Johnston Island foraging benefits USAKA

By Kim Parker
Contributing Writer

USAKA/RTS will reap the benefit of the impending Johnston Island base closure.

Thirty containers stocked full of everything from individual boxes of nuts and bolts to 17-Foot Boston Whalers will arrive soon on the next barge, according to Bob Tucker, USAKA property administrator. All items are courtesy of Johnston Island, and ultimately, the American taxpayer.

Johnston Island, currently under the control of the Air Force, was maintained as a storage and disposal site for chemical weapons until late 2000, according to the CIA World Factbook.

With munitions destruction now complete, the facilities are now being dismantled.

The base will close for business at the end of December, opening the door for USAKA to acquire hundreds of thousands of dollars worth of merchandise, essentially at the cost of shipping, said Tucker.

“It's still government property, and it still must be accounted for, but it's not coming out of USAKA's budget,” he said, adding the merchandise will be transferred from Johnston Atoll to Kwajalein Atoll.

Nearly thirty representatives from Kwajalein and Roi-Namur recently traveled to Johnston in search of goods, but this isn't the first time that USAKA has received supplies from the neighboring island. In fact, the first shipment of wares arrived last June, Tucker said. Most of those items went into unaccompanied billeting.

Stan Jazwinski, liquid systems supervisor, made the journey on behalf of Utilities. With the base closure drawing near, Johnston has started liquidating more and more assets.

“Up until now, it's been pretty much furniture and stuff that they had too much of and really didn't want,” Jazwinski said. “Starting next month, they will give us stuff that they don't foresee needing from now until they

(See LIQUIDATED. page 4)

For safety's sake

Despite windy weather, cutting coconuts and palm fronds from tree tops continues for the safety of the community.

At least twice a year, each palm tree in areas frequented by residents are trimmed.

“It is a fairly high risk job,” said Phil Malloy, Solid Waste and Grounds manager. “These guys are skilled and trained at what they do.”

SARS cramps travelers’ style

By KW Hillis
Associate Editor

Travelers hopping islands to and from Majuro, Pohnpei, Chuuk or Guam on Continental should be prepared to stay on the plane throughout the whole trip.

“Once you get on the plane you are not allowed off the plane on the island hopper,” said Yvonne Duarte, Continental Travel manager. “It’s a combination of security and the SARS [severe acute respiratory syndrome] scare.”

Continental passengers may not disembark to pick up a snack, shop for handicrafts, smoke or stretch their legs at each island on the way to their ticketed destination, she said.

There are no such restrictions on Aloha, AMC or ATI passengers according to airline and USAKA officials.

The worldwide cases of SARS, up to 2,781 with 111 deaths today (stateside) which includes 154 cases suspected in the U.S., and the war

Volunteers make Spring Break Music Fest a success

I would like to take this opportunity to express my gratitude to all the volunteers and to the community of Kwajalein for making the 3rd annual Spring Break Music Festival another huge success.

This event would not be possible without the support and willingness of so many individuals to volunteer their time and efforts to this event. To all of you I would like to say thank you.

Thank you to Col. Jerry Brown and his USAKA staff for their support.

Thanks to all the band members for their time and efforts to provide us with live music throughout the day, the KYC for hosting another successful chili cook-off, the Kwajalein Shrine Club for judging the chili cook-off, KRS Food Services for providing a great BBQ, to all the homeowners for supplying such a variety of great beer, and to the crews of Community Activities, Buildings & Grounds, and Automotive for all their support.

I would also like to thank the community of Kwajalein for their generosity. This year between the KYC Chili cook-off and the beer garden we raised well over $800 to support the Kwajalein Shrine Club, thank you again.

There are several people that I would like to personally thank, because without them this event would never have happened. Bruce Johnson for pulling all the bands together, Paul Fritz for his time and efforts with the sound equipment, Neil Dye for his support, Geoff Tyre and Jane Premo for the chili cook-off, a big thank you to Ellen Smith for all her support, Phil Malloy for all his help, Gina Sansone and all the volunteers at the beer garden and a great big thank you the weather gods for providing a beautiful day.

Thanks to all the folks who donated their homemade chili in support of the cook-off. My tastebuds still haven’t quite recovered!

The Peoples Choice award for favorite homebrew goes to Mark Long for his India Pale Ale. Thank you again for all of your support, time, and effort in making this event such a success. Hope to see you all again next year.

Event Coordinator/Founder

To Our Soldiers provides link to troops in field

By Bruce Anderson
Army News Service

WASHINGTON — The Army has established a new Web link that makes it easier to send a greeting to soldiers serving in the War on Terrorism.

