leaving Kwajalein or taking advantage of the various opportunities, sailing and others. Can't understand that.

Day 7

6 a.m. — The stars are unreal out here. This whole trip has been great, but ready to get home.

3 p.m. — Spotted white domes of Kwajalein on the horizon — a beautiful sight, again right where it was supposed to be. How did Marshallese use those stick charts or Cook navigate from island group to island group without GPS and accurate charts? Amazing really. They must have had many large purple buckets.

Nutritionist adds healthy ingredient to food services

By KW Hillis

Associate Editor

Eating healthy is all about making the right choices, and Café Pacific diners are seeing some new healthy choices on the salad bar. Balsamic bean salad, black bean and corn salsa and, on Wednesday, an apple, oranges and banana combination suggested by one of the diners.

This is just the beginning, according to Sandy Wells, KRS Food Service nutritionist.

"[The fruit salad] is perfectly healthy, a nice choice and it has never been out there before," she said.

The breakfast, lunch and dinner menus at Café Pacific, Café Roi and Café Meck are all in the process of being revamped. Wells is using her nutritional background and training — a degree in food, nutrition and diet management; years as a hospital dietician and food service director; manager of a senior nutrition service plus a stint as a restaurant manager — to add new healthy choices and more varied recipes to the old favorites like prime rib and fried chicken on the menus.

"Today there is more of an emphasis on healthy eating," Wells said. "We're going to be keeping a lot of Kwaj favorites that are out there, like Huli huli chicken ... and Kalua pork is going to stay, but we're going to be adding in some healthy favorites. We are going to be looking at some alternatives, not necessarily substitutes, but alternatives."

Wells and Café Pacific Food Service manager Dave Nobis are both review-

"The community is going to get involved in terms of what we will put on the menu."

— Sandy Wells, nutritionist on menu changes at Cafe Pacific

ing the menus, but the community, as part of a planned Menu Review Board, will have a say in what is on the menu, she said.

"It will not be his decision or my decision. The community is going to get involved in terms of what we will put on the menu," she said.

Although the Menu Review Board and a complete menu revamp are a few months down the road, changes are already evident at Café Pacific. Examples include the new salads and new

(Photo by KW Hillis)

Jenny Holland, left, selects some spinach for her salad while KRS Food Service nutritionist Sandy Wells checks that the salad bar items are fresh and clean. In addition to overseeing nutritional choices at the dining halls, Wells also monitors sanitation.

dressings on the salad bar.

"The variety is a lot better. I love the raspberry vinaigrette," said diner Jenny Holland. "It's probably higher in fat, but it's good."

Items on many salad bars do have hidden fats and calories, so people sometimes shy away from taking anything new. Wells has a solution.

"As we are developing some of these recipes, you are going to start seeing some signs that are going to give some nutritional information," she said. "So people will be able to judge what they are eating ... We are not going to tell people what to eat. By offering these choices and by giving the people the information of what they are eating, it will help them to make better choices."

The little white card on Well's desk, for example, lists a half cup of Balsamic Bean Salad as having 110 calories, seven grams of protein, 6.5 grams of fiber and three grams of fat.

New specialty breads from the Sunrise Bakery along with the nutritional information, is slated to be available next week at Café Pacific.

"We're going to promote a different specialty roll each day," she said.

Dark rye, 20 percent whole wheat, oatmeal, onion scallion and wheat germ

and honey rolls will show up on the menu over a period of time.

All the menus from the non-retail food outlets are in review, even box lunches.

"People are tired of the same old box lunches," she said. "So there are some good changes that are coming up in the next few weeks to make those a little bit better than run of the mill sandwich, fruit and chips."

Those with health problems or wanting to lose weight should see a physician before changing their diet, Wells added.

Residents who need additional advice about healthy eating can attend a weekly program called Nutrition and Weight Management, Wells said, who spoke at one of the meetings about nutrition. The group meets Tuesday nights, 7 p.m. at the hospital. Call Marian Ruffing, 55362 for more information.

