

# THE KWAJALEIN HOURGLASS

Volume 42, Number 51

Friday, June 28, 2002

U.S. Army Kwajalein Atoll, Republic of the Marshall Islands

## REINVENTING THE CYCLE: Waste Management seeks help with residential recycling rates

(Photo by Peter Rejcek)

Luso Mabe, Waste Management equipment operator, dumps a load of glass into a pulverizer that will turn the trash into sand, a commodity that can be used by other departments.

By Peter Rejcek  
Associate Editor

Used cooking oil from Café Pacific helps power the Waste Management incinerator. Glass bottles reduced to a fine sand will soon help filter out sludge at the Waste Water Treatment Plant. Even donations to the Bargain Bazaar keep those unwanted Aloha shirts from finding their way to the landfill.

Recycling takes many different forms at USAKA, which boasts an overall recycling and reutilization rate of more than 50 percent, according to Phil Malloy, Waste Management manager. But when it comes to residential recycling rates — mainly glass bottles, aluminum cans and tin cans — people are just throwing it all away.

“If you throw it in the garbage can, it’s going to cost the Army money. If you throw it in the recycle bin, you save money,” Malloy explained during a tour earlier this month of the Waste Management grounds.

With the addition of two new ma-

## Alutiiq new prime contractor for all law enforcement

By Peter Rejcek  
Associate Editor

There’s a new sheriff in town. Well, sort of.

Alutiiq Security and Technology, LLC, will become the new primary contractor for the law enforcement services at USAKA, beginning July 1. Coastal International Security, which has been the prime contractor for about six years, will become a subcontractor to the new Alaska-based company when the transition becomes official next month.

Besides the paperwork shuffle, neither residents nor CIS employees will notice any real differences, according to Cynthia Pennino, manager of Corporate Programs for Alutiiq LLC, the parent organi-  
(See NEW, page 3)

College student Ryan Mawhar, left, listens to Bret Murguia describe a character the youngster wrote about as part of Mawhar’s Summer Fun quiet activities class in the Grace Sherwood Library. Kwaj college kids are back, working summer jobs and enjoying the slower-paced island life.

## College students adjust to stateside living

By KW Hillis  
Feature Writer

The transition from Kwajalein high school to college means more than just going to an institution far from Kwajalein’s shores. For some students it involves culture shocks.

“Yeah, there are differences,” said

Loren Lindborg, 2001 graduate attending Linfield College in McMinnville, Ore. “When you talk about where you are from ... people have this vision that it is this fantasy island ... that you live in huts. You have to explain that it’s not. Even the truth, like we’re actually

(See COLLEGE, page 5)

# Community only as strong as its news source is reliable

I returned this week from an annual workshop with other Army newspaper editors, armed with the shared concerns and strategies of my peers, only to find out you held the same concerns.

I found among the more than 200 e-mails on my computer the Query Me Quick survey results from the latest round of questions distributed last month.

Many of the numbers looked familiar. You gave the Media a 73.4 percent importance rating, and 91 percent of you read all or most of every issue of the *Hourglass*. No pressure there (I'm kidding); but seriously, it's good to know you're looking at the product.

At least 84 percent of you have "easy access" to the paper, so at least most of you are getting it. If you're not getting the paper in your mailbox, then let us know; in the meantime, we are dropping stacks in the Post Office finance office, Café Pacific, Kwaj Lodge and Grace Sherwood Library. There's room for improvement here, but this is looking all right.

Then 67.8 percent of you tell us the stories are pertinent to you.

I've said this before, but I don't expect every story to interest every reader. We're like a grocery store, and readers pick and choose the stories they identify with as

informing, educating or entertaining them. I do intend for *something* in every issue to pertain to each reader, whether it's an interesting news story or feature, just a chuckle from the cartoon or an insightful letter to the editor with which you might agree or disagree, as long as it sparks constructive discussion.

Admittedly, we cover some things better than others.

Following last year's survey, and with the help of Host Nation, we put a lot of energy into covering Marshallese events and issues, as they relate to USAKA, and I think we've improved there. We've bumped up our travel coverage, at your request, and we're working more residents into more stories, because it is people that make news, not events or gizmos.

