USAV WORTHY EVACUATES JOHNSTON ATOLL TEAM

NEWS/JESSICA DAMBRUCH

Kwajalein Range Services employees operating the Reagan Test Site range safety vessel USAV Worthy evacuated four U.S. Fish and Wildlife Service personnel from Johnston Island in response to a U.S. Coast Guard request on Aug. 8 for emergency assistance.

The Worthy was en route to a west coast shipyard to receive a maintenance overhaul. Knowing the forecast called for bad weather, the Worthy had adjusted course to avoid the typhoon that meteorologists upgraded to Hurricane Hector in Hawaii. Johnston Island is a wildlife preservation area with little protective shelter. The Fish and Wildlife team had been there since December.

Safety officials determined that the hurricane-force winds might put an airplane at unnecessary risk. In concern for the wellbeing of the personnel on the island, the USCG radioed available vessels in the area to request immediate evacuation assistance.

The USAV Worthy crew received the call. U.S. Army Space and Missile Defense Command and the Reagan Test Site approved the change in course, and the Worthy traveled to Johnston Atoll to perform the evacuation. Assuming a different course, the ship remained approximately 260 nautical miles from the storm's epicenter in transit to Hawaii.

Incoming RTS Director Lt. Col. Jake Wamsley and current director Lt. Col. Chris Kennedy expressed admiration for how the range community worked together to rescue the personnel.

"The change in course posed a minor change in the Worthy's schedule," said Wamsley. "The Reagan Test Site is pleased to be able to support the U.S. Coast Guard and offer assistance."

The Fish and Wildlife Services personnel departed the ship in Hawaii and expressed heartfelt appreciation for the crew. The Worthy now continues its scheduled progress toward the west coast.

"We're just glad to be in a position that we could provide some help," said Marvin Rowe, captain of the Worthy.

THE KWAJALEIN HOURGLASS

The Kwajalein Hourglass is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944. The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Garrison-Kwajalein Atoll.

Contents of the Hourglass are not necessarily official views of, or endorsed by, the U.S. Government, Department of Defense, Department of the Army or USAG-KA. It is published Saturdays in accordance with Army Regulation 360-1 Phone: Defense Switching Network 254-3539 Local phone: 53539 Printed circulation: 730

SHARP SUPPORTS USAG-KA

FEATURE/JESSICA DAMBRUCH

Any military or civilian resident of Kwajalein who is a victim of sexual harassment or assault can address their concerns to the U.S. Army Garrison-Kwajalein Atoll Sexual Harassment and Assault Response and Prevention Program (SHARP). The SHARP hotline is staffed 24-hours per day. Though reporting an incident can be difficult, it can lead to healing and resolution for a victim, and also can help island officials keep Kwajalein safe.

When USAG-KA's SHARP Victim Advocate Chief Warrant Officer 2 Jarell Smith receives an incident report, he serves as an advocate for military and civilian sexual harassment and assault victims, and he works with representatives qualified to address the situation and take appropriate action.

SHARP assault and harassment reports fall into one of two categories:

Unrestricted reports are addressed and are supported by Smith and Kwajalein Hospital physicians. Additionally, Smith will immediately notify law enforcement. Unrestricted reporting is for victims of sexual assault who desire medical treatment, counseling, and Victim advocate assistance, and an official investigation of the crime. When selecting unrestricted reporting, you may report the incident to the Victim Advocate, request healthcare providers, notify law enforcement, contact law enforcement or use current reporting channels, such as the chain of command. Unrestricted reporting is available to everyone.

Restricted reports are also addressed and supported by Smith and Kwajalein Hospital physicians. Restricted reporting is available at this time only to military personnel of the Armed Forces and military dependents 18 years of age and older who are eligible for treatment in the military healthcare system and were victims of sexual assault perpetrated by someone other than a spouse or intimate partner. Military personnel include members on active duty and members of the Reserve component (Reserve and National Guard). At this time, retired members of any component are not eligible for a restricted report, and as a result of a current Army pilot program, DOD Civilians are now eligible to make a restricted report.

