

# THE KWAJALEIN HOURGLASS

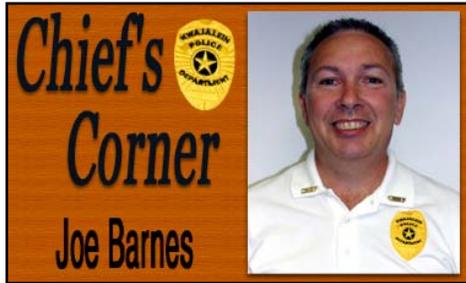

(The PBQ is slated for demolition July 6. For more, see Page 4.)

*(Photo illustration by Nell Drumheller)*

# Recognition, promotions, things turning out okay

Hello again Kwaj family!  
I would like to start out this week with some recognition. First, Kwajalein Police Department has selected and recognized its Employee of the Month. Help me in congratulating Access Control Officer Salvestin Nathan. Nathan has been with KPD for almost four years where he started his career first at the Dock Security Checkpoint and was later re-assigned to his current position with island Entry/Exit Section. We are proud of him and honored to serve with him. We also welcome two new officers to the department. They are Joseph Coleman and Sean Sullivan. Coleman, after spending some time away, has returned to KPD and will be assigned to Roi-Namur as our marine division boat operator. Sullivan is new to the island and has come to us from Ketchikan, Alaska. He will be assigned to our

Central Police Station Section. They will graduate from our Officer Orientation Course and bring years of experience with them. We are fortunate to have them on board. Congratulations go to Lt. Jeff Beringer who was recently promoted and assigned as the Dock Security Checkpoint lieutenant. Lastly, I wanted to share with you all this great e-mail I got this morning from our own Lt. Mike Herrington, in charge of our Marine Section. He writes:

Chief, sometimes things turn out ok. This morning as we were making early morning rounds we discovered a very large ray had wrapped himself in the poly-line for the buoys at Emon Beach. We also saw that sharks were also closing in. I called harbor control for the divers; no luck locating them. I went to the Small Boat Marina and recruited three divers that were just waiting to get underway. We cleared it with SBM to get underway before 8 a.m. Marina boat K-76 arrived 7:50 a.m., with Mac McGuire, Kim Morris and Kevin Smith. These three divers were quick to cut the exhausted ray free. It's good that we have quality people we can call on for help.  
Hope to see you all at tonight's KPD Town Hall at 7 p.m. in the multi-purpose room.  
Be safe, take care of yourselves and look out for your neighbors.

# Don't put 'gotcha' ahead of national security

The *New York Times* has created quite a furor by publishing stories on the National Security Agency warrantless wire tapping and now the bank records surveillance the government has been doing.

The *New York Times* claims it was proper to publish those stories because the public has a right to know what the government is up to.

The government says that publishing the stories has hurt the Global War on Terror by letting our enemies know what strategies are being used to fight them. Some Congressmen have even accused the *New York Times* of treason.

I've heard some say that such a thing would never have occurred in 'the old days' because reporters and newspapers were more patriotic then and put the interest of the country above getting a 'scoop.'

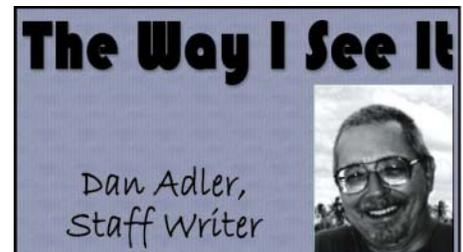

Yeah, well, think again folks.

In 1941, many newspapers and publishers around the country were anti-Franklin Roosevelt and very isolationist. As it became more apparent that Roosevelt might take the country to war, some of the newspapers savaged him for it.

Then, on Dec. 4, 1941, just three days before the Pearl Harbor attack, the *Chicago Tribune* printed a huge headline on page one that read, 'F.D.R.'s War Plans.'