We've made a conscious effort to improve our news coverage, too, to highlight the events, with regard to the people

involved, and issues that affect your lives on this island. Some of those stories haven't been universally popular, but we've had a lot of positive support, and I would argue you've seen more stories on that front. Still, we've got our problems, and we're aware of some of them.

Frankly, and OPSEC aside, some departments on island think their activities don't represent news. They're wrong.

A command operates more effectively when the people under the command are informed, whether they are soldiers or civilians. Rumor weakens our closed society, and trust exists only through open and forthright communication of, for lack of a better term, "what's happening."

Mission critical?

You'd better believe it. What soldier or civilian works at peak performance when members of the community filter facts or hide information that relates to their lives?

Some of my peers at the conference shared amazing stories of bureaucratic nightmares. I shared a few, too.

I think we're a more open information tool than ever before, but like anything else we need to improve, and we're working to that end.

If you can help, give me a call.

I want the remaining 32.2 percent of you to find something pertinent in the future.

## QMQ survey needs a few more categories

The Query Me Quick survey is a great tool, but like anything else it can be improved. We've come up with a few new "intangible" categories that should be added:

- The Coconut Telegraph: Are you getting the rumors that you need to know about? How satisfied are you with the accuracy of the rumors?

- Weather: How satisfied are you with the number of tanning days per month?

How important is rain to you?

- Diving: How satisfied are you with the amount and variety of marine life encountered while diving? How satisfied are you with the amount and variety of wreck diving available at Kwajalein Atoll?

- Readership (*Hourglass* staff only): How satisfied are you with your readers' sense of humor? How satisfied are you with the readers' candidness during interviews?

# MDA general outlines ballistic missile defense plan

By Jim Garamone

*American Forces Press Service*

WASHINGTON — The United States is as vulnerable to ballistic missile attacks today as it was in the early 1950s, said Air Force Lt. Gen. Ronald Kadish.

In a Pentagon briefing Tuesday (CONUS time), Kadish said his Missile Defense Agency is working to deploy an integrated, layered missile defense system that will provide limited defense against long-range threats and a robust defense against shorter-range threats. While the whole system is years away, he said, its individual programs could be pressed into emergency service to provide some defense from all ranges of missiles.

A layered defense seeks to destroy missiles in the boost, midcourse and terminal phases of their trajectory. The system would use multiple shots in each phase. "We will build this layered system as best we know how to do and as quickly as we can do it, against all ranges of threats," Kadish said.

The effort is budgeted for \$8 billion in fiscal 2003, he said.

One boost-phase defense is the airborne laser. This speed-of-light laser system would strike missiles shortly after launch. The agency is also looking at other sea-based and ground-based systems. Kadish estimated boost-phase systems might be ready by fiscal 2009.

Midcourse defenses include the exoatmospheric kill vehicle. This "hit-to-kill" vehicle rams into incoming warheads in space. The collision, at some 15,000 miles per hour, vaporizes both. Kadish said recent tests have proved

that hit-to-kill technology works, but two other questions now need to be answered: "Can we do it reliably, and can we do it reliably in the presence of countermeasures?" If the answer to both is yes, a midcourse defense capability would be available in fiscal 2006.

Another midcourse system is sea-based and has tested successfully. Kadish said the experiences with the Navy Standard Missile-3 have been so positive the agency will speed development.

Terminal phase systems are perhaps the ones the public knows most. The PAC-3 system is in operational testing now. Based on the Patriot system, the missile intercepts incoming ballistic missiles in the atmosphere. Other systems include the theater high-altitude area defense system and the joint Israeli-U.S. Arrow system. Sea-based missile defense systems are also included in terminal phase plans.

Kadish said the recent U.S. withdrawal from the Anti-Ballistic Missile Treaty aids the U.S. missile defense effort. He said the withdrawal allows the United States to explore different elements of missile defense and to approach the missile defense problem in greater detail.

It also provides for more realistic testing of these systems. Finally, the United States can now discuss the missile defense problem with allies, something the treaty forbade.

Kadish said his agency would pursue a robust testing schedule. The next test of the exoatmospheric kill vehicle is set for August, while the next test of the sea-based system is set for November.

## New company comes from Alaska ...

(From page 1)

zation of AST.

"The color of their paychecks may change," Pennino said, referring to the minimal impact the new contract will have on current law enforcement employees. Some will remain on contracts with CIS, while others, mostly middle management and up, will work under contracts with Alutiiq, company officials said.