Restricted reporting allows a sexual assault victim to confidentially disclose the details of his or her assault to the Victim Advocate and receive medical treatment

and counseling without triggering the official investigative process. Sexual assault victims who are sexually assaulted and desire restricted reporting under this policy may only report the assault to the Victim Advocate or a healthcare provider.

SHARP advocates like Smith complete a rigorous 80-hour of training session in a nationally certified Department of Defense Sexual Assault Victim Advocate Certification program. The program includes background checks and psychiatric evaluations to assure the advocate is the right fit for the job. Smith earned his first certification in Italy in 2014 and recertified in Hawaii in 2018.

Smith offers guidance and support to everyone who comes to speak with him. He is always willing to just talk or listen. Smith can also step in as a third party to stop unwanted behavior directed at a victim.

"Depending on what action we need to take to rectify a situation, I can draft a letter or directly address a predator to stop the harmful behavior, as well as contact law enforcement" said Smith.

"If there's a danger to life or limb, I would have to automatically report that," Smith said. "It doesn't matter if it's a military member or a civilian. If safety is in jeopardy, I have to report that immediately.

"What I enjoy most is being able to provide assistance to those in need, especially during a trying time, such as a SHARP incident," Smith continued. "I want to provide the best quality assistance to an individual and to help them get back to the best quality of life as soon as possible."

Smith hopes the community will practice mindful vigilance that may deter aggressors and avoid unfortunate and harmful situations. Incidents can and do occur anywhere. It can be difficult to tell when it's time to step up. Smith recommends that you become the best friend you can be, and locate dependable battle buddies.

A real friend is someone you can trust and a line of defense against unfortunate and harmful situations.

Chief Warrant Officer 2 Jarell Smith serves the garrison as USAG-KA's Sexual Harassment and Assault Response and Prevention (SHARP) Victim Advocate.

"Battle buddy is an Army term," said Smith. "Always have a friend near who you trust. Battle buddies stick together. They are the people on your team who look out for you. The same mentality should be used when you go out for an evening to enjoy yourselves. Don't isolate yourself or make yourself vulnerable in a situation with too many variables." Smith says he always goes out with a friend or a group.

As an example, "if you're out one evening, and you see someone handing someone a drink after drink, that's a possible indicator that the recipient is becoming a target," said Smith. "Tactfully ask the person if they are okay. If you're not comfortable doing that, locate a third party and ask them to observe the scene to see what they think. Look for a trustworthy friend to escort the person home. It could be that everything's fine, but the point is that you are actively seeking to deter unsafe behavior that has no place in our community."

REAGAN TEST SITE ROLE HIGHLIGHTED AT SPACE AND MISSILE DEFENSE SYMPOSIUM

FEATURE/JORDAN VINSON

The annual Space and Missile Defense Symposium took place last week in Huntsville, Alabama, hosting thousands of service members and professionals working in the fields of space, missile defense and cybersecurity.

Held Aug. 7-9 at the Von Braun Center in "Rocket City," the conference featured speeches by leaders within the U.S. Army Space and Missile Defense Command, the Missile Defense Agency and U.S. Strategic Command. Panel discussions, scholarly research presentations and technology exhibits by defense contractor companies and select foreign military units were also part of the three-day event.

Lt. Gen. James Dickinson, commanding general of U.S. Army Space and Missile Defense Command/Army Forces Strategic Command, addressed the symposium Aug. 7, commending the globe-spanning active duty and civilian workforce that make the SMDC mission possible.

Via a live video link at the conference center, the general did a question-and-answer session with 12 members of SMDC, each in a different geographic location, from Kuwait to Kwajalein. Along with presentations of short videos recorded with these personnel on site at the featured far-flung SMDC posts, Dickinson and his team described how individuals and their skillsets contribute to the force and how SMDC accomplishes its broad range of space and global missile defense missions.

One of the videos Dickinson called up for symposium attendees featured SMDC Space Officer Capt. Wojciech Stachura. At a sunny, ocean-side location on Roi-Namur, Stachura explained the importance of SMDC's Reagan Test Site to American missile defense and space operations.

