A RANGE OPERATION IS SCHEDULED FOR JULY 7-8. CAUTION TIMES ARE JULY 7 AT 6 P.M. THROUGH 12:58 A.M. ON JULY 8. THE BACKUP DAY OF JULY 8-9 HAS THE SAME CAUTION TIMES. DURING THIS TIME, A CAUTION AREA WILL EXTEND INTO THE OPEN OCEAN EAST OF THE MID-ATOLL CORRIDOR.

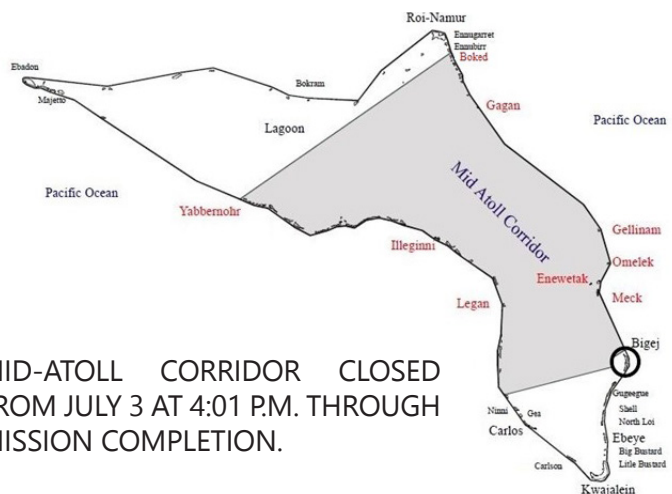

THE MID-ATOLL CORRIDOR WILL
BE CLOSED FROM 4:01 P.M. JULY 3
THROUGH MISSION COMPLETION.
THE CAUTION AREA EXTENDS FROM
THE SURFACE TO UNLIMITED ALTI-
TITUDE.

SEE THE KWAJALEIN HOURGLASS OR ROLLER DATED JUNE 25 FOR A MAP OF THE CLOSED AREAS. QUESTIONS SHOULD BE DIRECTED TO REAGAN TEST SITE MISSION SAFETY OFFICE AT (805) 355-5625.

The Kwajalein Hourglass is named for the insignia of the U.S. Army's 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944. The Kwajalein Hourglass is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Garrison-Kwajalein Atoll.

Contents of the Hourglass are not necessarily official views of, or endorsed by, the U.S. Government, Department of Defense, Department of the Army or US-AG-KA. It is published Saturdays in accordance with Army Regulation 360-1.

RANGE DIRECTOR LED REAGAN TEST SITE DURING PANDEMIC

BY JESSICA DAMBRUCH

Lt. Col. David Taylor, Ronald Reagan Ballistic Missile Test Site range director, recently PCS'd with his wife, Elizabeth, and daughter, Lily, after completing his tour of duty on U.S. Army Garrison-Kwajalein Atoll.

Taylor, a former air defense officer, said he enjoyed getting to know the diverse workforce at RTS in his unique new home.

During his command, Taylor's team provided uninterrupted mission support—often going above and beyond to meet the challenges of the operational tempo during the pandemic.

The increasingly isolated conditions on Kwajalein during the pandemic became a proving ground for the talents of his new support team, Taylor said.

"For my team, as well as both the RTS team, here and back in the states, we've done a good job cross-training people across various disciplines to keep the mission going," he said. "In each mission, we have several people that come in TDY to support those missions. With COVID restrictions, that just wasn't possible."

Taylor credited the Garrison and its contract support partners for keeping the island "open for business" through quarantine management. He thanked the numerous range employees who took on additional support roles during operations windows.

"We've had a lot of team members on the island stand up, cover down and cross-train on highly technical jobs that weren't in their position description—from engineers becoming flight tested or [performing] work on the USAV Worthy... We've been able to show value in all those things and keep the mission going, as well."

Cross-training allowed Range Generation Next employees to utilize their talents, skills and abilities to support mission roles, sometimes serving in multiple departments at a given time.

One such testament to continued forward momentum despite the pandemic was completed in 2021 with expertise from Range Generation Next engineers: a connective "collar" to complete a weather-proof passage between wings of a sensor facility on Roi-Namur.

On Choosing Kwajalein

"[Kwajalein] was one of my top choices from the very beginning," Taylor said, of choosing USAG-KA as a duty station. He became acquainted with the islands through stories shared amongst colleagues and friends. As an avid paddleboarder and snorkeler, he made sure to pack out two stand-up paddleboards with the sports equipment to use during his tour.

Living on the atoll was a dream—right down to the bicycle commute to RTS command headquarters.

"I do enjoy the whole bike-as-a-vehicle kind of method. It's very simple and helps you get out and just commute to work," he said. "It gives you a little bit of exercise."

