

THE KWAJALEIN HOURGLASS

This stone at the Japanese Memorial honors those Japanese soldiers who fell during the battle for the Marshall Islands. It is just one of the many historically significant features Kwajalein Island boasts. For more, see coverage of the Kwajalein Historical Tour on page 4.

COMMENTARY

I hate paperwork. Heaven will be a place where no paperwork exists, no forms need to be filled out and, of course, everything works the first time.

I want to thank everyone who works in Human Resources and Information Services. I'm so glad you are there because I wouldn't do your job for all the tea in China. In fact, if the last two jobs on the planet were in HR or IS, I would live in a cave in Montana for the rest of my life. Your task would test my patience to the breaking point.

I've recently had several encounters with both departments. I've been through the process in the last six months of hiring a priest and hiring a part-time administrative assistant. I would rather have teeth pulled without anesthetics.

Spiritual secrets are no match to the maze of HR rules that must be strictly satisfied to achieve success.

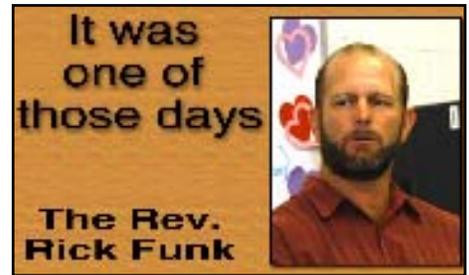

Now, Kathy Ann has departed and I plan to leave in a few months which again has us back in the offices of HR. Recently, they sent me a huge packet of information which describes Kathy Ann's post employment health insurance options. It sits on a stack on my desk labeled "Unsolved Mysteries." I plan on telling Kathy Ann that her only option is to remain healthy until her new insurance kicks in.

Of course, everyone is looking forward to the joyful advent of high speed internet in our homes which hopefully will arrive with Santa on Christmas. Usually, I'm just thankful that my computer has not been

invaded by some errant electron who decided to undo all the wonderful work of yesterday's IS tech.

Do you realize that billions of electrons run around free and unfettered in our machines? A few of them organize and revolt and decide to gum up the works. Then, IS detectives with skills sharper than Sherlock Holmes need to find the culprit and arrest the felon. In the meantime, we wonder "Why does it take 10 minutes for my computer to boot up?"

Sometimes I think I should go back to paper and pencil or maybe a

manual typewriter. I've already started. I have a Kwaj Blackberry. It looks very much like a 3x5 card and a small pen. The batteries never run out and I never have trouble booting it up.

Anyway, I just wanted to say how much I appreciate the HR and IS people. I know they have dozens of regulations to follow and policies to obey and lots of people looking over their shoulder so they do it just right. Theirs is sometimes a thankless challenge. When it works, no one notices. When it breaks, everyone complains. If they got paid by the complaint, they all would be rich.

Sometimes we have special weeks in which we honor different professions such as "Hug a Teacher Week" which is usually towards the end of the school year when grades are due. I would like to recommend July as HR and IS month. I know the month is almost over, but we could still give them a pat on the back. Next time you must visit HR or IS, tell them I sent you with a message of "Thanks!" That way, when I show up, they may be very kind to me and I won't need to fill out any paperwork. That would be like heaven.

THUMBS UP

To everyone that has made this visit to Kwaj so memorable and to the DeCosters - especially Denise - for hosting us. Your hospitality is greatly appreciated! See you all at the next Zooks reunion!

Love,
Paul, Stephanie and
Jessica Brown

THE KWAJALEIN HOURGLASS

The Kwajalein Hourglass is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Kwajalein Atoll. Contents of *The Hourglass* are not necessarily

official views of, or endorsed by, the U.S. Government, Department of Defense, Department of the Army or USAKA. It is published Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

Visiting Colonel inspects hospitals around atoll

Article and photos by Hannah Fronzak
Associate Editor

What would personnel on Kwajalein do if our hospital collapsed? Or was struck by a typhoon? On July 12, visiting COL John Albano arrived at Kwajalein Atoll – in part – to figure out just that.

