# Underwater Photos of the Week

## HOURGLASS REPORTS

This silver-colored Christmas tree worm (*spirobranchus giganteus*) was photographed by Lynda Reynolds on the oceanside of Ennlylabegan (Carlos).

While typically no larger than about 3.8 cm in length, the species can be easily spotted due to its unusual shape, resembling of course a Christmas tree, and striking colors.

They normally don't ham it up for the camera, though. Hyper sensitive to passing shadows and approaching objects, the worms don't keep themselves exposed for too long.

"This little guy kept sucking itself into the coral," Reynolds says. "I had to sneak up on it to take this picture."

According to writers at [www.marinebio.org](http://www.marinebio.org), the colorful plumes that make up the worm's tree-like features are actually tentacles that it uses to both feed and respire. While the plumes outside the coral take care of the hard work, the rest of the worm spends all of its time safe inside the coral.

## CHANGES TO GSK SALES

Due to the lack of statutory/regulatory authority for GSK sales KRS will no longer be able to sell goods and services through GSK sales to individuals and private organizations. This direction will not affect retail facilities, including billeting, dining, bakery, Surfway/Third Island Store, medical, dental, beauty & barber, child care, clubs (Outrigger, Country Club and Ocean View), laundry or postal services.

This change will also not affect the sales of fuel, kerosene, water and other utilities which are allowed pursuant to 10 USC § 2686 to private orga-

nizations and individuals.

This change will also not affect the sales to the RMI government as allowed pursuant to 10 USC § 2357.

Further, this direction should not affect sales and services provided through MWR-like facilities such as Community Activities rentals, the hobby shop or small boat marina.

The garrison will work with KRS and AAFES to develop alternative retail options and will provide periodic updates to the community."

## THE KWAJALEIN HOURGLASS

The Kwajalein Hourglass is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Garrison-Kwajalein Atoll. Contents of the Hourglass are not necessarily official views of, or endorsed by, the

U.S. Government, Department of Defense, Department of the Army or USAG-KA. It is published Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

# Earthquake rattles Papua New Guinea

ARTICLE BY JORDAN VINSON  
ASSOCIATE EDITOR

A magnitude-7.5 earthquake shook up the island nation of Papua New Guinea Monday. Hitting at a depth of about 20 miles below sea level, the quake centered on a point 34 miles south-east of Kokopo, a town of more than 20,000 residents on the island of New Britain. The event is the strongest recorded so far in 2015.

The U.S. National Weather Service's Pacific Tsunami Warning Center, located at Ewa Beach, Hawaii, issued a tsunami threat shortly after, warning that tsunami waves were possible along coasts located within 621 miles of the quake's epicenter.

While Papua New Guinea coastlines were expected to see tsunami waves 1-3 meters in height, nations farther away, such as the Marshall Islands and Japan, were estimated to experience a negligible surge. Within three hours, the center downgraded the tsunami threat, and no injuries or damage from ocean surges were reported. There have also been no reported injuries from the earthquake itself.

According to the United States Geological Survey Earthquake Hazards Program, the earthquake occurred because of thrust faulting in the region in which the Pacific tectonic plate slides over the subducting Australia plate.

"At the location of the earthquake, the Australia plate moves towards the east-northeast at a velocity of 105 mm [per year] with respect to the Pacific plate, and begins its subduction into the mantle beneath New Britain and New Ireland at the New Britain Trench south of the earth-

quake," the agency reported.

The boundary between the Pacific and Australia plates in the Papua New Guinea region is a hotbed for strong earthquakes. In the past century alone 36 quakes reaching a strength of more than 7 magnitude have hit the area. 22 of those recorded an intensity of at least 7.5 magnitude, capable of unleashing widespread, heavy damage.