Taylor said he was grateful his family got to enjoy the outdoors and spend time together. Elizabeth was an avid community volunteer who contributed much to community life. Lily participated in Girl Scouts and community events through school activities.

1) Lt. Col. David Taylor, left, and his spouse Elizabeth enjoy the 2021 Spring Break Music Fest on U.S. Army Garrison-Kwajalein Atoll. 2) Taylor served as the RTS range director during the pandemic—a challenging time for he and his dedicated team to continue supporting the Army mission.

Looking Back

As a young man eager to travel, Taylor credited the example of two family members.

His father became a prime source of motivation. His father's brother, Earl, a retired senior master sergeant in the U.S. Air Force, was his inspiration to join the U.S. armed forces.

Earl and his wife, Grace, became mentors for he and Elizabeth, serving as models for how to thrive as a military family, he said.

"I heard stories of how [Earl] was in the Philippines, and he was in Alaska doing all these great and crazy things," Taylor said. "That's why we never saw him. I always thought, 'When I grew up, I'd love to travel and go do a lot of those things. So, here I am, years later.'"

Though his uncle passed away in 2019, Taylor assumed the mantle as the family member working and living abroad.

"He was sad that I didn't join the Air Force," Taylor said, of his uncle. "Maybe some days, I was sad, too. But hey, now 23 years after the fact, the Army was the best decision."

A Future In Space

Earlier in his deployment, Taylor said he was interested in the growing role of

the range for SMDC.

"That has been very fascinating, and I, myself, coming into the job, have been very curious as to how ... future roles and responsibilities shake out with the U.S. Space Force—how all the command structures dealing with space will impact the role here. We still support all their initiatives. It's an exciting time to be involved in all things space. ... I just hope we're able to continue down that path of focus on space capabilities, improving them and matching our adversary's progress in space."

Noting his beginnings as a short-range air defense officer with more of an iconic "direct combat role," Taylor said he found it humorous that, later in his career, leaving the acquisitions-focused RTS role, that U.S. Army Space and Missile Defense Command is now "full of and led by air defense officers."

"I find it kind of funny that the profession I ended up going away from somehow connected to in my 22nd year of service," he said. "...My brother likes to remind me that that was the highlight of my career—and it was almost two decades ago! Now that I'm [on Kwajalein] this seems to be the highlight of my career. [This tour] has made me the most popular person in my family."

NEW RMI EMPLOYEES ON KWAJALEIN BEGIN LOGCAP V ONBOARDING

BY JESSICA DAMBRUCH

A group of new Marshallese employees joined LOGCAP V human resources personnel for an onboarding workshop to learn about employee roles and responsibilities June 18 at the Religious Education Building.

Many will be employed by the Department of Public Works, said LOGCAP V HR Supervisor Scott McVey.

"These are some of the first newly-hired local national employees to join us after our initial hiring fair on Eb-

eye last month," he said. "We are grateful to be able to bring them onboard to join the LOGCAP V family."

More than 200 employees responded to the call for applicants at the Ebeye job fair. More small groups of employees will receive onboarding training and get to work throughout the summer.

Together with colleagues from other departments, human resources specialist Jaclyn Lemari-Solomon and finance specialist Arthur Laukon took questions and delivered their remarks to the nine new hires in Marshallese.

They covered the basic roles and responsibilities of LOGCAP employees and explored timekeeping procedures, expectations for personal conduct, safety information and how to seek help on the LOGCAP V employee hotline. They also received information about health benefits, including vacation time, sick time and other paid leave.

"We hope that this workshop will prepare them for work," Lemari-Solomon said. "We look forward to working with them, and to having more applicants from the job fair join us for work."

WET SEASON BRINGS MORE RISK OF LIGHTNING TO KWAJALEIN

COMMUNITY CONNECTION

By RTX Weather Meteorologists
Barie Turpie and Sean Stelten

As we begin summer, Kwajalein is entering peak thunderstorm season. A thunderstorm is officially reported at the weather station when thunder can be heard or when lightning is detected within five miles.

Whenever possible, a lightning warning will be issued prior to the first rumble of thunder heard. Kwajalein typically sees 11 thunderstorm days per year, with most thunderstorms observed from June through November.

Lightning occurs when there is an imbalance in electrical charge between the clouds and the ground, two different clouds, or the cloud and the surrounding air. To get this imbalance, showers and storms need to be strong and long-lasting enough to build up a significant imbalance. Because of this, lightning is more likely to occur during the wet season, when strong and long-lasting showers are more common.

On average, there are 49 lightning related fatalities and hundreds of injuries each year in the mainland United States. Nearly all of these are caused by people being unaware of the current weather conditions and not taking proper shelter.