The link, called “To Our Soldiers,” is on the Army HomePage. People interested in sending a message to a soldier can also access the program directly at http://www.army.mil/tooursoldiers/messages/1.html.

While similar Web sites for sending messages to service members in general already existed, there was no way to send a message specifically to someone in the Army.

“This link gives people a way to be connected directly to soldiers,” said Lt. Col. Mark H. Wiggins, Web director for the Army HomePage.

“To Our Soldiers” was launched the night of April 8 and enjoyed immediate resonance. Within minutes of being launched, more than 20 messages were received, and by morning, the number of messages was more than 200, Wiggins said.

“The numbers are not the important thing,” Wiggins said. “What is important is providing the capability for people to get their message to soldiers.”

To Our Soldiers was designed for posting a message to an individual soldier or to a group, but is not designed to be a letter writing service, instant-messaging service, e-mail service, bulletin board or general chat service.

Each message is viewed individually, and may be edited or deleted if the content violates operational security, privacy or propriety.

Keep letters to less than 300 words, and keep your comments to the issues. Letters must be signed. We will edit for AP style and, if you exceed the word limit, space. Please limit yourself to one letter every 30 days to give other readers a chance to write.

Send your letter to: The Hourglass, P.O. Box 23, Local; or jbennett@kls.usaka.smdc.army.mil.
Hospital staff monitors cardiac care

By KW Hillis
Associate Editor

The lifeless body clad only in blue running pants, glimpsed through the blinds behind the Kwajalein Hospital Nurses' station, is surrounded by doctors and nurses working to reverse a cardiac arrest Wednesday morning. Director of nurses Jane Cassel supplies air to the patient, “Jim,” nurse Kim Morris continues chest compressions while surgeon Dr. Ed Paget injects epinephrine. In the corner Emergency Management Resources senior instructor David Licata monitors the teams’ progress.

“So you've done your primary ABCs; you've given your first medication,” said Bess Buchanan, Advanced Cardiac Life Support instructor, to the others present. “What are you now thinking about?”

Since the patient's ABCs — airway, breathing and circulation — are stabilized, the answer is to think about checking the medical mannequin, Jim, for any physical signs indicating why he went into cardiac arrest at Kwajalein's golf course.

This week the entire medical staff is attending a refresher ACLS course taught by six of their co-worker. The new instructors were trained over the weekend by EMR’s owner John DeArmond and Licata.

Previously staff members were either sent off-island for training or a TDY person came out to train since the American Heart Association recommends that all medical personnel have a refresher course every two years. In the future, the hospital staff will be recertified here since DeArmond is setting up an ACLS training site at Kwajalein Hospital which his company will support and update with training via e-mail, teleconferencing and in person.

“The reason we certify every two years is because there are national studies going on and new drugs and new techniques to learn,” said Marion Naretto, ACLS instructor and point of contact between Kwajalein Hospital and EMR.

This is a comprehensive course that teaches medical personnel to “think out of the box,” she said. The course deals with all facets of a code, or when someone’s vitals shut down, including ABC basics, drug therapy, defibrillator use, interaction and emotional support of the patient’s family and a critical incident review performed on each case afterward.

Using actual cases of cardiac arrests due to trauma and drowning, the instructors walked their students through each step of the process which can be extremely complicated.

“Bess [Buchanan] and I participated in one of these here in the ‘80s when a friend of ours was at depth, diving,” Naretto said. “He blacked out at depth.”

The rescue started at sea, ACLS instructor Buchanan added.

“They were doing mouth to mouth in the water and then CPR in the boat. The guy died,” Naretto said. “I believe we were devastated. A young person, somebody we knew, he had a chart, had information, we worked easily three hours. We worked till we dropped and used up all our drugs because nobody wanted to quit.”

The reason that he couldn’t be revived came back in the autopsy. He had a ruptured artery near the aorta, Buchanan said.

“See how many levels you are looking at and you are trying to diagnose?” Naretto said.

A balance between subjectivity and objectivity is necessary for both the patient and the health care provider, cautioned Dr. John Janikowski, ACLS instructor.

“You want to be able in your own mind to say, ‘I did for this patient what I would have done to someone I respected and liked,’” he said.

The in-house training site will not only save money, but will help both the hospital and the community, DeArmond said.

In addition to the staff's recertification; in the future the community can sign up for an AHA basic life support class, Naretto said. The training will also be extended to Roi, Meck and Ebeye.

