GARRISON CHRISTENS NEW B-BOATS

HOURLASS REPORT

The U.S. Army Garrison-Kwajalein Atoll community christened two brand-new recreational B-boats into service last week. Commander Col. James DeOre Jr. and Command Sgt. Maj. Angela Rawlings had the honor of splashing down the 23-foot-long Cobia 237s with bubbly before taking the boats on their maiden voyages in the lagoon Thursday, Aug. 24. The boats are the first two of 10 set to arrive in the coming months.

In a short speech at the Kwajalein Small Boat marina, Chief Warrant Officer 3 Dave Casbarra told a crowd sheltering from a searing early-afternoon that the gods of the ocean would be pleased with the garrison's show of respect Thursday.

"It was widely believed that a Roman king of the sea, Neptune, and a Greek ruler of the sea, Poseidon, lived on the floor of the ocean in palaces," Casbarra told the crowd. "These gods of the sea would assure safe passage over the Seven Seas to all sailors that followed their doctrine and respected their protocols."

The B-boats are unlikely to transit any of the Seven Seas. But they are sure to make a substantial impact on the quality of life of Kwajalein and Roi-Namur residents, many of whom enjoy fishing, scuba diving and float trips.

While the K80 "StanLove" vessel will remain at Kwajalein, the R82 "Jim Bennett" headed to Roi-Namur this week.

In a short speech, the colonel said that naming the boats after late USAG-KA residents, Stan Edwards and Jim Bennett, was a fitting tribute to honor their legacies.

"We do this in memory of our beloved friends, Jim Bennett and Stan Edwards, two cherished members of our family, who each in his own way looked over their friends and families and over the greater Kwajalein Atoll community," DeOre Jr. said. "It is fitting that these two men are remembered in this fashion."

THE KWAJALEIN HOURLASS

The Kwajalein Hourglass is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Garrison-Kwajalein Atoll. Contents of the Hourglass are not necessarily official views of, or endorsed by, the

U.S. Government, Department of Defense, Department of the Army or USAG-KA. It is published Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

ISLAND SERVICES UPDATES

HOURLASS REPORT

ENTERTAINMENT AND SPORTS

- **Labor "Yay" For Fireworks!** A community fireworks display is planned for Labor Day, Sept. 4. Grab the lawn chairs and hit Emon Beach for a day filled with music, activities and sunshine. To ensure safe staging of this year's pyrotechnics, certain lagoon-side areas will be closed to commuters and pedestrians. These closure notices can be found on the Roller and in the Hourglass.
- **Really Teed Off.** Thanks to the Quality of Life Committee and Community Services, the Roi Golf Course and the handicap recertification with the U.S. Golf Association is being reviewed by subcontracts and should occur before current certification expires.
- **Scene Change.** While the Richardson Theater awaits sound system repairs, the Yuk Theater is bringing back double feature movie night. Families and friends should check the TV Guide and Coconut Wire for show listings.

IN TRANSIT

- **Go Fish.** Prepare to swoon: A total of 10 new Cobia 237CC boats with twin Yamaha 115 engines will arrive for recreational use on Kwajalein and Roi-Namur in the upcoming months. The boats will be shipped as they are completed. Both boats christened in the Aug. 24 ceremony will be in service for Labor Day weekend.
- **Let It Glow.** If you see a street light or other Public Works issue around the island, please help us resolve the issue by reporting it to the Facilities Help Desk at 53550.
- **Look Out For Kids.** The back to school season means more young cyclists make regular commutes on major thoroughfares. All vehicle operators and travelers should exercise caution on the roads and adhere to all traffic stops and school crossing areas.
- **Think and Drive.** Quality of Life's new rules were updated in August and published in the Hourglass. To ensure a safe and smooth rental, drivers should check out the new regulations to see what's changed.
- **Walk, Don't Ride.** Marine Road is closed 24-7 to bike and vehicle traffic to accommodate Marine Department operations. However, a foot path through this area is available to pedestrians. Thank you in advance for walking your bike.