"Today I am here at the Kwajalein Atoll, home of the Ronald Reagan Ballistic Missile Defense Test Site, also known as RTS," Stachura said in the video. "RTS is operated by Army personnel, government civilians, technical support contractors and scientists from MIT Lincoln Laboratory. We have over 40 years of experience supporting missile testing and space operations. RTS conducts continuous operations in support of the U.S. Strategic Command, U.S. Air Force space programs and the National Aeronautics and Space Administrations, as well as other government and DOD organizations.

"Operations on Kwajalein Atoll offer many advantages," the space officer told the crowd. "The austere location helps minimize the inherent risk and safety concerns involved in launch operations. And its proximity to the equator and vast open areas make it very efficient at conducting rocket launches to a wide range of orbits. The Reagan Test Site is, and will continue to be, a significant asset for the U.S. Army."

While Dickinson was one of the key speakers at the symposium, he shared the stage with plenty of other high-profile Pentagon leaders in the space and

missile defense community.

In an Aug. 7 speech at the symposium, Air Force Gen. John Hyten, commander of U.S. Strategic Command, highlighted the importance of vigorous investment in space-based sensors to counter accelerating offensive threats from China and Russia.

"You can't call them our friends if they're making weapons that can destroy the United States of America," he told the crowd.

Radars like Cobra Dane on Shemya Island in Alaska, ALTAIR on Roi-Namur and Joint Tactical Ground Station sites in Japan, Germany and elsewhere are critical to the nation's new foreign missile and rocket launch duties. But Hyten said ground-based radars' line-of-sight limitations could be overstepped with a globe-spanning constellation of dependable yet affordable sensors that are parked in low earth and dedicated to watching for and tracking hostile launches from boost to impact.

"There is not enough islands in the world to build radars on to see all the threats to be able to characterize the threats," said Hyten. "You just can't get there from here, so the only place to go to do that is a place where the U.S. is actually strongest and technology is there to do it, and that's in space. We have to move into space."

The point, the symposium speakers explained, is to improve the lethality of American missile defense systems like the Ground-Based Midcourse Defense in the U.S. and systems abroad in the-

ater like deployed Terminal High Altitude Aerial Defense and Patriot batteries, as well as sea-based Aegis systems on missile destroyers and Aegis Ashore sites in Romania, Poland and—in the future—Japan.

Without the necessary sensor infrastructure online, the mission of missile defense would be entirely different, Hyten said. It was a point he hammered on, saying, STRATCOM needs “sensors first, shooters second, capacity third. ... If you don’t have the sensors, then the other two really don’t matter.”

At a time of widely reported Chinese and Russian advances in non-ballistic hypersonic weaponry development, a constellation of enhanced sensors designed to detect and track launches early in flight could significantly aid America’s defense against these superfast vehicles, according to some analysts in the missile defense community.

“The most important thing to do in the missile defense business is making sure you can see and characterize the threat,” Hyten told the Symposium crowd. “If you can’t see and characterize the threat, I don’t care what kind of shooter you have. There is nothing you can do about it. So the most important thing is as you look at all the threats that are coming together, hypersonics, etc.—is that we have to be able to see that threat.”

A duo of missile tracking satellites collectively known as the Space Tracking and Surveillance System was put into orbit in 2009 and is still active, but the system is used primarily as missile test launch assets. Another Air Force multi-satellite network, the Space Based Infrared System (SBIRS), is now emplaced in orbit and can currently detect and track launches.

But, according to Michael Griffin, the undersecretary of defense for research and engineering, the existing capabilities are by no means future proof.

They are, “exquisitely capable, very expensive, very vulnerable systems that were designed and deployed in an era where we really didn’t have any space adversaries,” Griffin told the symposium crowd.

The timeline to build, launch and validate a cheaper, more advanced and hardier system will depend on collaboration between the Defense Advanced Research Projects Agency (DARPA) and the MDA, the release of the government’s anticipated Missile Defense Review and, of course, congressional approval.