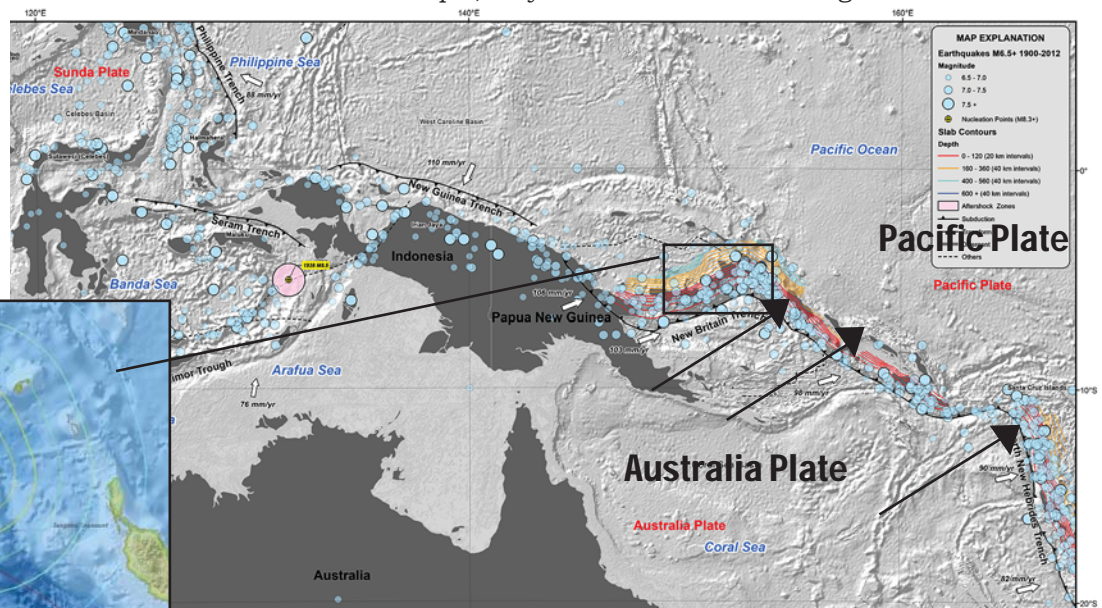

Farther along the boundary to the east, quakes are also prevalent. In fact, it wasn't even nine hours after the initial quake Monday when a separate incident—this time occurring about 62 miles east-north-east of Hihifo, Tonga—struck about 10 miles under the sea level at the plate boundary.

Fortunately, because of the general remoteness of the islands that lie along the boundary, these quakes seldom cause shaking-related injuries or fatalities, USGS has reported. A magnitude-8.2 earthquake in 1996 that centered on the Papua province of Indonesia, was an exception: 166 people died due to the shallow thrust fault event.

The overriding concern continues to be the threat of tsunamis—the damage of which can strike thousands of miles away, where population densities and development are greater. To maintain a leg up on any possible tsunamis in the region, the Pacific Tsunami Warning Center and other agencies like USGS keep watchful eyes on quakes and any dangerous tsunamis that might follow in their wake.

It's important to remember that tsunamis are generally not a significant worry in nations like the Marshall Islands, the geological features of which do not allow a massive buildup of waves along the beaches. The event Monday, for example, only amounted to a wave height of 32 cm.

Right: A USGS image detailing the intense concentration of earthquakes along the boundary of the Pacific plate and the Australia plate being pushed beneath it. Below: a Pacific Tsunami Warning Center image depicts the exact location of the magnitude-7.5 earthquake that struck Papua New Guinea Monday.

# SPRING BREAK

Clockwise from top left: AJ Hepler gets a push in the swings from his dad; Brandon McAfee, of Flashback & Friends, performs a Beatles song; Pure Polynesia perform for the crowd; residents and friends enjoy the music; kids and parents splash in the lagoon; Jax Gideon enjoys his first Spring Break Music Fest with his mom and dad.

# MUSIC FEST

ARTICLE AND PHOTOS BY JORDAN VINSON  
ASSOCIATE EDITOR

About 300 residents of Kwaj and Roi, along with friends from neighboring islands and visitors from across the planet, flocked to Emon Beach Sunday for the 15th annual Spring Break Music Fest.

An annual rite on the garrison, the festival boasted a strong lineup of bands, headlined by Radar Love,

that kept the audience going from 1-9 p.m. Apart from slick dance acts by Mrs. Karen's Tiny Dancers, the lineup featured everything from Hawaiian-style tunes by Pure Polynesia and rhythmic drumming beats by the Drum Down the Sun gang, to Beatles hits by Flashback & Friends and classic rock by Insane Gecko Posse and Radar Love.

Also part of the festival was a suite of activities for gangs of restless island children: Kwajalein's famous dunk tank, turns on slip-and-slide and bounce house inflat-

ables and swimming in the lagoon.

Many of the adults took the opportunity to try out a few of the local homebrews that Kwaj residents brought out to the beach and set up shop at one of the beach's many grills to barbecue and enjoy some sun.

To wrap it all up, some residents stopped by the vendors tent to purchase some discounted swag from the Kwajalein Amateur Radio Club, the Kwajalein Scuba Club, the Kwajalein Yacht club and more. For highlights, see page 5.