FOOD NEWS

- **The New Guy.** Congratulations to Derrick Lemmie, our new Surfway manager.
- **Slices.** Antony's Pizza will continue to operate with supplies out of Korea. In a prior An AFFES update, it was announced that Dominos will not be coming to Kwaj.
- **Chowtime Chatter.** The council addressed concerns regarding Zamperini Dining Facility. In particular, why full meal privileges are not extended to all fulltime contract island staff and the reactions of ZDF patrons toward serving staff in the wake of the dining hall's menu and serving changes. Those changes have been publicized in previous issues of the Kwajalein Hourglass. Any questions regarding dining privileges should be addressed to KRS Human Resources. Those who have questions regarding dining services are welcome to address them to a ZDF shift manager.

US, ALLIES CONDUCT AERIAL LAUNCH IN RESPONSE TO NORTH KOREAN MISSILE LAUNCH

EXTERNAL REPORT

Pacific Air Forces news release

CAMP H.M. SMITH, Hawaii, Aug. 31, 2017—The United States' newest and most advanced fighter, the Marine Corps' F-35B Lightning II, joined U.S. Air Force B-1B Lancer bombers for the first time in a sequenced bilateral mission with Japan and South Korean air forces in Northeast Asia yesterday, according to a Pacific Air Forces news release.

Two B-1Bs from Andersen Air Force Base, Guam; four U.S. Marine F-35Bs from Marine Corps Air Station Iwakuni, Japan; two Japan Air Self-Defense Force Koku Jieitai F-2s; and four South Korean air force F-15Ks executed this mission to emphasize the combined ironclad commitment to the defense of allies and the U.S. homeland. Enhancing combined military readiness through integrated missions ensures national leaders of viable and ready military options.

This mission was conducted in direct response to North Korea's intermediate-range ballistic missile launch, which flew directly over northern Japan on August 28 amid rising tension over North Korea's nuclear and ballistic missile development programs.

North Korean Threat

"North Korea's actions are a threat to our allies, partners and homeland, and their destabilizing actions will be met accordingly," said Air Force Gen. Terrence J. O'Shaughnessy, commander, U.S. Pacific Air Forces, who just returned from an unscheduled visit to Japan to meet with his counterparts.

"This complex mission clearly demonstrates our solidarity with our Allies and underscores the broadening cooperation

Japan Air Self-Defense Force photo

Marine Corps F-35B Lightning II stealth fighters assigned to the Marine Corps Air Station Iwakuni, Japan, fly alongside two Air Force B-1B Lancers assigned to the 37th Expeditionary Bomb Squadron, deployed from Ellsworth Air Force Base, South Dakota, over waters near Kyushu, Japan, August 30, 2017. The F-35Bs and B-1Bs made contact with two Japan Air Self-Defense Force Koku Jieitai F-15J fighters in Japanese airspace in direct response to North Korea's intermediate range ballistic missile launch, which flew directly over northern Japan on Aug. 28, 2017, amid rising tension over North Korea's nuclear and ballistic missile development programs.

to defend against this common regional threat," O'Shaughnessy added. "Our forward-deployed force will be the first to the fight, ready to deliver a lethal response at a moment's notice if our nation calls."

Over the course of the 10-hour mission, the F-35Bs, B-1B bombers and Koku Jieitai fighters flew together over waters near Kyushu, Japan. The U.S. and South Korean aircraft then flew across the Korean Peninsula and practiced attack capabilities by releasing live weapons at the Pilsung Range training area before returning to their respective home stations.

"The F-35 embodies our commitment

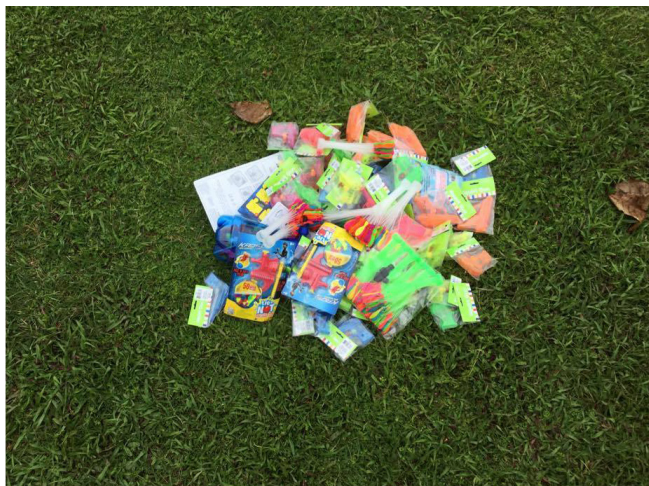

to our allies and contributes to the overall security and stability of the Indo-Asia Pacific region," said Marine Corps Lt. Gen. David H. Berger, commander, U.S. Marine Corps Forces Pacific. "By forward basing the F-35, the most advanced aircraft in the world, here in the Pacific, we are enabling the Marine Corps to respond quickly during a crisis in support of Japan, the Republic of Korea, and all our regional partners."