Pennino, along with Jerry Price, AST program manager for the Kwajalein contract, are on island overseeing the transition and familiarizing themselves with the operation.

Price said it's important to make a site visit so the company can understand the unique situation that is Kwajalein, especially in terms of support.

AST's background is largely in computer, information, industrial and physical security. It operates under the 8(A) Business Development Program of the Small Business Administration. Alutiiq LLC, is a wholly owned subsidiary of the Afognak Corp., an Alaska native corporation.

Bruce Bell, the current CIS site man-

ager who will remain in charge of the company locally, said the changeover is probably "the least painless transition we'll see."

Bell explained that the contract had been scheduled to switch over last October, but the events of Sept. 11 affected the transition. In actuality, CIS has been preparing for the transition for about two years, he said. Things like uniforms are more generic, without any company logos. And since and because of Sept. 11, additional positions have been added, according to Bell.

"Those kind of things have already been transitioned," he said.

Whether more people will be hired is unknown at this time, Alutiiq officials said.

There are 84 employees currently working in law enforcement under CIS, with six more "in the pipeline," according to Bell. He said all personnel have a background or experience in law enforcement, and not just security. All officers are graduates of a civilian or military law enforcement academy.

"It's a good program and good people," Price said. "I'm impressed."

## Obituary

Former Kwajalein resident, Joanie Middleswart, 65, died Tuesday, June 18, 2002, in Satellite Beach, Fla.

She was born in Sioux City, Iowa, and had lived in Brevard County since 1971. Middleswart served in the United States Navy, where she worked in the Pentagon.

She was active in the American Legion, and in forming American Legion Auxiliary 44 on Kwajalein. She was a special friend to the Marshallese ladies, contributing to their well-being in many ways, and she was very proud of the many honors they gave her.

She and her husband, Allen, were at Kwaj with RSE from 1996-2001.

She is survived by her husband of 30 years, Allen; three sons, Joseph, Mark and Jerry Avery; one sister, Jenice Suggitt; two brothers, Ken and Bob Williams; and nine grandchildren.

Funeral services were held Monday, June 24, at Trinity Presbyterian Church, Satellite Beach.

## Residential recycling lagging behind other rates ...

(Photo by Peter Rejcek)

**Lusien Johnson, Waste Management incinerator operator, works to add a plexiglass shield to a glass pulverizer.**

(From page 1)

chines that can shred, grind, pulverize and chop just about anything made by man or woman, the department is looking to recycle more residential and commercial items locally.

One machine is a glass pulverizer. Glass and other trash goes in one end, and a fine sand and pea-size product comes out the other — sort of like that whirling contraption used by Willy Wonka to create a delicious three-course dinner in a single piece of gum. Anything that's not glass actually gets kicked out through a different chute, while the pulverized glass is sorted into two different bins, depending on size.

But that's just the beginning. There are a number of uses for the product, according to Malloy.

For instance, the first loads are headed to Stan Jazwinski at the Waste Water Treatment Plant. There, the glass will be used to rebuild the 22-year-old drying beds.

The plant takes solids and makes them as inert as possible, explained Jazwinski, Utilities superintendent. The sludge that's produced through the process is very wet, he said, with the "consistency of soup." The soup is poured over the drying beds, one-foot-deep pits of sand. The solids stay on top, while the water percolates through and goes back through the plant for further treatment. The sludge is sent to Waste Management, which mixes it with palm fronds, cardboard and other materials to brew nutrient-rich compost.

"The sand is starting to clump together, so it's not allowing the water to percolate as it should," Jazwinski said.

Using the glass sand for the six dry-

ing beds is a bit of an experiment, but if it works that will save the command money in the cost of buying and shipping sand from off island. Altogether the sand pits cover 9,500 square feet, so Jazwinski said he anticipates using up all of the sand Malloy can initially produce from a two-year backlog of glass.

"Chances are we're going to take all of it," he said.

The second machine in Waste Management's arsenal is a shredder, which the department will experiment with to determine what it can handle. Malloy said it should be able to shred materials like PVC pipe and tires, and is strong enough to crush a bike frame.

"It's pretty heavy duty," he said.