Just a little more than a month into implementing changes, Wells said that people are noticing and like the changes.

"I tell them, 'Fine, you like this, let me know what else you like and we will try to incorporate it,'" she said.

Patrons can fill out suggestion cards, talk directly to Wells at Café Pacific, e-mail or phone, 54567.

Entrepreneurs face license fee ...

(From page 1)

fee after running their businesses free of charge for many years," said Simone Smead, Community Activities manager. "However, USAKA/RTS is a military base and bases world wide charge a fee to persons conducting commercial activities. The idea behind it is that people are generating personal income using government facilities, electricity and water, all with no compensation to the government."

"It's a win-win," said LuAnne Fantasia, USAKA Public Affairs officer. "The money comes back to the people through Community Activities programs."

Specifics on the new requirements haven't yet reached the business operators the *Hourglass* contacted and none had comments.

"This is something new," said Debra Oglesby, who operates a nail service. "We'll see what happens."

Community Activities took over administrative duties Tuesday, but still has 60 days to draft a plan to implement the new procedures. Smead said discussion is still on-going to determine how the fees will be collected, whether it will come in the form a percentage taxed to each sale, or a fixed-rate based on total annual sales, or some other method.

It could involve a transaction log as all businesses will be required to issue receipts to customers and maintain such a record.

Those exempt from the fee include child care providers, patio sales and, predominantly single events such as fund-raising events by approved private organizations.

Smead and her staff are working on the new procedures, or standard practice instructions, over the next 60 days and they will let people know when they have more details.

"We will keep everyone informed," she said.

The new procedures put USAKA in

line with other military installations that routinely charge fees to commercial activities operating on the installation.

Still the same, all commercial activities will have to reapply for approval as soon as the new SPI is finalized and annually thereafter. Community Activities intends to issue licenses on an annual basis that will roll over once a year. For example, if June 1 is the rollover date, a person applying for a commercial license in May might receive approval for a month, before having to reapply for the following year. This, however, makes it possible for officials to renew existing licenses at one time every year.

The requirements also reiterate from the past regulation that no commercial activity may compete with any sales or activities by logistics contractor KRS, setting up the potential for some existing private businesses to lose their license to the new contractor's business plans.

"Some of the things that are on the list today, probably will be 'disfavored,'" Smead said. "This is a new contractor with new business ideas and some of those may be in competition with present commercial activities."

Those activities that lose their license because they are found to compete with contractor retail operations, will have 60 days to cease operations, giving them time to liquidate stock, Smead said.

The requirements carry qualification requirements too, making professionals such as accountants and instructors prove their qualifications. Those providing services that have a potential for liability — such as scuba, aerobics and swimming instructors — will have to prove their competency with some certification, carry liability insurance and/or "release, indemnify or hold harmless" the Army and KRS.

Marshallese serve in all branches ...

(From page 1)

"It's good," Jibbwa said. "I'm OK with that."

Samson grew up on Ebeye, went to the Seventh Day Adventist elementary school, and later to the Marshall Islands High School on Majuro. He also attended the University of the South Pacific on Majuro, she said. In 2000, he joined the Navy.

Meanwhile, Paul Alfred, son of residents Helbert and Leilani Alfred, serves in the Air Force and is stationed in Germany.

"I'm scared they'll send him to Iraq," she said, though he hasn't received orders at this time.

Alfred joined last year after growing up on Majuro and in Iowa and working at Kwajalein.

And they're not alone. Samson and Alfred are just two of 77 Marshallese citizens serving in the U.S. military, with 71 of them on active duty, according to a press release from the Republic of the Marshall Islands. Of those, 17 are deployed in support of Operation Iraqi Freedom and 10 more have received orders to the region.

The majority, 55, serve in the Army, with 10 others in the Air Force. The Marines list five Marshallese and Navy and Coast Guard each have three. The RMI reported one reservist, too, but didn't specify his or her branch.