U.S. Pacific Command maintains strategic bomber and fighter capabilities in the Indo-Asia-Pacific theater, retaining the ability to respond to any regional threat at a moment's notice.

LABOR DAY WATER BATTLE

Interested in being part of Kwaj's Largest Water Fight—bigger and better than last year? Line up along edge of the field at Emon Beach at 3:30 p.m. on Monday. When the whistle blows, all participants will have the chance to race to the middle and arm themselves with a water weapon of choice—"Hunger Games" style. Water filling stations will be set up around the field. Fill your balloons, load up with water, and drench the competition! Outside buckets, squirt guns, water balloons are all welcome. If you come for the fun, please stay to help clean up the water balloon pieces! No one will make it out dry. Open to all ages.

Saturday, Sept. 2, 2017 / Volume 58 Number 35

IN MEMORIAM

HOURLASS REPORT

Tony deBrum, one of the Republic of the Marshall Islands' most revered diplomats passed away Tuesday, Aug. 22 in Majuro. He was 72. Mr. deBrum, who served most recently as the nation's minister of foreign affairs until 2016, made it his life's work to counter the development and proliferation of nuclear weapons. In his later years, climate change—particularly its impacts on small island nations like the RMI—became a top concern of his. He was an integral part of the international community's negotiations in creating the recent Paris climate accord. In recognition of his continual fight against nuclear weapons and climate change, the International Peace Bureau nominated Mr. deBrum for the 2016 Nobel Peace Prize. As one of the senators for Kwajalein Atoll, deBrum advanced U.S. and RMI relations through his work with the Joint Committee Meetings, Joint Labor Relations Board and the Community Relations Councils. His commitment and dedication to ensuring good relations with this garrison reflected his commitment to his constituents and the people of the Marshall Islands.

Mattlan Zackhras died Tuesday, Aug. 8. In addition to representing Namdrik Atoll in the Nitijela since January 2004, he served as President Heine's Minister in Assistance since January 2016, a position roughly equivalent to vice president. Zackhras was a key player in gaining grants, advancing development and gaining international recognition for Marshallese challenges. In doing so, he was recognized twice by the United Nations Development Program, winning an award for the UNDP's Equator Initiative. At the local level, he was instrumental in expanding copra production, coconut oil production and black lip pearl oyster growing with a view to the long-term. He played an important role in implementing the Nauru Agreement concerning cooperation in the management of fisheries of common interest—an eight-nation agreement whose signatories control approximately 25 percent of the world's tuna supply.

Minister Zackhras' and Ambassador deBrum's legacies go far beyond the islands. They dedicated their lives to advancing RMI interests in the region and the world, and their dedication will benefit the RMI for generations to come.

Tony deBrum

DJI DRONES DISALLOWED

Due to increased awareness of cyber vulnerabilities associated with Dajiang Innovation (DJI) Corporation Unmanned Aircraft Systems products, the Department of the Army, Office of the Deputy Chief of Staff, G-3/5/7, has directed that the U.S. Army halt use of all DJI products. Use of all DJI systems are prohibited on USAG-KA property until further notice. Other drones may be operated below 200 feet above ground level (AGL) on Sundays only north of 6th Street. Reference USAG-KA Policy 190-12. POC: CW3 Ryan Otto at 5-2140.

SMDC HISTORY: SYSTEMS DEFINITION STUDIES ENNK

EXTERNAL REPORT

By Sharon Watkins Lang
USASMDC/ARSTRAT Historical Office

In the 1970s, missile defense technology was still based primarily upon nuclear capabilities. As the decade progressed, however, as research explored component improvements and new applications increased interest was given to a new concept - non-nuclear kill technology.

As one text noted, there were "obvious advantages" to an endo-atmospheric non-nuclear kill, or ENNK system, to include "greater public acceptance, avoidance of nuclear release requirements, more sitting and handling flexibility, and the ability to be thoroughly tested." By fiscal year 1982, the concept had reached a new level.