The document the newspaper printed was the Rainbow 5 Plan or Victory Plan that it had somehow obtained. It was the entire U.S. military strategy, verbatim, for fighting and defeating Germany and Japan. Every detail including recruiting an army of 10 million men, invading Europe and the island-hopping campaign against the Japanese was revealed.

The isolationist newspaper's purpose in doing this was to show that while Roosevelt publicly said numerous times that

See 'GOTCHA,' Page 12

## THE KWAJALEIN HOURGLASS

The *Kwajalein Hourglass* is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The *Kwajalein Hourglass* is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Kwajalein Atoll. Contents of the *Hourglass* are not necessarily of-

ficial views of, or endorsed by, the U.S. Government, Department of Defense, Department of the Army or USAKA. It is published Wednesdays and Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

# PBQ test shot scheduled for Saturday

## Actual demolition set for July 6

By Nell M. Drumheller  
Editor

Anyone living on the island has noticed the slow disintegration of the Pacific Bachelor Quarters. It has been taken apart piece by piece by local construction workers and on Saturday, Soldiers from the 29th Engineer Battalion and its 7th Engineering Detachment (Dive) from Fort Shafter, Hawaii will dynamite one first-floor column in a test explosion preceding the planned July 6 primary explosion. There may be a second test shot depending on the results of the first one.

“Saturday will be a test demolition of one structural column on the first floor. If the first test demolition goes as expected and the colonel gives the approval, then preparations for the destruction of the remaining structural columns on the first floor will begin and are expected to be complete for a July 6 demolition,” Monte Craven, U.S. Army Kwajalein Atoll Public Works said.

“It is important to understand that the demolition of the PBQ is not going to be like an explosive demolition we are all familiar with from TV, one big blast and the whole building collapses into a big pile of rubble,” Craven said. “We are utilizing explosives in this demolition to partially lower the structure so that it can be safely demolished with the heavy mechanical equipment and to achieve cost savings in the demolition operation. Only the first floor columns of the PBQ are going to be exploded, with the upper two floors then simply falling down one story in height. Again, we are not planning for, nor expecting the second and third floors to collapse in a ‘pancake effect’ as we have seen on TV.”

After the second and third floors have been mechanically collapsed, debris will be removed using heavy

equipment. The demolition of the PBQ, i.e. the actual process of collapsing the building, will be a work in progress that is expected to extend into early August.