“Dr. Lindborg has had it in mind for a long time. I think we have needed it out here,” she added.
Liquidated assets equal local savings ...

(From page 1)

shut down.”

The Utilities department is taking advantage of the opportunity by bringing in much-needed parts for the power plant and the reverse osmosis system, Jazwinski added.

"Any equipment they have that we will need over the next several years," he said. "It makes sense to bring here now ... these items will allow us to do more in spite of budget reductions.

“This trip was a definite success. We’ve identified equipment, parts, and tools that we can use over the next five years,” stated Jazwinski.

Though anticipating upcoming requirements is challenging for the members of the acquisition team, the task should prove fruitful to everyone.

“It will save us from spending future funds, and it’s also reutilizing money the taxpayers have already spent,” Jazwinski said.

Utilities is not the only department stepping in to harvest Johnston assets. Representatives from Automotive, Community Activities, Operations and the Kwajalein Hospital also made the trip.

Tucker estimated the value of the recent acquisitions to be in excess of $700,000. And it doesn’t stop there.

“We’re going to continue to return to Johnston approximately every four to six weeks until they close,” he said.

According to Tucker, it’s an advantageous scenario for all parties.

“We’re saving money, the Air Force is saving money, and the taxpayers are saving money," Tucker said. “This is definitely a win-win situation.”

He thinks that USAKA’s recent acquisitions saved the Air Force approximately $150,000 in shipping and disposition costs. Because Johnston is an Air Force controlled facility, the Air Force receives priority on all property transfers. Due to the expense of shipping items to Hawaii, the West coast, or beyond, they have conceded many items to Kwajalein.

Tucker’s crew has been careful not to get too carried away.

“We’re only bringing items that we can use... we’re trying not to bring junk,” Tucker said.

A few notable items coming soon include 15 pallets of Portland cement, which weigh approximately 2 tons each, heavy duty air conditioning units, an ice maker, tires, ovens, more new and used furniture, Tucker said. And these are a handful of the things to come. Many of the items obtained will not necessarily be noticeable to the public.

Community Activities stands to gain some of the more visible items, according to Simone Smead, Community Activities manager.

“Their MWR/Recreation Department mirrors our operations,” Smead said, noting that “[J]ohnston’s] programs are bigger and broader, and they definitely have more space.”

Space is, however, something that can’t be imported from Johnston.

“We went over there and saw their assets that we would love to have,” she said, “but we just don’t have the space.”

Though there is no assurance that Kwajalein will receive all of the items the team asked for, a few of the things that Community Activities hopes to gain from Johnston include: an electronic tele-scorer for the bowling alley, a baby grand piano for the chapel, greens mowers for the golf course and T-shirt silk screen set up, as well as other arts and crafts equipment, plus, many more items.

“There is no guarantee,” said Smead.

“When we get it, we’ll know we got it.”

For now, the hopeful recipients of the excessed property can only wait and see. And in the words of the popular Kwaj catchphrase, they hope “it’ll be on the next barge.”

No ticket change penalty ...

(From page 1)

in Iraq have led to the “worst drop in passenger loads so far this year,” said James C. May, Airline Transportation Association president.

Although Continental travelers may be inconvenienced during island-hopping flights, anyone who currently holds a Continental ticket doesn’t have to worry about paying penalties for a change in destination, dates or times.

Due to those two extenuating world-wide circumstances, Continental is allowing ticket-holders to change flights and destinations, on a one-time basis, without penalty, Duarte said.

Parts of Baghdad still dangerous for coalition troops

By Jim Garamone

American Forces Press Service

WASHINGTON – Following yesterday’s scenes of jubilation, there was still fighting overnight in parts of Baghdad, U.S. Central Command officials in Qatar said today.

“Baghdad’s still an ugly place,” Air Force Maj. Gen. Victor Renuart said. Many parts of the city have not been secured by U.S. forces, he said, and U.S. officials believe there are still pockets of remaining small elements of Republican Guard, Special Republican Guard and paramilitary forces.

Renuart, director of operations for the command, said coalition forces are concentrating on these pockets of resistance.

Combat operations continue in the city, as well as in the northern part of the country and in the west, said Army Brig. Gen. Vincent Brooks, CENTCOM’s deputy operations director. Coalition forces continue to eliminate pockets of regime forces representing the Republican Guard, regular Iraqi units and Ba’ath Party members throughout the country.

“There have been pockets of intense resistance in the center of the city and also near the al-Adham mosque,” Brooks said.