From November 1981 to January 1982, the Systems Definition Office of the Ballistic Missile Defense Systems Command, or BMDSCOM, conducted a study to assess the status of ENNK technology to replace or augment the Sentry system. A study team composed of representatives from 24 groups, developed top-level system requirements in a feasibility mode for ENNK technology.

Meanwhile a separate team pursued an "intensive analysis investigating alternate basing plans for the MX missile system."

Both study teams produced positive results—an ENNK system was feasible against a worst case threat. Briefed to senior leaders of the Army, the results gained the attention of John Gardner, Office of the Secretary of Defense, and James Ambrose, Under Secretary of the Army. This interest in turn led to the establishment, on July 6, 1982, of a new ENNK Task Force.

The mission for this new task force was three-fold. The ENNK Task Force was to "define the ENNK capability to perform key defense missions." While the initial studies had focused upon Minuteman/MX defenses, with the creation of the ENNK Task Force, the mission grew to include Anti-tactical Ballistic Missiles and "other military targets" defenses.

With this foundation, the ENNK Task Force was to "determine top-level system performance parameters; develop ENNK system concepts; and formulate specific technology requirements."

In the same Disposition Form which established the six-person Task Force, Maj. Gen. Grayson Tate, Jr., BMD Program Manager and BMDSCOM commander, named Walter L. Dixon, Jr. to head the new unit as a special assistant to the BMD Program Manager. Dixon and his team, three employees each from the BMD Advanced Technology Center, or BMDATC, and the Systems Technology Program Office, addressed all aspects of ENNK development.

The DF was quite specific, Dixon was the "single BMDO focal point and spokesman for ENNK system-level matters."

In fact, he would represent the BMD Program Manager in meetings, conferences, etc. with key personnel from Department of the Army, Department of Defense, other agencies and contractor organizations.

Also given the constrained funding. Dixon's duties further extended to procurement actions. In fact, Dixon and the Task Force would review and coordinate ENNK procurement actions initiated ei-