A surprising aspect of these fatalities is that most of them do not occur when the storm is directly overhead. They actually occur as the thunderstorm is approaching and moving away. The main contributor to this is that many people don't know that lightning can and often does

travel up to 10 to 15 miles away from the parent thunderstorm.

RTS Weather warns for storms with lightning potential that are within 15 nautical miles of Kwajalein and Roi-Namur; however, the world record for the longest lightning bolt is actually 440 miles (Brazil, 2018), or the distance between Washington, D.C. and Boston. For a local reference, that length is a little bit farther than the distance between Kwajalein and Kosrae. This means that whether you're enjoying some time at the beach or refueling the Metro for a flight up to Roi-Namur, it is essential to keep an eye on the weather and take precautions before threatening weather arrives, not once it's overhead.

RTS Weather will issue lightning warnings for Kwajalein or Roi-Namur if a cell within 15 nautical miles shows potential for lightning, or if a lightning strike is recorded.

Data from the KPOL weather radar and the daily synoptic sounding (weather balloon) are used to determine if individual showers show any potential for lightning. Lightning strikes are detected using a network of four sensors located around the atoll as well as the airport AWOS system which the RTS Weather Station maintains. Accompanying heat, light, and electricity, lightning also emits an electromagnetic signal.

This signal falls within radio frequency range and can actually be heard within white noise on AM radio. Each of the four sensors detect this signal, which then triangulates the location of the strike. When a lightning warning is issued, a notification crawler will be put up on the AFN weather channel (20.1),

as well as a banner at the top of the RTS Weather website (rts-wx.com).

So, what should you do if you get caught outside while a dangerous thunderstorm is approaching? If a lightning warning is issued, or especially if you hear thunder, move as quickly and safely as you can to an enclosed building.

Do not take cover in open air shelters or pavilions like those at Emon Beach and near many of the BQs. Seeking shelter is your only option for protection during a lightning storm. Despite it often being regarded as common knowledge, crouching down should never be used as a "last resort."

Crouching actually provides very little, if any, extra protection during a lightning storm, especially on flat and remote Pacific islands. Again, finding a well-built and enclosed shelter is the only way to protect yourself. If you happen to be fishing or diving in the lagoon, try to return to land as quickly and safely as possible. Boaters should also contact the marina for advice on further required actions.

As the National Weather Service states, "When thunder roars, go indoors." Once thunder is heard, seek shelter as soon as possible. The unfortunate reality is, once thunder is heard, you are already in danger. To protect you and your loved ones, keep a close eye on current conditions.

If concerned, you can speak to the duty meteorologist directly at 5-3347. You can also check the RTS weather station website at rts-wx.com or the Kwajalein weather channel for warning updates.

Don't become just another statistic waiting for lightning to strike; be proactive. We are here to keep you safe.

FOR SEABEE, ADVENTURES BEGAN AFTER ENLISTMENT IN THE U.S. NAVY

BY JESSICA DAMBRUCH

Call it fate or call it luck, but when Construction Electrician Constructionman Ricki Newton felt the call to enlist in the U.S. Navy, nothing could compel her to continue her intended major in political science. She left college, completed training at Naval Station Great Lakes, and set out to see the world.

So far, it's been a great learning experience and adventure, and most recently, it's led to her current deployment on U.S. Army Garrison-Kwajalein Atoll.

Currently, Newton supports Navy construction activities with U.S. Naval Mobile Construction Battalion Three, Detail Marshall Islands.

Originally hailing from Monroe, Louisiana, Newton said she feels lucky to be a construction electrician.

When she's not turning wrenches at the Richardson Theater construction site or building water catchments on outer islands, a normal day on deployment begins early for Newton with muster and work on the detail's many projects.

Newton also enjoys the chance to learn new things and to travel and hopes to be stationed in Okinawa and Europe some-

day. On days off, she enjoys the warm weather on Kwajalein.

For Newton, the benefits of naval service are many. She encourages those thinking about pursuing a career in the service to check it out.

"The service offers a lot of benefits, like job training, educational assistance, steady pay, health coverage and housing benefits that you can rarely find anywhere—especially where I'm from," she said.

Key to those benefits also is the continued recognition of the contributions of female service members. She hopes that future service members will be encouraged by that. Newton was initially inspired to join the military by close acquaintances and a female family member, she said.

"My aunt was in the Navy Reserves," Newton said. "I also have a best friend who is still in the Navy. They gave me a lot of advice before I joined, about how things would be."

"It's important [to recognize them] because it provides [us all] more support, and it is needed," Newton said. "There are only so many of us in the Navy. The continuous support provides motivation."