Also part of the symposium’s three days of events were discussions on ways

to improve sharing missile defense intelligence with U.S. allies; renewed Congressional effort to authorize funding for development of a space-based interceptor system capable of striking down missiles around the world in their boost phase; and what the proposed Space Force might look like.

Hyten had this to say about the Space Force proposition.

“You’ve seen the Congress of the United States pass a law that says we have to go look at developing a Space Corps inside the United States Air Force to figure out how to do that,” said Hyten. “And

we have reports to Congress that are due back this month, talking about that. You see Congress talking about standing up a sub-unified command for space now. You see the president of the United States calling for a Space Force. ...

“If you take one step back and you look at all the things leading up to that, they all say the following: We have a threat in space; space is a warfighting domain; we have to treat it like a warfighting domain. That’s it, and that’s exactly what we’re doing. So as we do all this, we’re going to be in a much better position as a nation.”

KWAJALEIN SCHOOLS HOURS CHANGE THIS YEAR

It's back to school time! The first day is just around the corner on Wednesday, August 29th. This is a reminder that we are incorporating an early release every Wednesday into the calendar. Both the Elementary and Jr. Sr. High campuses will dismiss students at 2:30 pm on Wednesdays.

This is a practice consistent with many school districts, including DoDEA schools, to make time for teachers to collaborate on curriculum alignment and to participate in professional development. The end goal is to improve our instruction to benefit your students' education. We are excited about the plans for professional development this year and know that our students will benefit from the outcomes.

To help families in need of School Age and youth recreational opportunities, the School Age Center (SAC) program invites you to enroll your child on Wednesdays on an hourly basis when school is out early.

Please call 5-2158 for more information. More information will be provided by Child and Youth Services as it becomes available.

KWAJALEIN MEDICAL SERVICES RETURN TO REGULAR BUSINESS HOURS

PUBLIC NOTICE

U.S. Army Garrison-Kwajalein Atoll medical services are returning to regular business hours effective at 4:30 p.m. on Aug. 18.

Primary Care, the Surgery Clinic, Radiology, Laboratory, Pharmacy, Dental, and Veterinary services at Kwajalein Hospital and Medical Offices will be open Tuesday through Saturday, 7:30 a.m. to 4:30 p.m. daily, except for holidays recognized by the garrison.

The Hospital staff will continue to provide emergency care capabilities 24 hours per day. Emergency Medical Technicians will continue to provide the first level of care via 911. A physician and nursing personnel will be on call and will respond within 15 minutes of notification.

The garrison's population can access after-business-hours medical care via 911.

If you are at your residence, office or a location on post, dial 911 and the Fire Department communications operator will dispatch an EMS ambulance to your location with trained Emergency Medi-

cal Technicians. They will provide initial care and transport the patient to the hospital. The medical staff will be notified when the ambulance is dispatched and will receive and further treat the patient at the hospital.

If you are outside of the hospital, you will see signage at every door directing you to an emergency phone mounted on the wall to the right side of the emergency room door. Open the phone box and lift the receiver.

The phone will automatically dial the Fire Department communications operator. He will ask you where you are and will dispatch an EMS ambulance to the hospital with trained Emergency Medical Technicians. The medical staff will be notified when the ambulance is dispatched and will receive and further treat the patient at the hospital.

Our goal is to provide the best possible care. If you have specific questions, please email thomas.berger@internationalsos.com or steven.kass@internationalsos.com or call the hospital at 5-2225.

CAUTION DURING ROAD CLOSURE

The west end of Kwajalein will be closed to all non-work related activities 24 hours per day, seven days per week, until Aug 21. After Aug. 21, the west end will be closed to all non-work related activities during duty hours (7 a.m.-4 p.m.) Tuesday through Saturday, until further notice. This means the west end of the road circling the runway will not be available for training/exercise or leisure during the duty day. The AFN Roller channel will also have area maps for your reference. Please contact Mr. Trace Salmon, USAG-KA Safety Manager at 5-1959 if you have any questions or concerns.