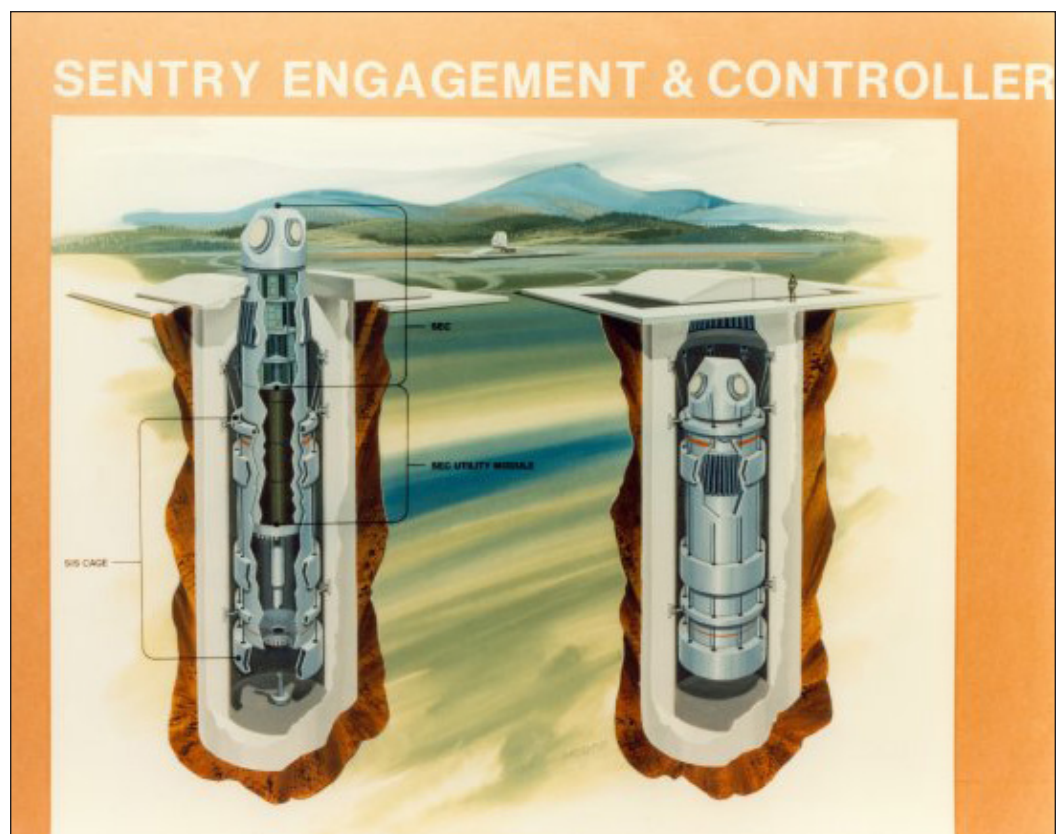

ther within BMDSCOM or BMDATC. They also "[maintained] concurrence authority over changes in resource allocations from the baseline ENNK program."

As the primary point of contact for ENNK matters, Dixon and his team were also tasked to "review work in progress to assure compliance with policy, procedures, etc., and fulfillment of the BMDO ENNK objectives;" advising the BMD program manager of any changes needed due to advances in ENNK technology or system requirements.

By the end of the fiscal year, the preliminary system requirements for Minuteman ENNK were nearing completion. Requirements for the MX project, however, depended upon the Air Force deployment mode selection. After three months research to support advanced tactical ballistic missile and other military targets, meanwhile, was described as an embryonic stage.

Nevertheless, the ENNK Task Force was short-lived. Their efforts were institutionalized with the development of the ENNK Division within the Sentry Project Office, effective Oct. 7, 1982.

In a DF issued by BMDSCOM Commander Col. Robert Feist, the ENNK division would "develop ENNK system concepts and requirements for defense of ICBM's and other military targets" with particular emphasis placed on the SENTRY project.

RANGE OPERATION NOTICE

A **range operation** is scheduled on Roi-Namur Tuesday, Aug. 29, 2017 through Sunday, Sept. 10, 2017. Caution times are 7 p.m. through 11:30 p.m. in conjunction with this operation. During this time, a caution area will extend into the open ocean west and north of Roi-Namur.

Barriers and signage locations are shown as red rectangles in the photo when ordnance is located on the launchers FN 8005.

Questions regarding the above safety requirements for this mission should be directed to RTS mission safety office at extension 54841.

DynCorp EOD Specialist

The battles of Kwajalein and Roi-Namur occurred nearly 50 years ago. The ruins of bunkers, air raid shelters and memorial plaques pay a silent tribute to all who fought in the Kwajalein Atoll during World War II. Many artifacts, such as bowls, silverware and other personal items, are still discovered as construction workers dig with heavy equipment. Propeller shafts from small amphibious crafts and ammunition caches containing high explosive ammunition have been discovered.

You might find these in your back yard. In the center is a US MK 2 hand grenade. Other items include Japanese 20 mm anti-aircraft ammunition and bomb nose fuses.

The rat is back

Ritho Komijen from Roi FOM rigs the radome in preparation for a crane to lift it onto a pedestal on the Roi golf course, where it was removed more than a year ago for refurbishment. Issac Langrine, who works at Kwaj FOM, painted the new logo that greets commuters to Roi. The original landmark dates back to 1967, when a security captain first sketched the image of a fun-loving rat on the mushroom-shaped dome.

From August 23, 2002

Wow! Do I really get to go for a ride?

The Kwaj kitty shown in last week's Hourglass has been identified by a long-time Kwaj resident "Tailrotor" used to hang out at the old Nike Flying Club in the mid 1970's. Fed and pampered by the club members, she became a permanent fixture around the area. Since one of the members was a photographer, Tailrotor was the subject of numerous photos. She is shown here at the wheel of a Cessna aircraft.

From Sept. 24, 1996

Dive Boat Saturday

The KMR recreational dive boat will be going to the Carlson sandbar area on Saturday. Divers should be at the tankhouse before 8 a.m. to sign in. Standbys will be taken after that time and no one will be added to the manifest after the truck leaves the tankhouse. The boat will return at 1:30 p.m.

Divers are reminded that everyone is needed to help with the loading and unloading of tanks and equipment, both at the tankhouse and at the dock.