U.S. ARMY PHOTO BY JESSICA DAMBRUCH

U.S. Naval Mobile Construction Battalion 3, Detail Marshall Islands' Construction Electrician Constructionman Ricki Newton visited the AFN Studio to share her thoughts on deploying to USAG-KA and her enlistment in the U.S. Navy. Special thanks to Lt. Gregory Kemper, NMCB 3 Officer In Charge, for coordinating the interview.

IT'S NOT YOUR HEADSTONE

ETHICS, ARCHAEOLOGY AND KWAJALEIN'S CULTURE OF CASUAL LOOTING

BY JESSICA DAMBRUCH

"[Archaeology is] very systematic and controlled," said Kwajalein Senior Archaeologist Caitlin Gilbertson. "You never know what you're going to find, which is what makes it interesting. You may spend a lot of time finding nothing. Then, you do find that one cool thing, and that makes it worth it."

A day on the job with the Kwajalein Archaeology team is not the "entertainment archaeology" you know from the movies. Before the shovel hits the dirt, sand or ground water, there is a plan to protect the atoll's historical sites and cultural artifacts.

"We don't get to choose where we dig, and often, we don't do the digging," said archaeologist Susan Underbrink. "If someone is going to put in a new water line, we determine whether the dig must be monitored."

Gilbertson called this unique process "salvage archaeology."

Fieldworkers and construction personnel log dig permits to ensure their work does not encroach on known historical sites. When artifacts are uncovered during work, Gilbertson and Underbrink perform meticulous on-

site assessments to produce accurate records of the objects found in their immediate environments. Analysis and recovery procedures may require a temporary work stop.

"At that point, we're just waiting for things to come up out of the ground," Gilbertson said. "[The workers] are actively doing construction. We just have to save what we can, document what we can and protect whatever is there."

Over the past six years, the Kwajalein Archaeology team has recovered Japanese and American WWII-era objects and Marshallese cultural artifacts. Among their finds are bottles, coins, buttons, small arms and unexploded ordnance.

In the Republic of the Marshall Islands, despite disruptions from the WWII bombardment and postwar excavation, one might even encounter 1890s-era German water catchments and beer bottles, said Underbrink.

Most items have been found "surprisingly intact," Gilbertson said. If any island residents identify UXO, they should call 5-1550 to report the find to an EOD technician.

The team has also recovered Marshallese historical sites, including an earth oven, or "um."

"We had some of the charcoal carbon dated and learned that it was about 200 years old," Gilbertson said. "Within the last year, we also found the burial of an infant, which is extremely rare and unique. We're still waiting on analysis for that."

"Even after six years, I still learn new

things about Marshallese culture and a little about history every single day. ... My previous experience was all medieval work. There's a distance there, and everything from the medieval period is from so long ago, but a lot of what we find here is recent."

Gilbertson said representations of her profession in popular media are misleading. Though the waiting, research, analysis and digging are not prominently featured in "Indiana Jones," in real archaeology, the payoff is far more satisfying.

"Indiana Jones" is more graverobbing and vandalism than anything else," Gilbertson said.

Unfortunately, those are two things Kwajalein and "Indiana Jones" have in common. Despite best efforts, items from Kwajalein's past still fall prey to casual looters.

THE COCA-COLA BOTTLES

One item atoll archaeologists are less likely to find in recent years is a WWII-era Coca-Cola bottle.

On countless walks and dives, many casual looters have spotted these bottles half-buried in the sand and glinting in the sun before they disappear into private collections.

"You are not allowed to remove artifacts from Kwaj or the RMI in general," Gilbertson said.

Per RMI law, it is illegal to remove historical artifacts from any islands.

Underbrink described an experience at a Kwajalein worksite confronting employees who had looted unique artifacts

she recovered during an excavation. Of the bottles recovered, 125 were Coke bottles, and a few were “unique” and different, Underbrink said. The find also contained a single, vintage Pepsi bottle believed to be one of only two ever reported found on Kwajalein.

The objects began to disappear. Underbrink had to ask colleagues for the bottles to be returned to complete her work.

Focused on their own enjoyment, a casual looter does not understand the true value of an object as part of a place, she said.

“You can’t sell it,” Underbrink said. “How could you prove it’s from Kwajalein? It doesn’t say ‘Kwajalein’ on it. ... It’s like a memento for you, but nobody else. ... It needs to stay here. It has its value here.”

The island’s Coke bottle problem is not unlike issues at historic Native American sites throughout North America, like Chaco Canyon or Mesa Verde, Underbrink said. Signs of casual looting are obvious from the absence of pottery sherds. Today, law enforcement officials search visitors before they depart from the sites.

“Now, there may be hundreds of Coke bottles [on Kwajalein], but if everybody takes one, there won’t be any Coke bottles here for anybody to find,” she said.