Residents get tax reprieve

But if taxes owed, Legal Office recommends filing now

By Kent Duncan
Legal Advisor

Those who live on Kwajalein at tax time are given an automatic two-month extension beyond April 15 to file their tax returns — this year, June 16. If you haven’t filed yet, you should get started. To obtain this automatic extension, just write “OVERSEAS FILER” on the front of your tax form.

Those who owe money to the IRS or their home states should consider filing by the April 15 deadline. Interest on the amount you owe starts accruing April 16, this year. It’s in your interest to file and pay that as soon as possible. If you don’t owe anything, file by June 16. If you file a federal paper return from Kwajalein, send it to the Philadelphia Service Center, Philadelphia, Pa. 19255-0215.

If you arrived on Kwajalein after June 15 last year and wish to take the Foreign Earned Income Exclusion, you can also request an extension of up to a total of six months or until Oct. 15 by using Form 2350. You must indicate you are requesting the extension for purposes of obtaining the Foreign Earned Income Exclusion. If you arrived late in the year, talk to one of the tax volunteers or call the Legal Office for options.

If you need help preparing your tax return, a number of your co-workers have volunteered to help under the Volunteer Income Tax Assistance, or VITA, Tax Assistance Program without charge (see box below).

If you’re required to file state taxes for 2002, help is available. Many state materials are on the Internet. The general website which will direct you to your state is www.tax.state__.us. Just fill in the blank with the two-letter abbreviation for your state. You’ll find forms, instructions and possibly a way to file online.

For those who have already filed their taxes this year, here are some future tax-planning tips:

• Plan now for next year. Ensure that your employer withholds enough during the year so you won’t have to pay extra next April.

• 401(k). Take maximum advantage of your 401(k) plan, if you qualify for one. Not only will you earn interest or accrue value in a stock plan, your employer will match some or all of your contributions and it reduces your taxable income.

If you received a payout from a 401(k) when you left one company, you can roll it over into another 401(k) or similar account. Otherwise, you will pay 10 percent tax plus another 10 percent early withdrawal penalty on the amount you withdrew.

• Think long-term. If you plan to sell securities, wait until you have owned them for at least twelve months, to take advantage of long-term tax rates, which are lower than short-term tax rates. This includes Mutual Funds.

• Educational Credit. If you have a choice, pay for your children’s tuition and fees at college. You may be able to qualify for a one-for-one tax credit up to $1,500 per student. This reduces your tax bill dollar-for-dollar. The amount of tax credit for Lifetime Learning, after the second year of college, is increasing next year.

• Debt. Personal debt enjoys no tax advantages. Mortgage debt is deductible.

• Home Ownership. If you own a home that you may sell within the next few years, consider living there for two years within the last five before you sell it. If you do, you will qualify for the $250,000 per spouse exclusion.

Remember: The filing deadline if you owe money and don’t want to pay interest is April 15; otherwise it is June 16.

Self-help permits on short hold

By KW Hillis
Associate Editor

Right now there is a moratorium on self-help residential outside improvements while Kwajalein Operations, formerly known as Facilities Operation and Maintenance or FOM, sets up a new policy for issuing permits.

“The policy will set the procedures for obtaining a permit for home improvements including fences, decks and other projects residents want to construct to beautify their homes and boat lots,” said Flynn Gideon, Housing Services supervisor.

Kwajalein Operations is asking residents to be patient until the new procedures, including how to obtain a permit, are in place, he said.

“I expect to have the procedure in place in the next two weeks to a month,” Gideon said. “Once we are able to approve permits we will notify the island residents.”

Gideon asked anyone with questions call him at 53201.

Jeramon non kom

“Jeramon non kom is the Marshallese way to say, “Goodbye and good luck friends.”

Pam Rodkey and John Robertson are departing on Monday, April 14. For the last five years, Rodkey worked as a nurse at Kwajalein Hospital and Roi-Namur clinic. Robertson is leaving after a seven-year stint as a helicopter and maintenance test pilot.

“We’re going to become nomads traveling around the U.S.” Rodkey said. “I’m going to become a traveling nurse and John will be a factory certified repair person for recreational vehicles.”

They both said, “So long, farewell, aufwiedersein, goodbye. Thanks for the great friends, the great experiences, the great sunsets. To those of you that knew us singles, thank you. To those of you who knew us as a Kwaj romance, thank you also and bon voyage.”

The prep race is over and Kwaj runners have entered the backstretch in training for what could be one of the most exciting Rustman competitions in years.