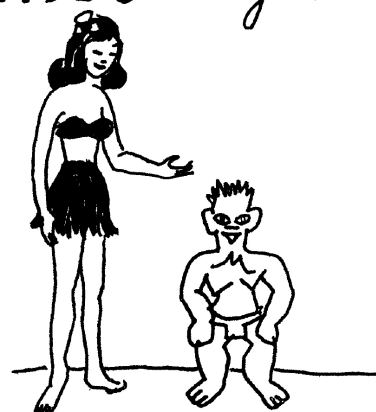

Passengers are welcome but anyone under 15 years of age must be accompanied at all times by a parent or guardian other than the divemasters. Non-members are charged a fee of \$1.50 for each tank of air used.

Divemasters for this week are Walt Chidsey and Ed Nishihara. To sign up call Sharon Bechtold at W82114 or H83649 before 9 p.m. There will be no spear fishing.

WEEKLY WEATHER OUTLOOK

RTS WEATHER STATION STAFF

WEATHER DISCUSSION: After a very active few days earlier this week, Kwajalein Atoll will experience a much less active weather pattern over the first part of this week. Forecast models are currently showing a chaotic and very light low-level wind field, which should have trouble producing significant shower activity. Expect variable and light winds through this weekend and into the early part of next week.

Winds are expected to increase some time on Tuesday or Wednesday, which will cause some increased low-level convergence and increased shower activity. While showers may increase, there doesn't appear to be much, if any, lightning threat due to an unsupportive upper-level pattern.

SATURDAY/SUNDAY/MONDAY FORECAST: Stray to isolated showers throughout the weekend, with brief peaks in shower activity overnight each night. Winds will be variable and very light, at around 3-8 knots.

MID-WEEK FORECAST: Expect increasing showers early in the week with increased northeasterly winds, before showers begin to drop off mid-week.

Youth Fellowship is a nondenominational group who meets for dinner, games and bible study. All students 9th-12th grade are welcome to attend no matter denomination or religious affiliation. Questions? Contact Jason or Michelle Huwe, michelle.huwe@gmail.com

Racquetball Courts Cipher Lock Change. The cipher lock combination has changed for the Racquetball Courts. For the new combination, please email your badge number to Derek Finch, or call 51275.

Safely Speaking: Follow the Lockout/Tagout procedures: 1) Isolate Equipment 2) Use Lock / Tag to prevent energization 3) Control Stored Energy 4) Verify Lockout/Tagout is effective 5) Inspect equipment before restarting after repairs.

Safely Speaking 2: Read all warnings and labels and know how to operate

the equipment. Never leave a running mower unattended. Never operate the trimmer with the guard removed. Clear the work area of objects, sticks, rocks wire etc. before operating a trimmer. Wear long pants and closed-toed shoes. Protect your eyes with safety glasses or goggles and protect your hearing with ear plugs.

E-Talk: This week's E-talk discusses the updated Kwajalein Historic Battlefield Tour. The new signs have been installed and new tour booklets are being produced and will be available soon at the Archaeology Office (FN 905), the Kwaj Lodge (FN 908), and the Library (FN 805). New tour signs should be installed on Roi-Namur later this fall.

Attention all Calibration Lab Customers and Coordinators: The Calibration Lab will be closed on Saturdays to all TMDE equipment drop-off activities so please plan your equipment drop-offs accordingly. Delinquent TMDE items may be dropped off at any time.

REGISTRATION NOTICES

Water Safety Instructor Class. Register now-Sept. 9. Session Dates: Sept. 24-25 and Sept. 30-Oct. 1. Required pre-requisite skill swim - Sept. 9. Cost: \$200 (includes books and certification fees). Course fee due by Sept. 23. Participants must be at least 16 years old. Contact Cliff at 52848.

Girl Scouts new online registration begins Aug. 29 for K-10th grade. Message through USA Girl Scout Overseas-Kwajalein Facebook page or contact Carrie Aljure at 51897 if you're interested in joining or volunteering!

Fall Bowling League Registration Sept. 12 - 22. League games on Tuesday nights from Sept. 26 - Nov. 28. Team slots are limited so register fast! \$70 with shoe rental, \$60 without shoe rental. To register, call or email Derek Finch at 51275. Adults only.

Effective Oct. 1, the Cash Offices on Kwajalein and Roi will no longer accept advance payments for phone/internet or any other bills.

Service termination considerations will be given to those customers who might have services terminated for lack of payment if you are traveling when phone bills are processed and had no outstanding phone bills at time of departure. Please coordinate that with KRS Finance. Payment for services is expected within five business days of arrival on island.