Left: Flashback & Friends perform at Emon Beach Sunday. Page 5, first row: Troy King and Rachel Harris, of Black Beard Brewing, dole out samples of their homebrew to festival goers; Pure Polynesia perform. Second row: Sean Hess takes his turn getting dunked; Nova Miller enjoys her first Spring Break Music Fest; 250-300 Kwaj and Roi residents kick it at the festivities. Third row: Dancers perform for the crowd; Kwaj residents Sabrina Mumma and Patrick Ward relax with some snacks while watching the bands play. Third row: Gavin Pulley screams down the slip-and-slide inflatable; Nate Jones and Michael Dougherty sample homebrews made by Wes Kirk and Mark Fredericks. Bottom row: Mason Kilgore gets his swing on with buddies; dozens of other residents sample brewers' homemade libations. Far right: a resident shops at the vendors tent.

# REDSTONE ARSENAL SCIENTISTS TALK INNOVATION AT ROUNDTABLE

ARTICLE AND PHOTOS BY JASON CUTSHAW  
SMDC PUBLIC AFFAIRS

REDSTONE ARSENAL, Ala. -- A group of senior Team Redstone scientists came together to share ideas and discover ways to improve technology with goals of supporting the Warfighter and defending the nation at the quarterly Chief Technology Officer Roundup March 20.

Dr. Steve F. Pierce, chief technology officer, U.S. Army Space and Missile Defense Command/Army Forces Strategic Command, began the quarterly meeting with all CTOs on Redstone Arsenal to provide a forum for the senior scientific officers for each command to come together and glean information from each other.

Participating in the CTO Roundup were technology officers from Army Materiel Command; USASMD/ARSTRAT; Missile Defense Agency; NASA; Program Executive Office -- Aviation; Program Executive Office -- Missiles and Space; Missile and Space Intelligence Center; Defense Acquisition University; Threat Systems Management Office; and others located on the installation.

"This started back in the summer," Pierce said. "I had an idea to get all of the chief technology officers as well as science technology directors located at Redstone Arsenal together, because in my mind we have a very unique situation on the installation. We have got an awful lot of high technology-focused organizations, so why not try to leverage that."

"We want to leverage efforts that are already going on and to take advantage of core competencies in all of our organizations here," he added. "SMDC has core competencies in areas like directed energy, space and high altitude technologies, and there are related efforts going on at AMC, NASA and others. So why not try to leverage each other and take advantage of each other's core competencies. That is the whole idea of the efforts behind the CTO Roundup."

Pierce said every meeting is held somewhere differently. The first meeting was at Defense Acquisition University; the second was hosted at the Threat Systems Management Organization; and the current one was held at the MDA. They will continue to rotate so that everyone has an equal seat at the table.

"We have to be able to link together different efforts going on around the installation. We are all responsible, not just for development and acquisition of technology, but also for combat development and force development," Pierce said. "We want to look at and share technologies that are out there. A lot of that ties into the intelligence of what other organizations are doing. We need to be more proactive than reactive and to start looking ahead at what we can do."

"A goal is to provide the capabilities that enable our forces out there to be better," he added. "We need to make sure that we keep up with the technology we have currently, and then look forward to see what potential there is out there in technology that can help our capabilities to provide support to the Warfighter."

In each of the commands, science and technology officers lead in the development and set direction for weapon

Team Redstone chief technology officers came together to share ideas and discover ways to improve technology with goals of supporting the Warfighter and defending the nation at the quarterly CTO Roundup on Redstone Arsenal, Ala., March 20.

systems and cutting-edge technologies. With the responsibility to lead their respective organizations, they are using the CTO Roundup to gain insights and different perspectives from their peers.

"We hope to be able to make the best use of the resources we have available here in Huntsville to be able to solve some of our problems," said Dr. David M. Burns, Missile Defense Agency science and technology officer for advanced technology. "We each have unique test facilities. We can come together here, share ideas and hopefully be able to cut costs because we don't have to travel to meet like this. We have smart people all over Team Redstone, and when we have problems, it is great to be able to go to our multiple organizations here and try to see if there is a new solution for it."

"I always enjoy learning something, and I always learn something in these meetings," he added.

Pierce said the roundup has been very positive. At the last meeting, he said, participants said they needed to formalize the meeting so that it is ongoing and they are currently working on a memorandum of agreement.

"I believe we have a number of great capabilities around Team Redstone," said Daniel Schumacher, NASA director of science and technology at Marshall Space Flight Center. "One of the things we want to see is that there is collaborative technologies that we can work on together. We are looking for opportunities to maximize the use of capabilities in various areas."

"This is my first time at the roundup," he added. "This area has one of the highest percentage of people with PhDs for a city in the country, so it is one of the most 'cerebral' places you will find in the country. The interaction of missile technologies, rocket technologies and satellite technologies that we have here today is a great opportunity to interact in both a formal situation and informal as well. We should have been doing this for a long time."