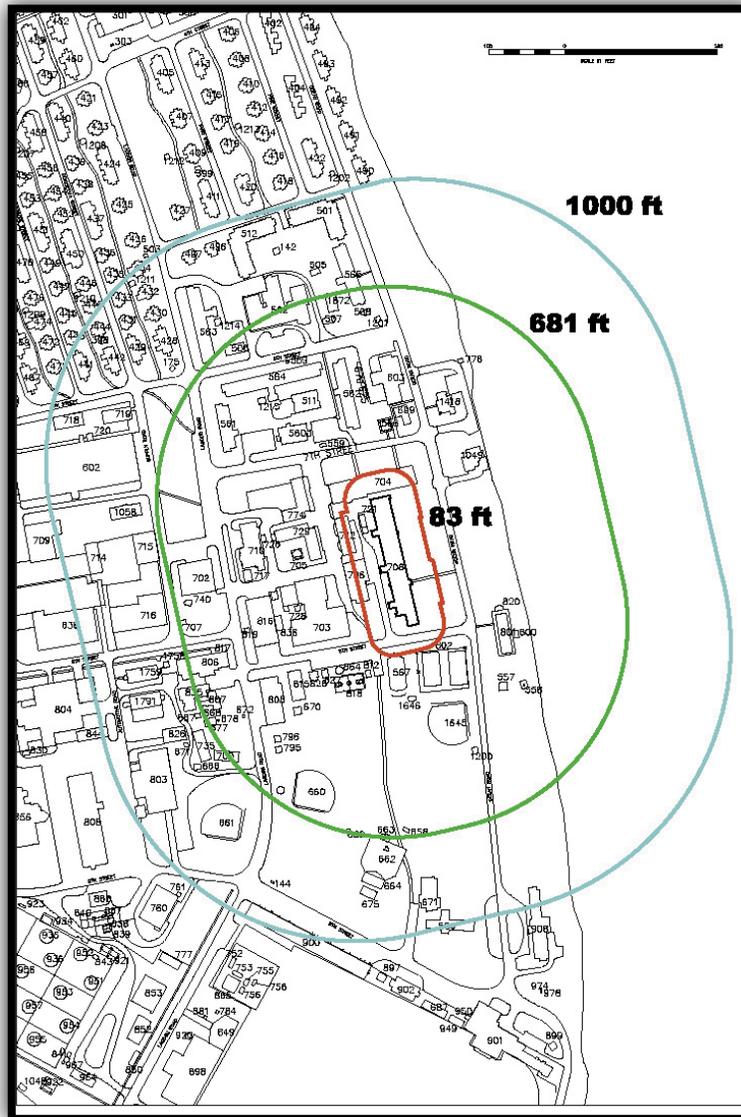

As with all projects on Kwajalein, safety is a primary issue. “Safety issues related to the building fall zone, fragmentation, overpressure, ground shock, ejected dust and safe clearing distances in general have been addressed and coordinated with The U.S. Army Technical Center for Explosives Safety and The Defense Department Explosives Safety Board. If we did not have the utmost confidence that this operation can be conducted safely in regard to the public, we would not be doing it,” Billy Traweek, USAKA Range Safety said.

Traweek added that the island populace will be informed through the loud speaker system and the Siren Warning System when the 681-foot hazard area will be invoked. The explosives priming systems will not be connected and the detonation will not occur until KPD has verified the 681 foot hazard area has been cleared.

All personnel within a 681-foot radius of the PBQ will be evacuated during the explosive demolitions planned for Saturday and July 6. Unaccompanied bachelors living in Macy’s, Ocean, Palm, Shell, Coral, Reef and Sands bachelor quarters will

be evacuated from 1 to 6 p.m. on Saturday and from 7 a.m. to 6 p.m. on July 6, if all goes as planned. “The key word here is plan, so if everything goes as planned, everyone should be able to sleep in their rooms both nights after the explosive demolition,” Craven said. DPW and Kwajalein Range Services are working on a contingency plan to house all affected personnel in case the demolition does not go as planned.

The Café Pacific, Sunrise Bakery and Three Palms Snack Bar are all within the 681-foot radius.

PBQ demolition exclusion area

## DEMOLITION, from Page 3

Meal-card holders will be fed on both days. On Saturday there will be normal breakfast (until 8 a.m.) and lunch (until 1 p.m.) service with boxed dinner served from the multi-purpose room from 5 to 7 p.m. The Three Palms Snack Bar will be closed until the 'all clear' is given on Saturday with a goal of providing grill and pizza service from 4 to 11 p.m. On July 6 KRS Dining Services will provide a continental breakfast to meal-card holders from 5:30 to 7 a.m. in the multi-purpose room as well as boxed lunch and dinner from the same location. Steve Cummings, KRS Dining Services, said there will be a meal-card holder only 'big blast' Emon Beach dinner cook-out from 6 to 7:30 p.m. on July 6. Three Palms will not open on July 6. The dock security snack bar will be used as a support operation to the satellite services offered at Emon Beach and the multi-purpose room.

The Kwajalein Hospital is in the 681-foot closed zone. The hospital will be open for urgent care evaluation from 6:30 to 9 a.m. on Saturday and then will be closed; no personnel will stay in the hospital or adjacent service buildings.