His mission was to improve both the physical and administrative work environments so that both the medical and range communities can exercise their respective trades without barriers or distractions. Albano plans to factor in the uniqueness of the Kwajalein community and its mission, and to pursue the new paradigm in which the Army goes to war with not only Soldiers, but also Department of the Army civilians and contractors.

Albano is not only an Army flight surgeon, he also has a medical degree from the University of South Dakota School of Medicine, a Master of Public Health from the University of Texas School of Public Health and Aerospace Medicine Training at Brooks Air Force Base. Over the past 23 years, he has worked with aircrew protection, disaster medicine, space operations fundamentals, and Army

systems health hazard analysis, among other things. Most importantly for USAKA/RTS, Albano is also SMDC's first-ever Command Surgeon. His background and new authority allows him to determine our strengths and weaknesses and recommend out-of-the-box solutions for a more efficient delivery of medical care on the atoll.

To that end, Albano spent over a week on his initial visit to Kwajalein Atoll. He arrived on July 12 with the intention of visiting nearby hospital facilities to determine what level of care they offered, whether a solution could be proposed that will help to facilitate successful navigation through current policies, regulations and business practices, and determine what our options would be if a disaster did occur.

During his visit to the Leroij Kitlang Memorial Hospital on Ebeye, Albano was also joined by USAKA personnel Steven Gauthier, Mike Sakaio and Chief Warrant Officer

COL John Albano listens intently as someone explains an aspect of the Ebeye Hospital.

Peter Dancy.

Also joining the group were Mailyynn Lang, the Public Health Care

The reconstructed Island Memorial Chapel, a part of the Kwajalein Historical Tour, is one of four American buildings that survived WWII.

Kwajalein historical tour proven to be beautiful, thought-provoking

Article and photos by Hannah Fronzak
Associate Editor

Almost everyone agrees that Kwajalein is a magical (err, Kwajical) place. We have palm trees in our backyards, can walk to the beach whenever we feel like it, experience some of the best snorkeling in the world, and can actually see the stars in our smog-free sky. But there is an enormous aspect of Kwaj that people take completely for granted – if they’re aware of it at

This tiny statue can be found at the Japanese Memorial Garden.

all. It’s our rich and eventful history. “Sure, I know,” you’re probably thinking, “We were controlled by the Japanese before World War II, when the U.S. military seized control of the island in a relatively short but probably still bloody battle. What else is

new?”

As anyone who has ever been on the Kwajalein historical tour will gladly tell you, a whole lot more is new. Our island is teeming with fascinating little pockets of history that you might ride past every day and not even notice. To that end, two employees of the Hourglass staff who – like you, perhaps – have been here for a while and started to take things for granted, took the Kwajalein Historical Tour last Tuesday with the intention of learning just what our tiny island has to offer. What we discovered may surprise you.

The tour, which can be taken unaccompanied or with a guide, starts with a pamphlet of information that can be picked up from the Community Activities office next to the library. The pamphlet begins with a history of the island before WWII occurred, followed by the events leading up to the U.S. military force’s invasion of the Marshall Islands, code named “Operation Flintlock.” After reading the brief but intense history, we were ready to officially begin the tour.

The first stop was the Marshallese Cultural Center, located in the field across from the airport terminal. Unfortunately, we quickly discovered that the Cultural Center was closed for the summer, so we snapped a few pictures of the outside and were off again, this time to the Japanese Air-Raid shelter, which is a con-

This ammunition bunker was just one of many defensive structures that was built for WWII.

One of several bunkers that can be found around Kwajalein.

crete, white-painted building located across the street from the Fire Station. It didn't look like much, and when we read the pamphlet description, we found out why. At the time of the war the Japanese High Command expected the U.S. Military to concentrate their attack on surrounding atolls. Therefore, many of their defenses on our atoll were weaker than those on surrounding Japanese-controlled atolls.