# Six Sigma Yellow Belt recipient recognized

## HOURGLASS REPORTS

**K**RS would like to recognize Joann Hermon who recently achieved a Six Sigma Yellow Belt certification. She is the assistant store manager at Surfway. To complete certification, Joann attended classroom training to learn the Six Sigma tools and then worked with her project team to establish a process management system. Specifically, Joann and her team studied the process to receive and stock fresh produce at Surfway. They successfully measured the process performance and determined the critical inputs. Please say jerammon (congratulations) to Joann for the hard work she put into achieving her Six Sigma Yellow Belt certification!

Six Sigma is a process management and process improvement methodology. Process management seeks to measure process inputs and outputs, which allows for data-driven decision making. Process improvement seeks to close the gap between actual process performance and customer requirements.

Joann Hermon is presented a Six Sigma Yellow Belt certificate by KRS President Cynthia Rivera, right, and KRS Deputy Project Manager for Community Services Kevin Chalmers, left.

# KWAJ KIDS BEHIND THE WHEEL

## HOURGLASS REPORTS

**K**ids from the Child Development Center on Kwaj recently took a field trip to hang out with the folks at the Automotive Department, tour some of the Automotive facilities and chat with firefighters and EMTs with the Kwajalein Fire Department. One of the kids' favorite parts of the day? Taking the opportunity to climb behind the wheel of the KFD fire engine.

Nancy Gondringer, an employee with the Automotive Department said that it was her first experience hanging out with some of the island's youngest residents.

"They're so funny," she said. "I can't believe how cute they are. I'm glad they had fun."

**TOP LEFT:** Firefighter Clarence Beal helps children into some protective gear. **BOTTOM LEFT:** Aubrey Anderson is dwarfed by the fire-retardant suit she has tried on. **RIGHT:** Children take turns behind the wheel.

## DISPATCH FROM ROI

# Jim Thomson beats golf odds

### HOURGLASS REPORTS

Roi golfer Jim Thomson scored a hole-in-one on the Roi-Namur Golf Course March 15. Thomson accomplished this elusive feat using a 5-iron on the 190-yard par-3 number 10 hole. His accomplishment was unique in a number of ways because it was:

- Thomson's first hole-in-one
- The first hole-in-one from the number 10 elevated tee box
- The first hole-in-one during a "Good, Bad and the Ugly" tournament

The odds of making a hole-in-one vary depending on the source and the numbers used for calculating the odds, but regardless of how the odds are calculated, Thomson certainly beat them.

- In 1999, Golf Digest reported, "One insurance company puts a PGA Tour pro's chances at 1 in 3,756 and an amateur's at 1 in 12,750."
- Ireland's National Hole-in-One Club puts the odds a little longer for one ace: "The estimated odds of acing a hole with any given swing are 1 in 33,000."
- In 2000, Francis Scheid, Ph.D., the retired chairman of the math department at Boston University, calculated the odds of an average player acing a 200-yard hole as 150,000 to 1.

## NEED TO UPDATE YOUR CONTACT INFO IN THE GARRISON DIRECTORY PHONEBOOK?

The process is very simple. Simply shoot an email to Shawn Kelley at [shawn.g.kelley.ctr@mail.mil](mailto:shawn.g.kelley.ctr@mail.mil). You may also give him a call at 51127.

## Residents are encouraged to maintain up-to-date emergency preparedness instructions

It's important to have the latest, most accurate information relating to disaster plans, evacuation plans, locations of storm shelters—both on Kwajalein and Roi-Namur. It's easy to ensure you and your friends and family know what to do in event of an emergency.

1) Visit USAG-KA Web. 2) In the Web Links list at left, click on "Phonebook." 3) You'll find all the information you need in the "Community Safety Information" section.

**HELP WANTED**

KRS and Chugach listings for on-island jobs are posted at: Kwajalein, Roi-Namur and Ebeye Dock Security Checkpoint locations; outside the United Travel Office; in the Roi Terminal/Post Office; at Human Resources in Building 700 and on the USAG-KA webpage under Contractor Information>KRS>Human Resources>Job Opportunities. Job listings for off-island contract positions are available at [www.krsjv.com](http://www.krsjv.com).

**Religious Services****Catholic**

- 5:30 p.m., Saturday, Small Chapel
  - 9:15 a.m., Sunday, Island Memorial Chapel
  - Roi-Namur service, 4:45 p.m., second and fourth Friday of each month. Appointments with Fr. Vic available after dinner.
- Stations of the Cross:** 6 p.m. March 27 in the small chapel. A simple supper of bread and soup will be offered afterward.