On the blast day the hospital will be closed during hazard hours; no personnel will stay in the hospital or adjacent service buildings. Ambulance and emergency services crews will be stationed at the south end of the safety perimeter. Any patients presenting with medical problems will be triaged/evaluated at this triage station. If problems require urgent/support evaluation that cannot wait until hazard time ends, medical personnel will notify project coordinators of status and need. If deemed safe, the patient will then be transported via ambulance to the hospital with personnel needed for evaluation and management.

On both blast days the downtown area will be closed; this means no tape rentals, no post office services, no beauty salon appointments, no bakery and no shopping. Surfway will be open from 10 a.m. to 8 p.m. with extra provisions and staff available. Building 805, where *The Hourglass*, AFN, Bowling Alley and Grace Sherwood Library are housed within the 681-foot ra-

*The Kwajalein Hourglass*

dius and will be closed.

USAKA's Craven outlined the actual demolition plan, "Starting today KRS will begin pre-blast facilities inspections, installing temporary electrical panels, boarding up windows, training the troops on concrete drilling with their equipment and hanging protective screens over the first floor openings on the west side of the PBQ," he said.

Kwajalein Police Department will begin to set up security barriers. Maps showing the stand off distances, information about buildings and services closures and contingency plans will be distributed to the community via the Intranet, *Hourglass*, AFN and briefings. "On Thursday, the troops will start drilling holes in the selected test column on the first floor of the PBQ for placement of the explosive charge. On Saturday morning the area will be evacuated, the explosives placed, the columns wrapped in protective material and the column detonated. If all goes as expected and the colonel gives the go ahead, the troops will begin drilling the rest of the columns on the first floor for placement of the explosives," Craven said.

If the test blast does not go as expected, the community will be notified through the public address system; the area roped off and the 29th Engineering Battalion will begin mechanical demolition of the PBQ on Sunday.

KPD will be responsible for keeping the area clear of people. "There will be two cordon distances to be aware of. The first is 83 feet from the structure. Before the explosives are emplaced, a cordon with U.S. military personnel securing the area, of 83 feet will be established," Joe Barnes, KPD chief of police said. "The second is 681 feet from the target. Once the 'special mission' siren is blown island wide, a perimeter of 681 feet with road blocks, KPD and U.S. military personnel will be established. Additionally, KPD and the U.S. military, in conjunction with KFD [Kwajalein Fire Department] will

### Sirens:

The special mission siren is a 10-second blast followed by a four-second pause, followed by another 10-second blast followed by a two-minute pause. This cycle will involve two iterations. The next type of siren used will be the evacuate-to-shelters siren. It consists of a warbled siren lasting three continuous minutes. It will announce an eminent detonation will occur within one hour, and will sound again to announce an eminent detonation within five minutes. The final siren will be the familiar all clear siren which is one 20-second continuous blast.

affect a full search and clearing of all structures, facilities and areas inside the 681-foot perimeter. Cooperation from the entire island is critical, and when the warning sirens are blown, it would be helpful that everyone cooperates and proceeds outside of the established perimeter," Barnes said. If someone is discovered in the evacuated area, they will be escorted to the closest checkpoint for their own safety, Barnes added. "This is an installation commander directed mission, and therefore, I feel confident all personnel on Kwaj during this period will cooperate. Our mission is to protect the community, and we will do that to the best of our ability," Barnes said.

"Despite the strain on our department's manpower, we will still maintain active patrols available to respond to any other emergency situation in the event they arise. Trust and know that KPD will still be in the business of the protection and service to our community," he added.

"The island population is requested to abide by any direction given by the personnel conducting the clearing of the hazard areas. Only one pound, two sticks, of dynamite will be detonated during each of the test shots currently scheduled for Saturday," Traweck said. "The public is cautioned that significantly more explosives will be used for the actual explosive reduction currently scheduled for July 6. Eighty-four pounds of dynamite [168 sticks] will be used on the day of the explosive reduction. Do not become complacent after the test shots. There will not be much to see during the test shots. The recommended viewing area for the actual explosive reduction is to the south of the PBQ near 9th street and toward the ocean near the Chapel," Traweck said.