The next stop on the tour was simply a marker installed to identify the area where the first day's fighting took place. After pausing a few minutes to look out at the field beyond the marker, we continued down the road to the intersection of Lagoon and Olympus drive, where two towering trees crown the Japanese memorial. This memorial looks simple but actually is filled with small mementos which pay tribute to the Japanese soldiers who died during Operation Flintlock. The front of the memorial stone has Japanese characters on it, and the back reads "In memory of those gallant men who fought and died for their country at the Marshall and Gilbert Islands during the Second World War. May they lie in peace."

Next we stopped to see the beaches used for the landing of our military forces. The island was significantly expanded on both the western and northeastern tips after the war, so the "beaches" are now all fields, but the significance remains the same.

Other stops on the tour included the area where Japanese forces attacked at night, an ammunition bunker, the only surviving Japanese Concrete Rifle Pit, The Island Memorial Chapel, Richardson Theater (originally built using volunteer labor in 1944), Ocean View Club, Bunker Hill and the Commander's Residence, which was actually first built as an officer's club.

Overall, it was a great tour that I would recommend to anyone who is new here or whose knowledge of history might be a bit rusty. The only downfall is that the tour makes its way down to the end of the runway and back up to Bunker Hill on the north side of the island, so be sure to gear up for a somewhat time-consuming – and sweaty – ride.

This wreath was placed underneath one of the trees at the Japanese Memorial.

A munitions storage chamber, located ocean-side of the end of the runway.

THE ZOOKS TAKE THE STAGE

The Zooks belt out some tunes during their 10th Anniversary reunion concert.

Saxophonist Keith Peacock pauses to take a breath at the Zooks reunion on July 18.

The Zook's 10th-Anniversary Reunion Concert was held at the Vet's Hall on July 18. Hundreds of people showed up as the night progressed to hear the band perform tunes such as *Who Do You Love?* and *25 Or 6 To 4*.

For more background and full coverage on the Zooks, please refer to article by Randy Razook in the July 10 issue of the *Hourglass*.

Pianist Billy DeCoster and guitarist Paul Brown concentrate on their instruments at the Zooks concert on July 18.

Singer Gregg Grundon woos the audience at the July 18 reunion concert.

It didn't take long for a crowd to gather at the Vet's Hall for the Zooks reunion concert.

Administrator in Majuro, and Centers for Disease Control and Prevention representatives Nancy Fasano and Allison Bybee. Fasano works specifically with the National Immunizations Program. Bybee attends Yale and is interning for CDC via a program affiliated with her school. Bybee is currently assigned in Majuro with Lang, but traveled to Kwajalein to visit facilities around the atoll. Tommy Milne, the administrator of the Ebeye Hospital, was the group's guide for the visit to Ebeye.

Now that the tours are complete, Albano stated that he fully intends to engage 'the system' in order to achieve a positive resolution that will help to provide increased medical support for the Kwajalein community, including the construction of a new hospital facility.

Although he was not yet able to disclose the details of his plan of attack, Albano admits that the effort will be consuming. In the meantime, Albano states that funds have been reserved for the repair of the current hospital until a new hospital can be built. Albano confirmed that SMDC is committed to provide Kwajalein a new hospital and that the entire work force is given access to the full spectrum of medical care. The fact that USASMDC/ARSTAT authorized a first-ever command surgeon is evidence of that commitment.

Hospital administrator Tommy Milne describes some of Ebeye Hospital's assets and limitations to COL Albano and Center for Disease Control representatives Nancy Fasano and Allison Bybee.

On the return trip, Mike Sakaio teaches Allison Bybee, who is interning with CDC, some of the atoll's geography.

COL Albano and Tommy Milne laugh as a hospital patient teases them at the Ebeye Hospital on June 16.

“Kwaj World Cup” draws competitors from all ages

The “Kwaj World Cup,” a part of the summer fun series hosted by the Community Activities office, was held from July 13-22. To register, teams of five signed up and picked a country to represent, which was also their team name.