"We must ensure that the service men and women, families and friends are fully aware that the government deeply appreciates their service and dedication to our country," said Foreign Minister Gerald Zackios. "The numbers can give us a better understanding as to how we can help the many families whose loved ones have been deployed to defend our freedom."

In the meantime, Jibbwa continues to man the cash register at Café Pacific and, when she can, follow the war through CNN coverage airing on the big screen TV near her work station.

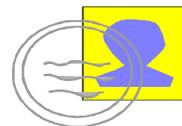

"I worry," she said.

Public can help with recycling effort ...

(From page 1)

Environmental Protection Agency requirement to incinerate has been successful over the past few years. Last year the EPA cited the department for "how innovative our recycling program is," he said.

But it takes more than good intentions by residents and a plastic trash bag to help out in the island's recycling efforts. It takes knowledge of what can and cannot be recycled.

"We have excellent cooperation from the shops and retail stores but need more help in the residential area," Malloy said, walking over to supervisor Raymond Komanta at the glass and aluminum recycling area. Some residents do know how to recycle, but many don't.

"This is an example of what we don't need," he said as Komanta pulled a big plastic bag of glass recyclables — a spaghetti sauce

bottle coated with sauce, beer bottles and a broken wine glass — out of the back of the recycle pickup truck.

Komanta stoically opened the bag and started picking through the shards of glass and around the maggots infesting the old food also in the bag. Almost every bag on the truck had maggot-infested food, plastic containers or jars still coated with food in it, all requiring additional dirty work by Komanta and other workers.

Plastic cannot be recycled here, but we do recycle glass, Malloy said. People need to just rinse any food out because if the jar breaks, flies become a problem.

"The idea with a bag of glass is that all we should have to do is empty the bag and let it fall into the glass bin," he said. "But because there is so much foreign debris in there, it suddenly puts somebody in an unsafe position."

Bags of cans with just a couple of chicken bones thrown in cannot be recycled without the food being picked

up because only cans can be sent to the recycler in Honolulu.

Over at the incinerator plant, a yellow compactor trash truck backs up and pushes its load of food, bottles, cardboard and trash out in a foul-smelling fly-swarmed mountain. The mountain is only one-eighth of the island's residential weekend garbage.

"This right here represents about 50 percent of what we had about four years ago," he said. "Twenty to 30 percent of the trash produced on island cannot be recycled. However, when you put out your trash, the recycled portion should be greater than what is inside your trash can."

Men wearing safety goggles and gloves gingerly step over bags of squishy garbage looking for paint, hazardous material, items made from PVC and large metal pieces. Gradually bike handlebars, baskets, a bike frame, a paint tray full of paint with a brush stuck in it and toys made out of PVC are pulled out. Everything else, including the recyclables, is now trash to be shredded and then incinerated.

"We have a regulatory requirement to screen this for hazardous wastes — paint, car batteries, household chemicals and aerosol cans," he said. "Once someone threw away a gas can half full of gas.

"From housing we get a lot of aerosol cans that aren't empty," he said. "Pressurized aerosol can, one, be recycled as scrap metal and, two, present a hazard to us. If it bypasses the shredder intact, which it can easily, and is then fed into the incinerator, then you have a small bomb that will go off and can cause damage inside the incinerator."

PVC, used for many things including toys and lawn furniture, is another item that should be set beside the trash can for the recycling truck.

"When it burns it releases dioxins and acidic gas," Malloy said. "The fumes

will eat up the metal surfaces inside the incinerator and the dioxins will escape up the stack."

Until a plan is formulated to recycle the PVC articles, a huge mountain of items made from the material is steadily growing in the waste management yard.

Anything bulky or recyclable including electronics such as radios, TVs and VCRs should be set next to the trash can, said Charlie Heath, Solid Waste supervisor. All metal should be recycled.