Some of the by-product, he explained, can be used in aggregate for asphalt. Tire crumb can even help fuel the incinerator, Malloy said, adding that probably a third of the fuel for that machine comes from recycled materials including waste oil, lubricants and rejected fuel.

Even with all of this machinery and creative recycling, the department can't recycle to its full potential without the public's help at the collection point of the process, according to Malloy.

USAKA is well ahead of the national average in recycling many products. For instance, the nation is recycling only about 9 percent of its wood products. At USAKA, that figure is more than 95 percent.

But the command lags behind in aluminum can recycling — 35 percent to 60 percent nationwide. Glass recycling is even lower, only 25 percent to the 32 percent national average.

"Overall, we're doing very well," said Dr. Bob Esher, USAKA technical support coordinator. "We have one of the best recycling rates in the Department of Defense."

But even more is possible, he said. Otherwise, the alternative to recycling is to either incinerate the trash, which adds to a rapidly rising landfill with very finite room to grow, or to ship it off island, a costly endeavor.

"To put a new landfill in ... is prohibitively expensive," he said. Stateside, it costs somewhere in the neighborhood of \$350,000 per acre for landfills to meet all of the regulatory requirements.

While the current landfill is

### BY THE NUMBERS

- Solid Waste Management manages more than 16 million pounds annually.
- USAKA consumes 3.8 million aluminum beverage cans but recycles less than a million.
- The Kwajalein Incinerator Plant reuses 50,000 gallons of waste oil annually in lieu of diesel fuel.
- Over 300,000 pounds of food waste is salvaged annually and reused in the composting program.

grandfathered from many of those requirements, Esher noted, "We're very careful of what goes in there."

And the less that goes in there, the better, according to Malloy.

He said residents might not be aware that many of the things that they are throwing away can be recycled. All paper products — from newspaper to cereal boxes to cardboard — can be recycled. They're used to help make the compost that's spread on lawns and used for ground cover. Other recyclables include metal and plastics. Kwaj-condition bicycles have a place at Bicycle Heaven, and even unwanted clothes, books and household items can make their way into the recycle stream via Bargain Bazaar.

"There's not much you can't recycle ... a patio sale is recycling," Malloy said. "Our recycling program doesn't discriminate."

Residential trash pickup is on Tuesdays and Fridays. One truck picks up regular trash, while another collects the recyclables, and hauls them to the landfill where they are segregated and staged for processing.

"It's more labor intensive ... but we're able to recover more," he said. "We have the processing capability to do more."

Esher said with a little more effort, the command could win an Army environmental award.

"The more cooperation we can get from people the better," he said. "Things are really looking good ... We can generate useful products and save the command money."

For more about the recycling program, see the insert in today's *Hourglass*.

## College students prefer smaller schools, smaller communities ...

(From page 1)

a National Missile Defense testing range is kind of boggling to them.”

Lindborg, who was born here, said that he had trouble relating to some other students casually because of the different high school experiences.

“They drove around a lot and went to malls,” he said. “They have all this wealth of consumerism that they can delve into.”

Students on Kwajalein are wealthy in another sense, Lindborg said.

“Out here, you have a greater appreciation for culture, I think,” he said. “It’s a greater understanding of the world itself, because of the experience I have gotten from living out here and from traveling abroad.”

Where he grew up influenced where he chose to go to school, he said.

“The reason I chose the school I’m going to now ... It’s small and easy to get around,” Lindborg said. “It makes it a lot easier for me coming from such a small island.

“Definitely where you are living is going to influence where you are going to school,” he said.

As to the future, Lindborg, an avowed movie fan, would like to write some scripts for the big screen. This summer, in addition to participating as a swimmer in the July Micronesian Games at Pohnpei, Lindborg is a Summer Fun theater class instructor and is working at the Water Plant.

He sees himself traveling after graduation — like the ship in the quote he picked to accompany his high school picture in the school yearbook — “A ship in the harbor is safe, but that is not what a ship is built for.”

“We have a bunch of quotes that my dad has put up on our bathroom wall, and this is one of my favorites for a long time,” he said. “I have a little picture of a sloop at sea [in my mind].”

Graduating the year before Lindborg, Ryan Mawhar was a resident for five years. Home for the summer from St. Johns College in Annapolis, Md., where he is studying “philosophy with a heavy emphasis on theology and mathematics,” Mawhar believes that the people rather than Kwajalein’s island culture shaped him.