THINK BEFORE YOU DRINK

COMMUNITY CONNECTION / KWAJALEIN HOSPITAL

Arrival on U.S. Army Garrison-Kwajalein Atoll is filled with various emotions: excitement, apprehension and anticipation. Newcomers who connect with the community prior to arrival talk with residents to learn about island life and what to bring to the atoll. The Kwajalein community is small, but a multitude of activities are available on this beautiful island. If consuming alcohol at gatherings becomes the easiest way to bridge your social alliances, it may be time to reassess your island lifestyle.

From use to dependence, alcohol is a slippery slope. It is easy to use drinking as a coping skill to de-stress or manage other mental health-related concerns. If you are a social drinker, be especially warned: Binge drinking is the most common, costly and deadly pattern of excessive alcohol use in the United States. The Centers for Disease Control warn against episodes of binge drinking (more than four drinks for women or five drinks for men within two hours) to prevent both short and long-term health consequences.

Think twice before you head out to your next party. Alcohol has the power to lower your inhibitions and leave you vulnerable to shame and regret among your peers. Worst of all, drinking can irreparably damage friendships and complicate future relationships.

Enjoy Kwajalein in a mindful way. Intentionally schedule activities for the day following a party to motivate you. It's difficult to get full enjoyment out of a new day while managing a hangover. Seek honest, real friendships centered around activities that provide you with positive mental and physical health benefits. It can take time, but it's worth it.

Remember, there is no shortage of fun ways to be social and meet others in the Kwajalein community. Here is a rounded list of possibilities: bowling, boating, fishing, paddleboards, scuba diving, snorkeling, movie nights, sewing lessons, piano lessons, pottery, woodworking, fitness classes, yoga, music, running, sailing, biking, photography, tennis, golf, FMWR sports teams, swimming, library, game nights, cooking groups, basket making and painting, among other activities.

PRINZ EUGEN OIL REMOVAL EXERCISE PROHIBITED AREA

WEEKLY WEATHER OUTLOOK

RTS WEATHER STATION STAFF

WEATHER DISCUSSION: The monsoon trough has moved to the west, which will allow for drier conditions with moderate trade winds most of this weekend. The next surface wave and associated shower activity will come through the atoll during the second half of Monday and into Tuesday. Precipitation will decrease again during the middle of next week. By the end of next week, the monsoon trough and light winds will build back into the area.

SATURDAY/SUNDAY/MONDAY FORECAST: Scattered morning showers decreasing through the day on Saturday. Just a few showers on Sunday. A relatively dry morning with rain increasing in the afternoon on Monday. Winds – ENE-ESE at 5-10 knots on Saturday, NE-ESE at 8-13 knots on Sunday, ENE-E at 10-15 knots on Monday.

MID-WEEK FORECAST: Showers on Tuesday but quieter on Wednesday and Thursday, with light to moderate ENE-SE winds throughout. Return to doldrums and an increase in precipitation by late week.

PASSPORT SERVICES AUG. 24-25

U.S. Embassy Majuro will conduct American Citizen Services in Building 730 (Garrison HQ), room 117 from 9 a.m. to noon and 1-4 p.m. Aug. 24-25.

LET THE RAT RACE BEGIN.

ANNUAL ROI-NAMUR LABOR DAY WEEKEND CARDBOARD REGATTA

The ultimate upcycle regatta awaits you at the Roi-Namur Labor Day Cardboard Regatta! Pre-register on September 1 at the Community Activities Office 5-7 p.m. Race day registration opens at the Surf Shack September 2 at 9 a.m.

First, second and third place will be awarded for each category singles and doubles. One award will be given to the most original design as judged by a panel of three.

Boats should be made of cardboard only with no buoyancy aid allowed. Only duct tape and glue are allowed on the seams. We have recycled cardboard that we will donate beginning on August 20. Contestants will need to supply their own duct tape and glue. No paint, glue or duct tape is allowed below the water line. Copies of race regulations are available upon request. For more information, contact Roi-Namur FMWR Supervisor Rob Kent at 5-6580.