After the shredding and incinerating, the leftover ash and blackened bits and pieces of items travel down a long conveyor belt and end up in a hopper.

"Most of what you see coming out here are non-combustible things," Malloy said. "Those things should never be in the trash. It wastes the Army's money to try to burn things that don't burn."

Heath holds up a blackened, still recognizable aerosol can with a hole in the bottom from the hopper.

"That blew in the incinerator," Malloy said, explaining that the damage to the incinerator caused by aerosol cans hidden in bags of trash over a period of time will eventually require major repairs.

"Although the bullets in the trash will get a lot of attention, we wish people would pay more attention to the recycling guidelines so it is safer for everyone on island," he said.

Just where those two bullets come from?

The M-16 probably came from the last IFT mission, but the .270 is from a high-powered hunting rifle, said Bruce Tuttle, Safety engineer.

"Inadvertently people are shipping bullets over here with their household goods," said Kevin Dykema, Kwajalein Police Department chief, "Call us and we'll get rid of them through EOD. There will be no penalty."

If someone does find a bullet or have a piece of WWII ordnance, call 54445 for disposal.

Certain sporting events are not available on Kwajalein's DTS Network

Due to ongoing coverage of Operation Iraqi Freedom, all programming is subject to change without notice. AFN-Kwajalein cannot control such changes. Channel 13 sports and news events are most likely to change.

Sports/Leisure

Driftwood 10K set for Monday

From Staff Reports

With less than four weeks to go before the Rustman Triathlon, the Kwajalein Running Club will host the 25th Annual Driftwood Classic 10-Kilometer Road Race Monday.

"It's a good tune up event for those planning to do the Rustman Triathlon," said Bob Sholar, KRC president.

For less, long-distance runners, a 2-mile run will started immediately after the 10-K.

Runners may participate as individuals or as teams with five to eight members, but only the first five finishers on a team are included in team score.

Sign-in is between 4:30 and 4:50 p.m. at the main pavilion at Emon Beach. The 10K, or 6.2 miles, begins at 5 p.m. The 2-miler begins shortly after that.

Both the 10-K and 2-mile courses start and finish near Emon Beach Main Pavilion. Courses follow paved roads with the 10-K course encircling the full paved road perimeter of Kwajalein Island.

KRC will provide water and liquid refreshments to participants.

For more information, call Sholar at 51815.

KGA plays backwards for April Fools' Day

From Staff Reports

In a acknowledgement of April Fools' Day, the Kwajalein Golf Association held a backwards tournament Monday, with 20 teams playing the course in reverse.

The team of Kim Parker, Steve Fuchs, Tracy Hampson and Jeff Jones captured first place.

Second place went to the team of Karin Baker, Cindy Ehart, Vernon Adcock and Mickey Santorum, while Sheryl Gottesman, Brenda Graham, Gerry Wolf and Mark VerStraten took third place.

For updates on all games, officials and scorekeepers, call the Sports Hotline, 54190

Three Army Euro hotels set to close

By Harriet E. Rice
Army News Service

ALEXANDRIA, Va. — Three Armed Forces Recreation Center hotels in Germany - two at Lake Chiemsee and one in Garmisch — will close a year earlier than planned, Army officials announced.

Remaining AFRC-Europe facilities in Garmisch will stay open while the new 330-room hotel on Sheridan Kaserne is under construction and proceeding on schedule to open in October 2004, when the Army originally planned to end all operations in Chiemsee and the hotel

operations in Garmisch.

"Because of the world situation, we've had to adjust our operations," said Pete Isaacs, chief operating officer at the U.S. Army Community and Family Support Center, which operates four Armed Forces Recreation Centers.

The Von Steuben Hotel in Garmisch will close on April 15. The Chiemsee Lake and Park Hotels will remain open through Labor Day and close permanently Sept. 2. This will allow for a full summer of Lake Chiemsee operations, for those who look forward to one last chance to enjoy the lakeside resort.