IT’S NOT YOUR HEADSTONE

Not everyone tries to take Coke bottles from Kwajalein. Some PCS’ing residents have attempted to smuggle out munitions or even human remains, Gilbertson said.

Then there’s the headstone. “I have an artifact in my lab that we believe to be a Japanese headstone that was in somebody’s front lawn for a number of years [on Kwajalein],” Gilbertson said. “Someone had just moved into the house. They saw this on their lawn, said ‘This looks really important.’ Bravo to that person! They brought it to my office. Eventually, I got a story: Somebody found the headstone on Carlson in the 1980s, and they thought it was cool. They brought it back. It’s a Japanese headstone that probably marked a Japanese burial. Now, we don’t know where [the burial] could be.”

Those who remove or relocate objects create an incalculable loss for future archaeological work on the atoll. In the case of the headstone, surviving family members would also lose a physical location for remembrance.

Gilbertson sums it up: “You are ultimately destroying the history of that object.”

FIELD NOTES

About The Kwajalein Archaeology Team

In her archaeological studies, Gilbertson specialized in osteology and human remains. She has worked throughout Scotland and Europe on medieval-era excavations. Before beginning work on USAG-KA, fellow archaeologist Susan Underbrink served the state archaeologist for the RMI government.

After completing focused studies in ground stone, Underbrink traveled extensively throughout the Marshall Islands documenting remains and archaeological artifacts recovered at both

U.S. ARMY PHOTOS BY JESSICA DAMBRUCH

1) Susan Underbrink, Kwajalein archaeologist, studies an array of Japanese artifacts found on Kwajalein Atoll in March at the Kwajalein Archaeology Office. 2) An intact beer bottle discovered on a Bigej sandbar in August 2021.

battle burial sites. On USAG-KA, the Kwajalein Archaeology team coordinates with the Defense Personnel Accounting Agency regarding efforts to identify and repatriate war dead to their respective countries with dignity and respect.

Thoughts on work

Both archaeologists agree that their work has helped them foster a deeper appreciation for humanity and human history. They are happiest when their work helps them connect families with long-lost loved ones or reveals new insights into Marshallese culture.

“With a lot of the human remains, especially if they’re WWII casualties, it’s very likely they’re going to have someone still living that’s related to them, whether it be children, grandchildren, nieces or nephews,” Gilbertson said. “That makes it a little more rewarding—when we can find those kinds of people, and then, ultimately, send them home.”

“To have come here and to have had the ability to visit so many of the different atolls, and to see that even though it’s one nation, [the Marshallese] live so differently on every different atoll and were such amazing navigators,” said Underbrink.

“They lived by the sea and were able to thrive and explore. It’s mind-boggling to go on a small ride in a canoe. It’s exhilarating and terrifying. Try to imagine what it must have been like 200 to 500 years ago when you didn’t know where you were going, and you had no idea how long it was going to take. Yet, they took those challenges and they succeeded.”

On human remains

You may have noticed that this article does not include photos of human remains found on Kwajalein. Gilbertson explains why:

“We want to be respectful of the fact that these are human remains. Even if they’re not intact and it’s just partial

bones, they are from a person. ...A lot of these people probably have living relatives and family is waiting for them to come home. It’s a huge invasion of privacy, especially if you don’t have consent, to be taking photos and publicizing them without their permission.

... If you go to museums and you think about what you see there, a lot of that is ancient history. It’s a lot of mummies and human ancestors.

It’s not necessarily anybody that’s going to have a living relative that says, ‘Please

don’t take a picture of my grandfather, or my great grandfather and put that on display.’ Any time those [museum] remains are displayed, it is for an educational purpose. Museums can provide a form of

entertainment, but their purpose is to educate and provide information about these past cultures.”

Underbrink added: “There are certain cultures in which it is taboo for them to have remains on display. They don’t want them back. They just want them to be reburied. No photographs, no analysis, just rebury them. That’s their culture. You must also be respectful of that.”

To prevent contamination of specimens found in the field, Underbrink stresses that you should not touch human remains. Archaeologists enter the field to work wearing personal protective equipment and are trained in proper recovery procedures to minimize damage to any artifacts and remains.

Ask Underbrink about her other stories—like the day on the job she got a call from someone whose dog came home with a human leg.

“If you find anything that [still] has flesh on it, call the Kwajalein Police Department,” Underbrink said. For the record, that number is 5-4445.

“You are ultimately destroying the history of that object.”

DOD, ARMY MAKE IMPROVEMENTS TO PCS PROCESS

EXTERNAL REPORT

By Jon Connor, ASC Public Affairs

ROCK ISLAND ARSENAL, Ill.—Summer is here and it's a busy time for U.S. Army personnel and families as they move to their next assignment. Despite domestic improvements regarding COVID-19, the pandemic still proves problematic in other parts of the world and continues to affect the shipping industry.