"We do not expect any damage

*Wednesday, June 28, 2006*

to the surrounding buildings. The few possibilities that exist are broken windows, small damage to the exterior of the adjacent buildings due to exploded fragments from the columns and dust," Craven said. In preparation for the explosion, KRS will board up all the windows that are parallel with the PBQ.

"Each column that contains explosives will be wrapped with two layers of geotextile heavy non-woven fabric and two layers of chain link fence. Likewise, the large openings toward the Post Office and covered mall will be covered with the same material to prevent exploded fragments from escaping the PBQ," Craven said. The fire department will hose down the site once or twice daily to reduce the amount of dust being blown from the site due to the trade winds.

"The only air quality issue will be that of concrete dust in the air immediately after the major detonations for the explosive reduction currently scheduled for July 6. The PBQ has been cleared of any potentially dangerous substances, asbestos, etc. All internal walls, floor tiles, suspended ceiling, electrical and

plumbing fixtures have been removed. It is basically just steel reinforced concrete now. The blast will predominately be directed through the building openings on the oceanside," Traweek said.

Dust from the concrete will be present after the blast and may be seen at distances of approximately 1,000 feet depending on the prevailing winds. "Residents within the 1,000-foot arc are advised to either go indoors and remain there from the time the imminent detonation is heard and until the all clear is announced, or position themselves up-wind of the PBQ. The direction and velocity of the wind will be considered before the final decision to detonate the explosives will be made," Traweek said.

The demolition plan could be delayed by numerous issues such equipment failure or breakdown, personnel injuries, incomplete detonation of explosives, etc. "All conceivable issues have been addressed and planned for as well as can be done for this type of process. It is a very dangerous and high-risk job; many unforeseen things can happen," Craven said.

## Singin' a song

Elizabeth Coyle performs Sunday evening at Emon Beach. Coyle is a featured singer with the American Forces Entertainment-sponsored *Lloyd Dobler Effect* band that performed twice over the weekend, Saturday evening at the Yuk Club and Sunday at Emon Beach.

## Sound of music

# Making dulcimers is magic to Hulme

By J.J. Klein  
Reporter

If you have not seen Ken Hulme sitting on the bench at the intersection of Lagoon and Sixth streets strumming his dulcimer, then you are living under a rock.

Hulme, a technical writer with configuration data management, is notorious around this island for his dulcimer playing. He is commonly known as "Dulcimer Ken."

"People don't know my last name, but I understand that someone called the operator and was trying to find 'Dulcimer Ken,' and the operator knew who it was," Hulme chuckled.

What is that thing Hulme is strumming, you might wonder as you do a double-take past him? The mountain dulcimer is a string instrument with a fret similar to a guitar or banjo, but held horizontally on the lap. One hand is used to strum the strings over the sound hole while the other hand pushes down on a chord string with a notar, or stick. There is no traditional shape to the instrument, some are teardrop or hour-glass shaped and some are downright boxy.

In the town streets of Manitou Springs, Colo. Hulme first heard the siren call of the dulcimer and followed the music till he reached a tiny, dusty, patchouli smelling dulcimer shop. The following Christmas Hulme bought a kit, built the instrument and taught himself to play. "The sound of the dulcimer has a haunting, eerie quality to it that appeals to me, and it sounds really good

playing the Celtic-American music I like to listen to," said Hulme, although that is not the only music emanating from his instrument.

Walk past his bachelor quarters and you are likely to hear what Hulme calls "the top of the pops [from] 1965" with a little Metallica and Elvis mixed in to keep things lively.