“What happened to me here has certainly had a big influence on me. But the significance of here is not as if the geography or peculiar island culture,

whatever that is, has had some influence on me,” he said. “It has more to do with people that happen to be out here at the same time I was — that had much more of an influence.”

There are some differences, though.

“I don’t have a driver’s license and I happen to know more details than [other St. John students] know about Marshallese culture ... I have more of a tolerance for long plane rides or rain,” Mawhar said. “Beyond that, I can’t really think of any way [Kwaj] has influenced my approach to school.”

He said he picked the small, 450-student school because the curricula is based on “the idea that students should learn from the great books to learn about civilization.” The school he chose meshes with Mawhar’s selected quote from Keats in the 2000 school yearbook — “Beauty is truth, truth beauty;

---

**“When I have kids, I’ll  
be back here.”**

— Lynn Pippett  
college student

---

that is all ye know on this earth, and all ye need to know.”

This summer, Mawhar is working as a library class instructor for Summer Fun and helping his mother teach her remedial reading classes. There is a possibility he may become a teacher in the future far away from Kwajalein.

“That depends mostly on the shape things take around me these next years,” he said, adding that currently he is working with a group discussing setting up a small college in Annapolis. “Depending on how that falls out, I may end up involved in that project ... Once it’s started, I would definitely want to teach.”

Class of 2001 student Lynn Pippett, who is taking liberal arts classes at Kapiolani College in Honolulu, said there are definite differences in Kwaj kids and those who grew up elsewhere.

“I think that living out here definitely sets us apart from people in the states because they have never been in such a confined place,” she said. “People aren’t as friendly as out here.”

Pippett said she picked Kapiolani College because it’s relatively close to her home and family, it’s small and it’s

on an island.

“I thought it was on an island, but it isn’t really,” she said, referring to the crowds, tourists and faster-paced life.

After working for Community Activities since she was 13, this summer Pippett is working as the senior recreation aide coordinator for Summer Fun.

A big sports fan, she is toying with the idea of going into sports marketing. That decision will require her to transfer to another school — but this time the school can be larger.

“It was a culture shock being there with so many people,” said Pippett, who was born on Ebeye and lived on Kwajalein most of her life. “I’ve forgotten all about traffic, having to push a button to cross a street, things like that ... Now that I’ve gotten over that and I’m used to it, I definitely wouldn’t mind if the school was larger.”

Her school yearbook quote, “This place is a little piece of heaven,” by Teef, is still true for her, Pippett said. She sees herself returning here eventually to live.

“When I have kids, I’ll be back here,” she said. “I would love to raise my kids out here. I couldn’t imagine raising my kids anywhere else.”

Jennifer Padayhag, 2000 graduate, studying business at Gonzaga University in Spokane, Wash., said that when she was questioned about the Marshall Islands it “surprised me how much I didn’t know about the history of this place. Going away made me appreciate this place a lot more.”

She laughed, but said she still likes the idea behind her yearbook quote, “Only shootin’ starts break the mold,” by Smashmouth.

The weather was a surprise.

“I didn’t understand what winter meant,” said the Kwajalein-born student, adding that the warmer clothing her parents helped her get wasn’t warm enough when winter hit. “They have lived here so long; they didn’t remember how bad it gets.”

Padayhag, who works at the post office during the summer, picked a small private school because she came from a small community.

“I wanted more personal attention, more of a community,” she said. “These last years have been quite an adjustment, life in the states is definitely different ... It’s definitely more stressful and hectic.”

## Old & Lazy co-ed winner; tourney finishes Monday

### From staff reports

Old & Lazy proved it was anything but at last weekend's softball tournament, breezing through the co-ed league to win the championship in three games.

Heavy rains Sunday delayed some games, forcing the men's division to finish the tournament this Monday, according to Scott Pratt, Community Activities Adult Recreation supervisor.

Four teams competed in the co-ed bracket. Old & Lazy, managed by Mark McCollum, outscored its opponents by a combined score of 39 to 12, beating Kim Parker's Swingers twice. Stretch and Elimo rounded out the division.

Four teams remain in the men's division. Action begins at 10 a.m. Monday at Dally Field.

## Now for something completely different — a week of kickball

By Jim Bennett  
Editor

Community Activities will bring to Kwajalein games not played since junior high school for many adult residents.