In response, the U.S. Transportation Command, U.S. Army and the Army Sustainment Command are working hard to continuously improve the permanent change of station process for its customers and family members.

"The pandemic has impacted all sectors of the global market. Ports, port agents, customs, trucking, rail and shipping are all part of those sectors that have been impacted by the pandemic, and they continue to see shortfalls in labor, drivers, material, fuel, increased operating costs as well as other operational resources," said Col. Courtney Abraham.

Abraham serves as the director of the Army Personal Property Lead Element — or APPLE — and commander of ASC's Joint Personal Property Shipping Offices-Mid Atlantic, or JPPSO-MA.

Located at Fort Belvoir, Virginia, APPLE is the Army's lead integrating organization in the Defense Personal Property Program and the collective Joint Enterprise. Its mission is to plan, manage and provide technical oversight to Army Personal Property Shipping and Processing Offices globally.

APPLE maintains operational control

of both JPPSOs located at Fort Belvoir and Joint Base Lewis-McChord, Washington. JPPSO-MA is one of six Army-led shipping offices. This organization executes personal property movement services to authorized personnel within a specified area of responsibility. The JPPSO-MA supports shipments within portions of 12 states, including the Washington, D.C. area.

This PCS season brings many improvements compared to previous years, said Abraham. USTRANSCOM has adjusted domestic and international transit times to provide better predictability and expectation management for Soldiers and families for delivery of their household goods, he said.

"All overseas PCS locations could be impacted, no one greater than another," Abraham said. "The Personal Property enterprise continues to monitor changes in the global supply chain closely and continually communicates with our industry partners in order to implement the best business practices to support our Soldiers and families."

In late 2020, ASC began equipping units with tablets specifically to aid quality assurance inspectors in the field. "Quality assurance inspectors can perform operations and reporting while on the road, utilizing their Wi-Fi-enabled tablets, mobile devices or hotspots," Abraham explained.

Tablets allow inspectors to reach more customers in the duty day, as well as to immediately provide customers with resources, handouts and report findings into the USTRANSCOM system of record without having to return to a traditional office.

Additionally, the Army has a 75% onsite physical inspection standard by quality assurance personnel, surpassing the Defense Transportation Regulation standard of 50%. The Army currently has an 87% physical inspection rate, meaning an inspector has provided in-person representation at time of pack, pickup or delivery.

Abraham detailed the following changes to the overall PCS process that have been implemented since May 2021:

- **Improving inventories:** "We are working with the moving companies to shift from paper copies of inventories and use electronic inventories to the greatest extent possible. This will provide an improved record of the household goods pack-out and the condition they were in when packed. This effort is to accelerate the inventory and accountability process of household goods, eliminate paper copy exchanges, and enable digital transmission and storage of the inventory records offering better services to members and families when moving. Electronic inventories will be mandatory in 2023."
- **Pickup date choice:** "[We] refined how Soldiers and families input their desired pickup dates, adding the ability for them to pick a preferred day inside their requested seven-day pickup window. Also known as 'spread dates,' this refers to the seven-day window during which your moving company is required to pick up your shipment. This policy is de-

signed to give you more control over requesting a specific date range to schedule your move.”

- **Moving company contact:** “The moving company will identify points of contact and email the Soldier/family with that information to facilitate better communication before, during and after the move, improving the overall PCS experience.”
- **Simplifying claims:** “Created a standardized form to simplify filing an inconvenience claim across the DOD. Additionally, military claims offices will be able to declare a catastrophic loss of a shipment regardless of the percent of inventory items lost, damaged or destroyed. In the past, the threshold was 60% of the total shipment.”
- **Securing property:** “Moving companies are already required to place seals on containers, but we’re adding a requirement that customers be notified if any seals are broken, that seals be replaced, and that these actions and communications are noted in the record.”
- **Better communication:** “Increased service provider availability by phone – added Saturday customer support requirement during peak of the relocation period; provider must return calls on same business day and wait times cannot exceed 20 minutes. Additionally, movers are required to provide customers a 24-hour notice of delivery and make two attempts to contact the customer, with each attempt at least six hours apart, before transferring the customer’s shipment to storage-in-transit.”
- **More control and choice for customer:** “More time to file a claim — was 75 days, now 180 days. Simplified convenience claims processing; improved in-transit visibility; single point of contact with moving companies; and have choice to repair or receive repair costs for damages, including full replacement cost.”
- **Personally Procured Moves:** Formerly known as DITY — Do-It-Yourself moves — reimbursement increased to 100% of what it would have cost the government to use a DOD moving company.
- **Inconvenience claims:** “Reimbursement up to seven days of per diem and incidentals when a moving company fails to pick-up or deliver as agreed.”
- **SmartVoucher** process reduces travel payments to less than two days.
- **The Basic Allowance for Housing** rate is in effect at all 40 on-base Intercontinental Hotel Groups Army Hotel locations in the U.S. through the end of fiscal 2022.
- **IHGs** have agreed to only charge Soldiers at their BAH rate when they must stay in temporary lodging for extended periods of time due to

housing or household good delivery challenges.