The series culminated in a tournament held on July 21 and 22. The winner was Team Germany with an 0-5 record. Team Marshall Islands came in second with a 3-2-1 record.

Laura Price lines up a pass.

Carys Price plays with a ball.

Joe Logan defends his goal against the opposing team.

Teams line up behind the half-court line as New Zealand team member Stan Jazwinski takes a penalty kick for his team.

Kenny Leines takes a shot on the goal.

Rick Funk scoops the ball away from competitor Brandon Price.

Competitors fight for possession of the ball.

Ex-Kwajalein resident Robert White (1965-2010) dies

Robert H. "Whitie" White, Jr., a native of Woburn who had lived in Winchester in recent years, died suddenly on June 30 after suffering a massive heart attack while playing golf in New Hampshire. He was forty-five years of age.

Rob was born in Woburn, the son of Robert H., Sr. and Jerry (Larkin) White. He grew up in North Woburn and attended the Linscott-Rumford, Kennedy Middle School, and graduated from Woburn High School with the Class of 1983. He played football in high school and held the record for the longest punt for the Woburn High football team. After high school he continued his education at Bridgton Academy in Maine and went on to graduate from Oklahoma State, where he was the kicker for the football team.

Rob initially worked for A-1 Tower Company, along with his father. He lived in Kwajalein, part of the Marshall Islands, for seven years while working for MIT Lincoln Labs on the world's largest

antenna/satellite. Also employed by Raytheon, he eventually became a partner in the mid-1990's in Advanced Welding of Woburn, where he was a project manager.

He loved all sports, including hockey, football, baseball, street hockey, and especially golf. Nothing was more important to Rob than his two daughters, Madison and Mikinlee.

He was an attentive and devoted father with a huge heart and a great sense of humor. His family was his priority in life and he will be remembered as a loving son, father, brother, uncle and friend.

Surviving along with his daughters, Madison and Mikinlee, are his parents, Robert H. and Jerry (Larkin) White of Woburn, and two sisters, Jodie White of Reading and Kate Stone and her husband Dan of Westford.

He was also the cherished uncle of Catharine Lee Mead and Chloe and Daniel Stone.

Arrangements by the Lynch-Cantillon Funeral Home, 263 Main Street, Woburn.

Draft Environmental Assessment for Conventional Strike Missile Demonstration

The United States Air Force is proposing to conduct a single experimental flight test of the Conventional Strike Missile in the 2012 timeframe. The CSM Demonstration is part of the incremental development and demonstration of potential Conventional Prompt Global Strike systems being considered by the Department of Defense for future fielding.

The test vehicle would be launched from Vandenberg Air Force Base, Calif., using an existing rocket booster. Following booster separation, the test vehicle would glide at hypersonic velocities in the upper atmosphere above the Pacific Ocean prior to impact at one of two pre-designated, alternative locations: (1) a land site on Illeginni Islet at the US Army Kwajalein Atoll/Reagan Test Site in the Republic of the Marshall Islands; or (2) a floating platform placed in the Broad Ocean Area north of USAKA/RTS. Under the National Environmental Policy Act of 1969 and its implementing regulations, the USAF prepared an Environmental Assessment to analyze the potential environmental impacts from the CSM Demonstration flight test activities. Following analysis of the Proposed Action, the USAF determined that no significant impacts to the environment are expected.

The Draft EA, including the Draft Finding of No Significant Impact, is available for a 15-day public review period from July 17 to August 2, 2010. The document is available for review at: Alele Museum, Library, and National Archives; Grace Sherwood Library; the Roi-Namur Library and via the Internet at <http://www.csm-ea.com>. Submit written comments to: SMC/EAFV, Attn: Leonard Aragon, 483 North Aviation Boulevard, El Segundo, Calif., 90245-2808. Comments may also be submitted via facsimile at (310) 653-1210, or by e-mail at Leonard.Aragon@losangeles.af.mil.