**Blessed Sacrament Holy Week Schedule:**

- 7 p.m., April 4: Holy Saturday, Easter Vigil Service
- 9:15 a.m., April 5, Easter Sunday Mass

**Protestant**

- 8 a.m., Sunday, Island Memorial Chapel
- 9:15-10:15 a.m., REB, Sunday School
- 11 a.m., Sunday, Island Memorial Chapel
- 6 p.m., Thursday, Christianity Explored, quarters 203-A (Robinson's).
- 6:30 p.m., Friday, Roi Chapel

**Easter Services Schedule:**

- 6:30 a.m., April 5, Emon Beach: Easter Sunrise Service and Baptisms
- 11 a.m., April 5, Island Memorial Chapel: Easter Service

**Latter-day Saints**

10 a.m., Sunday, CRC Room 3  
Contact the chaplain's office at 53505 for more information.

**FOUND**

TABLET COMPUTER in black case, with charger and wireless mouse. Left at Zamperini Dining Facility Wednesday morning. Call 53425 to provide detailed description of item before claiming.

**PATIO SALE**

Moving sale, 8 a.m.-noon, today, at Qtrs 462-B.

**FOR SALE**

SEALIFE 1400 CAMERA, strobe with diffuser, video light, additional camera battery and charger, 10 moisture packets, buoyancy weight with mounting screws, spare housing o-ring, two 16GB SD cards, Softcase and Pelican 1200 case, set of travel adapters, \$1,000. Call 56499.

**COMMUNITY NOTICES**

COME OUT TO THE KSC Underwater Easter Egg Hunt at 2 p.m., Sunday, at the Emon Dive Shack. This is a family-oriented event for divers and snorkelers of all ages! Show up early to sign in. Prizes will be awarded.

EASTER EGG HUNT is at 4 p.m., Sunday, at the Rich Theater. Open to kids through 6th grade. Easter Bunny Photo Op following the hunt. Parents, bring your own cameras. Questions? Call 53331.

LOOSEN UP THOSE PIPES and join us for Karaoke at 7:30 p.m., Sunday, at the Vet's Hall. Questions? Contact Jan Abrams or Mike Woundy.

EMPLOYEE ASSISTANCE PROGRAM classes for April: Bariatric Support Class meets Tuesday; and Smoking Cessation classes are ongoing. Classes take place from 4:45-5:30 p.m., in the hospital conference room. Call EAP at 55362 with questions.

KWAJALEIN SCUBA CLUB'S Annual Safety Meeting is scheduled for 7 p.m., Wednesday, at the MP Room. Dues are due at this meeting. Club officers will also be nominated at this meeting. The meeting is mandatory for all club members. A makeup meeting is scheduled for May 13.

PLEASE JOIN US for Quizzo at 7:30 p.m., Friday, at The Vet's Hall. Neil Dye will be hosting. Questions? Contact Neil Dye or Mike Woundy.

A BLESSED SACRAMENT confirmation mass, scheduled for 4 p.m., April 12, will be officiated by His Excellency Neal James Buckon. This 4 p.m. mass will replace the 9:15 a.m. morning mass.

**LIFEGUARDS NEEDED**

**American Red Cross Lifeguard**  
Class registration is open now through April 9. Session dates are April 10-May 4. Pre-requisite swim on April 10. Classes on Saturdays and Mondays. Participants must be at least 15 years old. Cost: \$ 150 and includes book, pocket mask and certification fees. Fee due after pre-requisite swim. For questions and registration, contact Mandie at 51275.

KWAJALEIN ART GUILD Spring Arts and Crafts Fair will be 10 a.m.-2 p.m., April 13, at the MP Room. Artists, crafters and vendors: Sign up for your table. Email [kwajartguild@gmail.com](mailto:kwajartguild@gmail.com) for table assignments.

ANNUAL KWAJ PHOTOGRAPHY Exhibit will be 10 a.m.-2 p.m., April 13, at the MP Room, in conjunction with the KAG Spring Craft Fair. Kwajalein Atoll residents display their photographic talents! Community members (you!) vote for the best photos for the 2016 Kwajalein Calendar. Photos must be from Kwajalein Atoll and be submitted no later than Friday. Contact Linn Ezell for instruction packet and entry form at 51990.

E-TALK: Anyone who, for any reason, needs to dig or disturb the ground deeper than six inches below the surface needs to obtain a dig permit. Permit applications are available by contacting the ES&H Office at 51134.

SAFELY SPEAKING: Use reciprocating saws safely. Always wear the correct PPE, and inspect the saw before use. Never place your finger on the trigger until you are ready to make the cut. Secure the material in a clamp or vise, leaving both hands free to operate the tool.