- **MILPER Message 22-0045 (CAC-enabled):** Allows commanders the flexibility to change report dates by 30 days either before or after the initial report date, or up to 60-day deferment working with the Installation Directorate of Human Resources to get approval.

Despite all these improvements and bearing challenges in mind, Abraham said the Soldier still has much input regarding how successful a PCS can be. He recommended Soldiers always do the following to ensure their PCS goes as smooth as possible:

Once orders are received, visit the installation transportation office immediately to receive household goods counseling and complete shipment application(s).

Communicate challenges with chain of command early, so they can assist and work with the installation transportation office to identify all possible options to support the Soldier and their family; there are several choices available to Soldiers and families to support challenges during their PCS Move.

Provide feedback via the Customer Satisfaction Survey. As of May 15, all customers are now asked to complete a brief survey via text message regarding various milestones throughout their move — entitlement counseling, pack/pickup, delivery and claims.

Resources for PCS Moves

- **My Army PCS** app offers information on entitlements, types of moves, planning, scheduling, and the claims process with a live chat feature and is available for free download in the Google Play Store and Apple App Store.
- **PCS My POV** helps you track your vehicle during shipment and is available for free download in the Google Play Store and Apple App Store.
- **Army’s Digital Garrison** app helps you explore all the benefits your Army post has to offer such as restaurants, events, shops, clinics, activity centers, and directorates. Navigate to on-post facilities, stay updated on local weather, and be informed about gate closures or other important installation information in real time, all from the palm of your hand. It’s available for free download in the Google Play Store and Apple App Store.
- **Military One Source:** The US-TRANSCOM one-stop shop for personal property information and access to systems
- **USTRANSCOM Customer Facing Dashboard:** Provides customers visibility of individual TSP performance.
- **Army Virtual Call Center:** Available at 800-521-9959; offers extended customer support hours of operation, additional chat capability and access to 24/7 support through US-TRANSCOM.

DARIUS RUCKER TO HEADLINE AT DOD WARRIOR GAMES OPENING CEREMONY

EXTERNAL REPORT

By U.S. Army Public Affairs

JOINT BASE LANGLEY EUSTIS, Va.— Three-time Grammy Award winner and multi-platinum selling artist Darius Rucker will headline the opening ceremony at the 2022 Department of Defense Warrior Games this summer.

Hosted by the U.S. Army Training and Doctrine Command, the Warrior Games will take place at the ESPN Wide World of Sports Complex at Walt Disney World Resort near Orlando, Florida, Aug. 19-28.

The opening ceremony will take place Friday, Aug. 19, at The Stadium within the ESPN Wide World of Sports Complex. Attendees will hear favorites from Darius’ time with Hootie & the Blowfish, as well as his solo chart-topping hits like “Wagon Wheel.”

The Warrior Games, first held in 2010, celebrates the resiliency and dedication of wounded, ill and injured active-duty and veteran military service members from the U.S. and allied nations. Hundreds of elite athletes will compete in adaptive sporting events such as wheelchair basketball, cycling, indoor rowing, sitting volleyball and others.

The ESPN Wide World of Sports Complex, which hosted the 2016 Invictus Games, as well as other professional and youth sports events, was donated for use to serve as a Warrior Games venue. This 220-acre award-winning facility features multiple indoor and outdoor competition sites and combines the spirit of sports with Disney magic, making it the perfect host venue for this year’s events.

The Warrior Games serve to enhance the recovery and rehabilitation of wounded warriors by providing them exposure to adaptive sports. Military Paralympic-style adaptive sports programs help wounded service members and veterans build strength and endurance and draw inspiration from their teammates.

Participation in the Warrior Games represents the culmination of a service member’s involvement in an adaptive sports program and demonstrates the incredible potential of wounded warriors through competitive sports.

WHERE TO MAKE A SAFE SUMMER SPLASH

Check out the maps to become reacquainted with the safe swim zones around Kwajalein and Roi-Namur. Forward any questions to USAG-KA Safety at 5-1442 or FMWR at 5-3400.

The highlighted areas are the only unrestricted swimming areas at Kwajalein: Coral Sands, Camp Hamilton, Emon Beach and North Point. A flotation device is recommended 100 feet from shore and required for distances of more than 300 feet from shore. The buddy system or shore watch is required.