Twelve runners completed the Driftwood 10K Road Run, or 6.2 miles, Monday.

"Not just anyone is willing to run 6.2 miles, even in cooler places," said Bob Sholar, Kwajalein Running Club president. "It was sweltering, which is the norm for this event."

Perennial favorite Brian Brewster led the race with a 42:51 time, followed by Derek Brower at 44:28. Sharon Greenbaum finished next, leading the ladies, with a time of 45:13, followed by KRC newcomer Nick Perry, who posted a 47:03.

"Most participants used the event as a tune-up and time-trial," Sholar said. "Most of them set new personal bests.

The Rustman is a 1-kilometer swim, 42-kilometer bike ride and 10-kilometer run. The 24th annual race begins at 4 p.m. in the water near the Dock Security Checkpoint. Participants will swim from there to Emon Beach, before getting on a bicycle and riding six laps around the runway and back to Emon. Then, the participant runs three laps along Oceanside to the airport terminal and back along Lagoon Road.

Sholar added he expects around 25 individual and 15 to 20 team entrants this year.

I try to get in good shape so that if everything comes together and the weather is great, we just might have a chance at that record.

— Derek Brower of team Foggy Green Brow

Ray Fogg, Guy Schwarz and Thomas Cardillo set the team record of 2:04:26 in 1999. In the team competition, the past two years has been all Foggy Green Brow, featuring Ray Fogg in the swim event, Charles Greenbaum on the bike and Brower running. The team posted 2:05:54 and 2:07:25 in 2001 and 2002, respectively.

The team plans to compete again this year, Brower said.

"I try to get in good shape so that if everything comes together and the weather is great, we just might have a chance at that record," said Brower, who works as a high school science teacher. "As a teacher, the Rustman gives a sense of completion. The year's about over. It's a great goal to gear up for and helps prepare me to run a race or two in the states during the summer.

"For many of us, training for the Rustman is our weight-loss program, or at least our weight maintenance program," Brower said.

Sholar is taking registrations now for the race. Forms are on the mall porch and, for more information, one can call him at 51815.

Mr. Spock logs RTS’s mission

By Jim Bennett
Editor

The science officer aboard the original starship Enterprise holds an interest in the Reagan Test Site’s space mission.

Leonard Nimoy, who played the venerable Vulcan, Mr. Spock, attended a conference recently where the U.S. Army Space and Missile Defense Command’s Jack McCreary hosted an RTS booth.

“After introductions, I went into my explanation of how we collected space debris data using the ALTAIR radar and its importance to the U.S. space program,” McCreary said. “He was amazed that all of this data was collected and cataloged for future use by agencies launching vehicles into space...

He commented that with all of the launches over the years that a lot of junk must still up there and our mission is important.”

The range actually conducts about 40,000 tracks a year, according to Dennis Simpson, RTS Space Operations lead. That number doesn’t necessarily reflect the numbers of objects, as some are tracked more than once and not all are “junk,” Simpson added.

Said McCreary, “[Nimoy] seemed amazed the U.S. had this capability to track such small pieces of space junk and keep track of all the pieces.”

Without space technology

Life as we know it is a thing of the future

By Maj. Laura Kenney
Army News Service

COLORADO SPRINGS, Colo. — Army Space Forces are actively engaged in current operations in Iraq and globally.

Brig. Gen. Richard V. Geraci, Army Space Command deputy commanding general, talked about his command’s operations ... just a few days after Operation Iraqi Freedom began.

“We’ve taken an old cliché and made it ours: The sun never does set on Army Space,” Geraci said. “The few soldiers you see here today wearing this patch are about all we have left — the rest are deployed around the globe, engaged in our mission of helping the soldier in the foxhole. We are literally up to our eye-balls in current global operations, ensuring that your Army never experiences a day without Space [Command support].”

To underscore the importance of space technology for both civilian and military use, Geraci asked the audience to imagine a day without the use of space.

In the civilian world, that would mean no satellite TV; no tracking of floods or forest fires; no help with search and rescue; no Hubble telescope; no emergency broadcasting; and terrible, if any, cell phone transmission, Geraci said.

For the military, no use of space would mean reliance on older long-haul commo; no Blue Force tracking to help identify friend from foe; no Global Positioning System to help soldiers navigate; no imagery to prepare combatant commanders before they hit the ground; no video tele-conferencing; no e-mailing home to families; and no early missile warning.

GPS is particularly important to soldiers in the Central Command area of operations as they can continue to move through blinding sand storms and a featureless desert with it, Geraci said.