Thirty years after purchasing that initial kit he is still plucking at the strings, building dulcimers as gifts and for sale, and teaching others how to build their own dulcimers. For Hulme,

building a dulcimer is a very enlightening experience. "To start with essentially a 4-foot by 4-foot fencepost and cut it apart and then re-assemble it into something which makes beautiful music is a kind of magic," he

## COMMUNITY NOTICES

KWAJALEIN POLICE Department will host a Town Hall from 7 to 9 p.m., tonight, in the Corlett Recreation Center, Room 6. The intent of the meeting is to introduce the new KPD leadership team and provide an overview of the department, its responsibilities and functions, and to provide an open forum for questions and answers to any

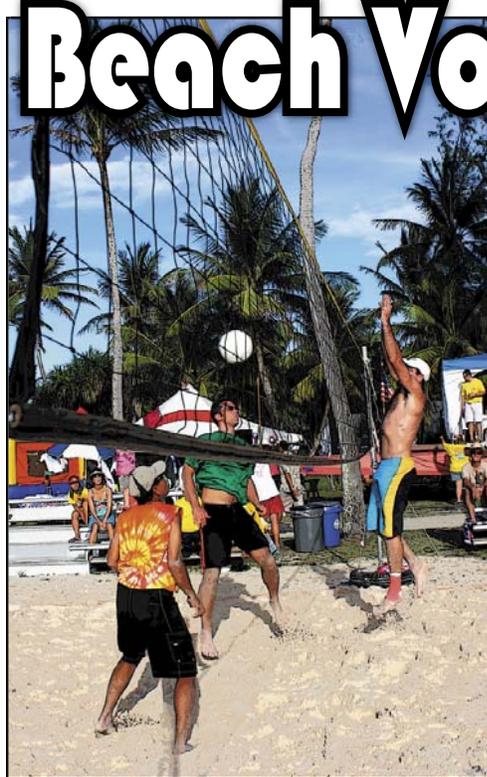

Wednesday, June 28, 2006

# YOUTH COMPUTER NIGHT

is offered for CYS registered children in Grades 1-6. It will be held 5-6 p.m., every Wednesday and Saturday at the Youth Center computer lab. The first night will be tonight. We will play games, make crafts, take photos and much more while using the computer lab. To sign up, call Central Registration office, 52158. Questions? Call Jon Welchman, 53796.

# Beach Volleyball

The Independence Day Beach Volleyball Tournament is scheduled for July 4 at Emon Beach. Co-ed teams of all skill levels are welcome. The registration fee is \$10 per team, and the deadline is Friday at the Community Activities Office Building 805. For more information, call Billy at 53331.

of the community's concerns and/or suggestions on any potential improvement areas.

DURING BARGE operations, tentatively scheduled for Thursday and Friday, the Supply and Marine Department areas, between 6th and 8th Streets and Supply and Marine Roads, are off limits to pedestrian, bicycle and vehicle/equipment traffic. Barricades/caution tapes will be erected at all of these points. Questions? Call 52180/53444/53430.

UNACCOMPANIED PERSONNEL will have a movie and free pizza night at 7 p.m., Friday, in the Adult Recreation Center. Everyone is welcome. *Changing Lanes* is a movie about a minor accident that changes the lives of two men. Sponsored by the Memorial Chapel.

THE ESCORTED ACCESS list is being refreshed. Any foreign nationals who have not been interviewed within one year of Saturday will be removed from the list. If you have not been interviewed within the last year, Friday will be your last chance to remain on the list. If you are removed from the list, you will not have access to Kwajalein. The interviews will begin at 8:30 a.m. and will run until 12:30 p.m. Inform Dock Security personnel upon arriving if you need to be interviewed.

MOORING BUOYS are being placed off Emon Beach for the fireworks barge. All divers, swimmers and boaters are requested to avoid the buoys and anchoring lines. Questions? Call 52182 or 52318.

## 'GOTCHA,' from Page 2

he would not 'send American boys to die in Europe,' that he was planning for war all along.

The government and the War Department were, of course, enraged.

The Assistant Secretary of War John McCloy said, "There's blood on the fingers of whoever leaked this information."

Maj. Laurence Kuter, a War Plans officer said to the *Chicago Tribune's* editor, "There are people here who would have put their bodies between you and that document."