The highlighted areas are the only unrestricted swimming areas at Roi-Namur (Areas 1, 2, 3, 6, 12 and 13). A flotation device is recommended 100 feet from shore and required for distances of more than 300 feet from shore. The buddy system or shore watch is required.

UXO HAZARD AWARENESS CLASSES

Kwajalein EOD conducts monthly UXO Hazard Awareness Classes on the first Wednesday of every month.

WHAT? 30-minute new hire and refresher UXO class explaining specific dangers on Kwajalein. Max 18 people per class.

WHERE? Bldg. 1025 (below Telemetry Hill)

WHEN? The first Wednesday of every month at 1 p.m. (minus holidays)

HOW? Call 5-1550 to register. Workshops can be conducted at different worksites to accommodate large groups of employees. Call to schedule.

COVID Vaccine Waitlist

If you have children 6 months to 4 years old, contact Galean Rasmussen, US-AG-KA health systems specialist, at galean.v.rasmussen.civ@army.mil to be added to the vaccine waitlist.

For adult COVID-19 booster shots

- You must be at least 12 years old to qualify for the adult booster shot.
- It must be at least five months since your last Pfizer or Moderna vaccine, or two months since your last Johnson & Johnson vaccine.
- Only island residents aged more than 50 years old are eligible for a second booster five months after the last one.

For children's booster shots

- You must be at least five to 11 years old to qualify for the booster.
- It must be at least five months since your past Pfizer or Moderna vaccine, or two months since your last Johnson & Johnson vaccine.

E-WARENESS: THE MARSHALL ISLANDS IS A SHARK SANCTUARY

COMMUNITY CONNECTION

The RMI established a shark sanctuary in 2011, officially ending commercial fishing of sharks in 768,547 square miles of its waters.

The Marshall Islands' law includes the following: No commercial fishing of sharks or sale of any sharks or shark products; any shark caught accidentally by fishing vessels must be set free; fines up to \$200,000 for anyone found fishing for sharks or possessing shark fins; and no use of long-line fishing gear, which is among the most lethal to sharks.

Please, do everything possible to avoid catching sharks while fishing. If sharks are caught accidentally, attempt should be made to release them as safely as possible. Sharks should not be brought to the Small Boat Marina. If you have any questions, please call Vectrus Environmental at 5-1134.

RTS WEATHER STATION STAFF

WEATHER DISCUSSION

A quiet end to the workweek could give way to occasion-
al stormy weather over the
weekend. The subtropical
ridge in the lower altitudes
will ensure moderate trades
to prevail and keep shower
coverage down for the most
part; however, the wild card
this weekend is an area of
upper-altitude low pressure
which, depending on its de-
velopment and movement,
could bring an elevated risk
for lightning and some strong
wind gusts.
Looking ahead to next
week, the Intertropical Con-
vergence Zone will lift into
the central Marshalls, bring-
ing elevated chances for rain-
fall and strong wind gusts
from Tuesday afternoon into
Thursday morning.

A lingering and weakened
ITCZ looks to bring occasional
showers for the remainder of
the week.

SATURDAY

Mostly sunny with stray
showers. Winds NE-E at 11-
17 knots with a few higher
gusts.

SUNDAY AND MONDAY

Partly sunny to occasionally
mostly cloudy with widely
scattered showers and iso-
lated thunderstorms. Winds
NE-E at 11-17 knots with
strong gusts possible near
showers and thunderstorms.

TUESDAY THROUGH THURSDAY

Periods of showers and
stray thunderstorms from
Tuesday afternoon into Thurs-
day morning, followed by
isolated to widely scattered
showers and a stray thunder-
storm or two to close out the
workweek. Winds NE-SE at
5-15 knots. Strong gusts pos-
sible, mainly on Tuesday.

HOME SAFETY ON USAG-KA

PUBLIC SAFETY ANNOUNCEMENT

Approximately 245 people die of injuries in and
around their home every year. Falls, trips and
slips are the leading cause of injuries in the U.S.,
in addition to electrical shocks and chemicals
and poisons.

- Check smoke detectors regularly
- Use the right tool for the job
- Be cautious with ladders
- Wear protective wear when appropriate
- Place fire extinguishers in strategic places
- Avoid electrical risks
- Keep chemicals labeled and out of reach of children
- Keep house lit/clear of clutter and other trip hazards
- Submit a work order through ARMA
- Create an escape plan with the family

HELP US PROTECT OUR MISSION. OPSEC DOESN'T END WHEN YOU PCS.
PLEASE THINK BEFORE POSTING PHOTOS AND VIDEOS TO SOCIAL MEDIA.