The week-long softball tournament scheduled for July 13-20, has turned into a kickball tournament, said Scott Pratt, Adult Recreation supervisor.

"We just finished a double-elimination [softball] tournament," he said.

"And all the teams said, 'Yeah, we'll play kickball.'"

Several teams have already signed up and more are expected to register, Pratt said.

"I think it will be a lot of fun," said Kim Parker, who plays on softball and soccer teams. "It will take everyone back to their school days."

Of the local athletes she's talked to, all are excited about the sport, she said. In fact, her team may grow into two or more teams due to the increased interest.

"It doesn't have the pressure of softball," said Erika Cole, Community Activities Youth supervisor.

For those who can't remember back to their school days, the sport

has similar rules to co-ed softball in batting order and positions. Fly balls still count as outs, though catching a big round rubber ball may prove interesting for a crowd not used to the sport.

Unlike softball, players may throw out a runner by hitting them with

the ball, below the shoulders, of course.

"You can't bean them in the head," Cole said.

Pitchers roll the ball between the inside lines of the batter box for strikes.

"And some people do 'swing' and miss," Cole said.

Pitchers may not throw "bouncys," or pitches that bounce higher than knee-level. There are no ghost runners or do-overs in this league, either.

Pratt and Cole came up with the idea following a successful adult kickball league Cole helped develop in Ferndale, Mich., near Detroit last year. The program won a statewide recreation award and continues this year, after Cole moved to Kwajalein. Pratt said he'll see how the tournament goes, and if all goes well, local athletes could see a regular season develop in the near future.

## Facelift planned at Oceanview Club

By Peter Rejcek  
Associate Editor

The Oceanview Club hopes to get a little help from its friends for an upcoming facelift.

Next month the staff at Sodexho USA will perform a self help transformation at the Oceanview, according to Farida Straub, Sodexho USA director of Operations. A date has not been set at this time, but the club will likely close one day for painting, Straub said.

She said decorations have been purchased to give the club a more "tropical" atmosphere, along with lights and umbrellas for the outdoor tables. A sound system is also on order, and a limited food menu will be available like

the one at the golf course country club.

"We bought everything to make it very festive," she said.

Other changes or additions include games, monthly barbecues and live musical acts, Straub said.

"We think it's just a great place," she said, explaining the impetus behind the overhaul. This is third self help project by Sodexho USA in less than a year. Similar makeovers were done at the Yokwe Yuk Club and Sunrise Bakery.

A reopening ceremony is tentatively scheduled for July 27.

Anyone interested in helping can contact Straub, 53513, or Brenda Graham, 53419.

## Loss, theft or destruction of a passport

**Passport Services**

regards the loss of a passport as a serious matter. Lost and stolen passports are used for fraudulent purposes and could be used by terrorists to gain access to the United States. Loss or destruction of a passport must be reported immediately to local police, the Kwajalein Legal Office or the nearest American Embassy or Consulate. Your passport is a valuable citizenship and identity document. Its loss could cause you unnecessary travel complications and cost.

Upon receipt of a passport, make two copies of the signature and photo pages. Keep one copy removed from your passport. A copy will give the police information in case of theft or loss.

**A Beautiful Mind (2001, PG-13)**

Yokwe Yuk Theater, 7:30 p.m.

**Hospital repairs by San Juan to last 60 days**

By Peter Rejcek  
Associate Editor

San Juan Construction Co. began a 60-day project this week to repair structural defects at Kwajalein Hospital.

The work, similar to that done at the BQs over the last year, will primarily affect two areas, said Kevin Bottomley, San Juan project manager. The areas are the east end of the hospital that faces the Sands BQ and the side near the hospital's mechanical room next to the occupational health building, he said.

The work at the northeast end will require four rooms to be emptied out, with each room sealed off by a plastic barrier, he added.

Crews will work from 3 p.m. to midnight to cut down on any disturbances to patients, but "noise is going to be a factor," Bottomley noted.

Beth Turnbaugh, Kwajalein Hospital administrator, said the hospital will do its best to accommodate patients, scheduling appointments before 3 p.m.

"Summer is usually slower anyway," Turnbaugh said. Still, she asked patrons to be patient during

the construction.

Bottomley said work will go on six days a week, and should be completed before school begins in August.