The government chose not to try prosecuting anyone and downplayed the incident. They didn't want to draw anymore attention to the publication than they had to. They hoped that if Japanese or German agents had read the plan, they would think that no American newspaper would really print such super secret documents and that is was all just disinformation.

Leaking the Rainbow 5 Plan could have been a total disaster for the American effort in World War II. It was done simply because the *Chicago Tribune* had an anti-Roosevelt agenda and embarrassing him was apparently more important than the national security.

So what is the *New York Times'* real reason for publishing the information that the government wanted to keep secret?

I believe there are occasions when the public may have a right to know, but doesn't have a need to know. There's a big difference.

If the government asked the paper not to print the story about the bank records, then the paper could have said, "Fine, but we're watching, and if we see any real lawbreaking, then we'll expose it."

Or, if the *New York Times* really thought laws were being broken, then they could have taken whatever in-

formation they had to congress or the courts or other legal authorities and let a legal decision be made without making it public.

There are a lot of things the government has done that many strongly disagree with, and it may well be that the constitution is being violated in some way. I don't know. But printing stories about it and making it public helps no one except those who want to harm us.

The NSA wiretapping and the bank record surveillance are no doubt valuable tools in the fight against terrorists. The bad guys have the edge in the first place. They shouldn't be given any help by tipping them off about what is being done to stop them.

Investigative journalism and freedom of the press is important and if the government is engaged in wrongdoing, it should be exposed. But the media shouldn't jeopardize national security for the sake of a few 'gotcha' stories.

## DULCIMER, from Page 6

said. "Especially the moment when you strum a new dulcimer and hear its voice...each one has its own unique voice."

A unique feature of the dulcimers that Hulme constructs is the one continuous piece of wood, 1/8 inch thick that shapes the sides of the instrument. Ordinarily two pieces of wood are used and attached at the bottom.

But where Hulme really makes his mark is his signature, custom-shaped sound hole. Hulme has been known to cut the sound box in the shape of dolphins, geckos, flowers and eagles. Whatever shape is requested he will try to accommodate. When the build is complete, Hulme will christen each new dulcimer by playing *Amazing Grace* and the Shaker hymn *Simple Gifts*, a fitting beginning for the instrument.

A common response to Hulme's strumming is the request to learn how to play. Answering the call, Hulme has taught a dulcimer building class through the adult and community education and plans to teach another this autumn.

"If a person can sing or hum or whistle a tune and get reasonably close, I can teach them to play in less than half an hour," he said, "the rest depends on how much and hard they work at it."

The students in Hulme's class have beautiful works of art to show for their diligent work at the hobby shop. "All three of the ladies really didn't want to build. They really, really wanted to learn to play. I kind of force them to build," he said laughing, "and they did a wonderful job." The group met June 14 at the Adult Recreation Center to play together, and plans are in the works to do it again.

The first month Hulme was on island, he cobbled together a dulcimer, or what he affectionately calls the "Kwaj music box" as a way to pass the time. He then asked Hemikko Lojkar to have a basket made for the new dulcimer. He took the dulcimer to her home to see if the basket fit the piece, and Roselia Lojkar was taken by the odd instrument. Hulme said "Hemikko told me 'Roselia keeps talking about that weird thing that you play,' so at Christmastime I just gave it to her. So she's my first Marshallese student."

Most people appreciate Hulme's park bench concerts. "There is one girl that comes by all the time and she says it reminds her of being home, with the street performers in the town square," commented Hulme. That girl may be right; Hulme just might be the Kwajalein equivalent of the town troubadour, playing his dulcimer on a starry night for all of Kwajalein to enjoy.

## RTS Weather

**Tonight:** Partial clearing with scattered showers. **Winds:** NE-E at 6-12 knots.  
**Thursday:** Partly sunny with 30 percent chance of showers. **Winds:** NE-E at 8-12 knots.
